Goal Pads

VPG 7000 VELOCITY

The Velocity 7000 goal pad has quickly become the standard by which all other goal pads are measured. Innovative design, construction and features provide the pinnacle of performance. The Velocity pad is designed to enhance the performance of the modern Pro-fly style goaltender who uses the pads to move aggressively to the ice, keeping the pads vertical creating maximum net coverage. The unique design also allows the top of the pads to fill the five-hole area effectively, building an impenetrable wall along the ice. The Velocity pad design and features give the aggressive goaltender the tools to dominate and take full advantage of this style of play.

- Full leg cradle holds the leg parallel to the ice with adjustable knee lifters to elevate the knees from the ice surface, to limit stress on the knees and hips, allowing for greater leg extension

- Full knee cradle with elastic and Velcro closure to secure knee into pad
- Flat inside edge of pad for stability in the Pro-fly position giving the pad much greater amount of blocking area
- Large outside rolls with square edge prevents puck skip-over
- Special design to the top of pads along with integrated thigh protector function to fill the five-hole area and increase protection
- Light weight allows incredible control and mobility to increase speed of movement
- Diamond grip synthetic material on back of pad provides additional control and added water repellency to keep pads even lighter
- Adjustable top leg strapping system allows the straps to be positioned from a conventional straight-across to a diagonal position, which keeps the tops of the pads in the five-hole area

- Flex-Pac internal padding and construction provide for superior rebound control and protection
- Tapered inside toe area at skate allows for quicker transition when getting up from the ice by allowing the skate blade to make quicker contact with the ice surface
- Available in sizes 30", 31", 32", 33", 34", 35", 36", 37", 38" and custom sizes

Goal Pads

VPG 6000 LEGACY

The VPG 6000 Legacy pad takes an innovative leap forward in design technology by providing a pad that is fully configured and optimized for the Pro-fly style of play but yet can still be used for any style goaltender. The pad is anatomically designed and balanced to provide for added control allowing for quicker movement.

- Full leg cradle holds leg parallel to ice, with adjustable knee lifters to elevate knee from the ice surface to limit stress to the knees and hips and allows for greater leg extension
- Full knee cradle with elastic strap with Velcro adjustment
- Flat design to top thigh area of pad along with angled top straps allow top of pads to fill five-hole area
- Lightweight balanced design gives greater pad control for quick movement

- Raised inner roll on face of pads to deflect pucks away from the five-hole area
- Pad design features full 12" pro width and is shaped to give added coverage area
- Diamond grip material in leg channel and knee cradle gives added control and additional water repellency
- Double five-hole rolls provide additional blocking area to seal pad to ice and function to stabilize the pad on the inner edge when in the Pro-fly position

- Closed toe design for added protection
- Large thigh guard for added protection and function to fill in five-hole area
- Wraparound knee roll design with integrated knee bars provide added flexibility, and allows for easy transition from pad face to side
- Tapered inside toe area allows skate to keep contact with ice longer and aids in getting up faster
- Available in sizes 30", 31", 32", 33", 34", 35", 36", 37", 38" and custom sizes

These and many more colors available

Goal Pads

VPG 5500 VISION

The VPG 5500 goal pad features our Bio-flex design which provides optimal shaping and flexibility with angled flex points in the knee and skate areas so the pad can properly follow the anatomical movements of the leg for quick reaction and ease of movement. The angled design feature at the skate area of the pad allows the bottom of the pad to be angled outward while in the natural ready stance position but keeps the main body of the pad square to the shooter giving added net coverage. This is especially helpful for goaltenders, who have a deep crouched position or use the traditional butterfly style of play.

- Flex-Pac padding system for lightweight flexibility and quick break-in
- Deep leg channel provides pad stability
- Full knee cradle
- Diamond grip material in leg channel and knee cradle for added control and water repellency
- Composite inserts in knee area for added protection
- Large double five-hole rolls
- Anatomical design is proportionally balanced and distributes weight equally over pad length
- Large thigh guard with five-hole blocking design
- Skate cradle features Diamond grip material along with stabilizer bars at instep area for added pad stability
- Angled knee rolls with wraparound design for added flexibility
- Protective toe caps
- Full inside leg guards
- Available in sizes 30", 31", 32", 33", 34", 35", 36", 37", 38" and custom sizes

Goal Pads

VPG XP-CUSTOM

The XP-Custom Pro goal pad is engineered and hand crafted lightweight to provide superior flexibility and enhanced mobility for quick rapid movements and less leg fatigue. The design and construction provide for optimal shape and fit that gives excellent pad control and comfort. Pre-shaped design with wrap around knee rolls increases pad flexibility. The XP-Custom design features a full leg and knee cradle lined with Diamond grip material that increases pad control.

