# D30® INNOVATIVE TECHNOLOGY

## SHOCK ABSORPTION AND PROTECTION

D30® TECHNOLOGY WAS INTEGRATED INTO CCM'S NEW GOALIE LINE IN ORDER TO HELP PROVIDE PLAYERS WITH GREATER SHOCK ABSORPTION AND ADDED IMPACT PROTECTION. D30'S INTEGRATION INTO THE CHEST PROTECTOR, PANTS, CATCHER AND BLOCKER AT STRATEGIC LOCATIONS HELP TO MAXIMIZE COMFORT AND IMPROVE IMPACT ABSORPTION.

### PANTS

Placed in the high impact thigh zones, D30® smart foam helps add high performance shock absorption.

### CHEST PROTECTOR

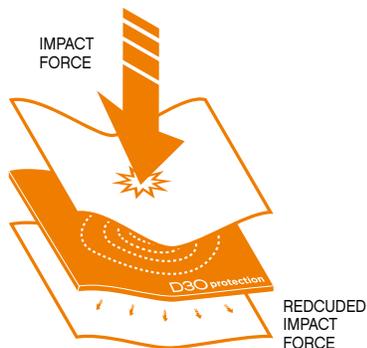

D30® inserts placed in the sternum help provide greater impact protection and rebound control.

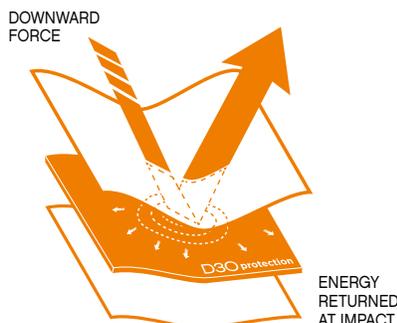

## WHAT IS D30®?

D30 is a patented technology used to make a soft and flexible material with high shock absorbing properties, known as a smart material. D30 has a unique molecular structure; in standard conditions, the molecules flow freely allowing the material to remain soft and flexible, but on impact, they lock together to absorb and dissipate the impact energy and reduce the transmitted force. The molecules instantly return to their flexible state. D30 is strain-rate sensitive, which means the stronger the impact, the more the molecules react, providing great protection.

### SHOCK ABSORPTION

### ENERGY RETURN

### CATCHER & BLOCKER

D30® smart foam is strategically placed in the palm of the catcher and blocker to help provide better shock absorption.