- Full 12 inch pro width with wide profile for added blocking area
- Full wraparound knee rolls for added flex
- Large inside edge five hole rolls
- Full leg cradle with Diamond grip material for added control
- Lightweight for quick movement
- Extra deep skate channel for stability
- Full inside leg and knee protection
- Large side rolls for added blocking area
- Thigh guards with five hole blocking design
- Available in sizes 31", 32", 33", 34", 35", 36", 38" and custom sizes

VPG 3700 VISION

All new for 2003, the Vision 3700 pad features our Bio-flex design angled wraparound knee rolls for an anatomically correct fit, and flex-Pac internal padding, that together provide for optimal fit flexibility and quick break-in. Deep inset leg channel with full knee cradle with adjustment strap and full leather leg straps and dual skate straps provide for pad stability and control.

- Full 12 inch pro width
- Angled Bio-Flex knee rolls with knee bars
- Dual skate straps
- Knee cradle with adjustment strap
- Full knee and calf leg guards
- Five-hole blocking thigh guards
- Large side rolls for added blocking area
- Flex-Pac internal padding
- Hand sewn top and bottom wear trim
- Inside edge five hole roll
- Available in sizes 31", 33", 35" and special order 37"

These standard colors available

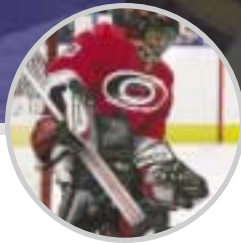

Goal Pads

VPG 7070 VELOCITY

The VPG 7070 intermediate sized Velocity pad is a scaled version of our pro Velocity pad engineered to give the same performance advantages and features as the adult model, providing optimal performance for the higher caliber intermediate sized goaltender.

- Full leg cradle holds the leg parallel to the ice, with adjustable knee lifters to elevate the knees from the ice surface, this feature limits stress on the knees and hips allowing for greater leg extension
- Full knee cradle with elastic strap to secure knee into pad
- Large outside rolls with square edge for maximum blocking surface and to prevent puck skip-over
- Intermediate sizing and design 1" narrower than pro model
- Design allows top of the pad and integrated thigh guard to fill in five-hole area
- Tapered inside toe area at skate allows for quicker transition when getting up from the ice by allowing the skate blade to make contact with the ice surface quicker
- Diamond grip synthetic material on the internal leg area provides additional control and repels water to keep pads light
- Light weight allows for increased pad control and mobility for quicker reaction and movement
- Available in sizes 27", 29", 31"

Goal Pads

VPG 5550 VISION

The Vision 5550 intermediate sized pad is engineered to give the smaller goaltender the same performance advantages as the pro model pad, to meet the needs of the higher caliber intermediate sized goaltender. Full Bio-Flex design provides optimal shape so the pad can properly move and follow the natural motion of the legs for quicker reaction time and faster movement. The leg channel now features the Diamond grip material that enhances pad control, and the instep area of the pad features stabilizer bars to give more pad control in the skate area.

- Angled knee rolls with knee bars for added flexibility
- Proportionally balanced to distribute weight over pad length
- Deep leg channel prevents pad twisting
- Large five-hole roll
- Thigh guard with five-hole blocking design
- Inside knee and calf guards
- Internal knee cradle for comfort and protection
- Composite reinforcement in knee area for added protection
- Skate cradle with stabilizer bars for added control
- Available in sizes 29", 31", 32"

VPG 6060 LEGACY

The VPG 6060 Legacy Junior goal pad brings a new higher level of performance to a junior sized pad. The VPG 6060 is engineered and scaled in design from our adult model pad giving the younger goaltender the features and performance normally found only in an adult sized pad.

- Wraparound knee rolls with knee bars for added flexibility
- Full knee cradle with elastic strap with Velcro adjustment
- Knee cradle design with knee lifter to raise knee from ice
- Closed toe design for added protection
- Three full shin leg straps allow for added pad control
- Angled top straps allow the tops of the pads to block the five-hole area while down on the ice
- Large outside rolls for added blocking surface
- Thigh guard with adjustable strap
- Deep inset leg channel
- Large inner shin five-hole roll
- Full inside knee and calf guards
- Available in sizes 26", 28", 30"

Goal Pads

VPG 690 VISION

The 690 has been engineered for increased flexibility and features a pre-formed shape to allow for quicker, easy break-in. The design provides for optimal fit to provide enhanced pad control for quicker movement and added protection. The pad is hand crafted of the same select materials as our adult models for durability.

- Deep leg channel provides optimal fit and protection.
- Flex-Pac padding system
- Reinforced wear edges
- Full inside knee and calf protection
- Pre-shaped for easy break-in
- Available in sizes 22", 24", 26", 28"

VPG 400 VISION

The VPG 400 features full hand-stuffed Flex-Pac internal padding with durable materials and construction throughout. Lightweight and flexible along with pre-shaped design allows for enhanced performance for the younger goaltender.

- Closed toe for added protection
- Deep leg channel for good pad control
- Leg straps with quick release buckles
- Available in black/white only in sizes 20", 22", 24", 26"

VISION

Arm & Chest

VP 7000 VELOCITY

All new for 2003, the new Velocity arm and chest protector is a revolutionary advancement in arm and chest protector design and construction that matches the anatomical movements of the body to give the ultimate in performance fit and comfort. Extremely flexible with increased mobility that provides for rapid break-in, the design provides for additional net coverage with wide shoulder and arm floater areas. This and the low rebound design to the chest pad and shoulders give added puck control. The unique chest pad design features a Lexan sternum reinforcement and layers of

high-density foams and plastic for added protection and flexibility. Extra wide chest pad flaps provide for additional wraparound protection, and large adjustable reinforced back pad has dual adjustable chest pad buckles. The full molded contoured arm protection wraps around inner arm for increased protection, Molded four-point adjustable elbow pads and adjustable wrist straps provide for custom fit.

- Unique Velocity design chest protector for superior protection
- Wide shoulder extensions
- Wraparound protection for arms

- Lighter weight for quick movement
- Tapered forearm for padding
- Anatomically designed for ease of movement
- Balanced design for even weight distribution
- Extra wide arm floaters with lace adjustment
- Chest pad side extensions
- Low rebound design
- Molded adjustable elbow pads
- Lexan chest pad insert
- Available in sizes XS, SM, MED, LG, XLG

ADULT FITTING GUIDE

XS	5'	to	5'2"
SM	5'3"	to	5'5"
MED	5'6"	to	5'9"
LG	5'10"	to	6'
XLG	6'1"	to	6'5"

Arm & Chest

VP 6000 LEGACY

The 6000 Pro arm and chest protector features our proprietary multi-flex chest pad design that pivots and articulates to move with the body and provides a double layer of protection along with an added plastic reinforcement to the sternum area. Contoured designed shoulder area improves fit and evenly distributes the weight of the unit. Large shoulder floaters with overlapping plates give added protection along with increased flexibility. Large, wide profile arm floaters provide additional protection and blocking area.

Anatomically designed arms are constructed to allow for full range of motion for quick rapid movements.

- Special high-density laminated chest pad construction
- Multi-flex chest pad design with added sternum protection
- Air cushioned chest pad padding

- Dual chest pad harness
- Molded double shoulder caps
- Pre-shaped forearm padding with Velcro wrist straps
- Adjustable contoured shaped back pad
- Molded biceps protection
- Molded foam and plastic reinforced elbow caps with four-point adjustment
- Large arm floaters with puck-deflecting design
- 420-denier urethane coated nylon exterior
- Available in sizes SM, MED, LG, XLG

VP 5500 VISION

Advanced Bio-Flex design technology provides for an anatomically correct fit that allows the unit to move with the upper body while keeping the padding in place increasing the protection and providing an incredible amount of flexibility and freedom of movement. Shoulder and back pad design improve the weight distribution of the unit and feature contoured shaping for improved fit and comfort.

- Composite reinforced sternum plate for added protection
- Large contoured shoulder floaters for added blocking area
- Articulating multi-flex chest pad design
- Extra wide arm floaters
- Molded side elbow floaters

- Pre-molded tapered forearm padding
- Shoulder cap blocking extensions
- Anatomically designed catching and blocking arm design
- Wide cut chest pad for added protection
- Adjustable back pad
- Molded elbow caps with plastic reinforcement with four-point adjustment
- Balanced design for even weight distribution
- 420 denier urethane coated nylon exterior
- Available in sizes XS, SM, MED, LG, XLG

Arm & Chest

VP XP-CUSTOM

All new for 2003, the new XP custom arm and chest protector design features a hybrid design that has been optimized for light weight and flexibility. Lightweight balanced design provides for quicker break-in and features wide profile shoulder floaters for added net coverage. Chest pad design and construction aids in flexibility and features a sternum reinforcement plate and air cushion internal layer padding.

- Wide profile shoulder padding for added net coverage
- Flexible design for quick break-in
- Sternum reinforcement plate
- Adjustable elbow guards
- Adjustable wrist straps
- Tapered forearm padding
- Wide arm floater with lace adjustment for added arm flex
- Available in sizes XS, SM, MED, LG, XLG

VP 3700 VISION

All new for 2003, the new 3700 Vision arm and chest protector. The new design features arms with Velcro length adjustment, full molded forearm and biceps protection and molded adjustable elbow guards. Wide shoulder and shoulder caps gives added net coverage. Chest pad design features high density laminated foam construction with air cushion inner padding, side rib cage extension padding, and full back padding with high density plastic reinforcement.

- High density chest pad blocks
- Molded biceps and forearm padding
- Adjustable wrist straps
- Molded four point adjustable elbow guards
- Wide profile shoulder floaters
- Easy flex arm design
- Inside and outside elbow protection
- Available in sizes SM, MED, LG

VP 6060 LEGACY

The VP 6060 super junior arm and chest protector is modeled from our 6000 pro model and features our unique multi-flex chest protector for increased mobility and protection. Large shoulder floater has overlapping protection. Full adjustable back pad has dual chest pad harness.

- Molded shoulder and arm protection
- Tapered forearm protection
- Reinforced sternum area
- Wide arm floaters for added protection and puck deflecting
- Adjustable back pad
- Built-in neck guard
- Adjustable wrist straps
- Molded elbow protection with four-point adjustment
- Available in junior sizes SM, MED, LG, XLG and XXLG

Arm & Chest

VP XP-CUSTOM JUNIOR

New for 2003, the XP Junior arm and chest protector is styled from the adult pro model. Features easy flex construction for added mobility and lightweight for quick movements and less fatigue. Pre-shaped arm design gives excellent comfort and superior fit. Chest pad features full pro thickness for added protection.

- Lightweight easy flex design
- Tapered forearm padding fit easy into gloves
- Air cushion chest pad
- Full pro chest pad thickness
- Adjustable back pad
- Adjustable wrist straps
- Molded adjustable elbow guards
- Available in sizes SM, MED, LG, XLG

JUNIOR FITTING GUIDE

SM	4'	to	4'3"
MED	4'4"	to	4'7"
LG	4'8"	to	4'11"
XLG	4'11"	to	5'2"
XXLG	5'1"	to	5'4"

VP 690 VISION

The VP 690 Junior Vision arm and chest protector features large wide shoulder floaters and molded shoulder cap for additional net coverage and added protection. Arm design features molded plastic reinforced forearm and biceps protection with fully molded adjustable elbow guards.

- Reinforced adjustable elbow guards
- 420 denier nylon exterior
- Adjustable wrist straps
- Adjustable back padding
- Reinforced chest pad with air-cushioned padding
- Available in sizes SM, MED, LG

VP 400 VISION

New for 2003, the VP 400 Vision arm and chest protector is designed and constructed to provide superior fit, comfort and protection for the young goaltender.

- Full molded plastic forearm and biceps protection
- Pre-shaped arm design for easy flex and quick break-in
- Back padding
- Molded shoulder cap
- Contoured shoulder floater
- Cushioned chest pad
- Adjustable arm length
- Available standard size only

Catch Gloves

T 7000 VELOCITY

New design features for 2003 give the Velocity 7000 catch glove increased performance and protection. The Velocity glove design provides for a large open catching area for added surface area and net coverage. The shaped thumb acts to reduce rebounds with contoured design with reduced flat areas that direct shots into the pocket. This design gives the glove the largest perimeter dimension allowable and increased net coverage. The internal hand and fingers provide for larger hand sizes and improved glove balance. New super deep T-web, curved molded cuff, and side cheater bar add to the amount of net coverage. All New Gel-Tec thermal form padding provides increased protection and quicker break-in.

- Unique thumb design directs puck to glove pocket
- Velocity open palm design for added coverage
- New side cheater bar to limit puck skip over
- Adjustable wrist and internal hand strap system for control
- Pre-shaped with hinge design palm for quick break-in
- Full two-piece backhand padding with high density foam protection
- Fingertip deflecting ramp
- Curved cuff for added protection, wrist room and flexibility
- Gel-Tec thermal form padding
- Extremely lightweight, high performance balanced design

These and many more colors available

Catch Gloves

T 6000 LEGACY

The T 6000 features a large catching surface with a shaped balanced perimeter for lighter weight and control. The design also features our Gel-Tec protection system and construction that allows the glove to be heat molded for a custom fit and quicker break-in. Innovative adjustable T-web design allows the T-web to be expanded to three different depths. Dual wrist straps give added control and the floating cuff design allows the catching surface to be kept more square to the shooter.

- Adjustable depth T-web
- Air dispersal cuff for added protection
- Gel-Tec foam protection
- Heat moldable for custom fit
- Three-piece backhand protection
- Flared cuff design
- Padded palm with plastic reinforcement
- Large catch surface

Catch Gloves

T 5500 VISION

With new performance enhancements for 2003, The T 5500 features our advanced patented Bio-Flex design technology to give the glove superior control, feel and balance. New thumb mold design provides for a larger open palm for added net coverage and quicker break-in, with a redesigned heel area for improved stick handling and shooting. Neoprene internal glove with adjustment strap with improved fit provides for custom hand adjustment and glove control for quick, precise closure for superior catching dynamics. Composite reinforced palm area provides for added protection, and new Gel-Tec thermal form padding combined with select material allow the glove to be heat-formed and custom fitted to the hand for the ultimate fit and rapid break-in.

For puck retention, large deep Tri-web pocket design expands under impact to absorb energy from shots.

- Select material allows the glove to be thermal heat formed to the hand
- New thumb design for more open palm area and greater net coverage
- Gel-Tec padding system for added protection
- Molded front cuff for puck deflection
- Side cheater bar for increase coverage area
- Individual finger stalls
- Neoprene internal glove with adjustment strap
- Adjustable wrist strap
- Large Tri-web pocket

T XP-CUSTOM

The XP-Custom Pro catch glove design and construction are optimized to provide lightweight and flexibility. Perimeter balanced design provides for even weight distribution for lighter feel and quick movement. Large deep T-web pocket with quick close top for puck retention. Internal finger stalls and adjustable hand strap for secure fit.

- Molded front deflecting cuff
- Adjustable internal hand strap
- Adjustable wrist strap
- Large deep T-web
- Large catching surface
- External three-piece hand protection

T 3700 VISION

New for 2003, the Vision 3700 catch glove is lightweight in design with palm break engineered for accelerated break-in for game-ready use. Deep dual bar T-web with precision closure and control for puck retention. Molded front blocking cuff for puck deflection. Full articulated external backhand protection with high density padding over the finger area for greater protection. Full, reinforced thumb with notched heel area to improve stick handling and shooting with reinforced palm for added protection.

- Molded thumb protection
- External hand protection
- Reinforced palm with quick break-in design
- Deep double bar T-web design
- Large catching surface
- Adjustable wrist straps

Catch Gloves

T 7070 VELOCITY

Our all new T 7070 Velocity intermediate sized catch glove is a scaled down 7 percent from our Pro Model Velocity catch glove. The new T 7070 is designed for game-ready use with a quick break hinged palm for precise closure and added protection. Extra Large deep T-web provides for precise closure and puck retention. Velocity design provides wide-open palm for added coverage, molded thumb design functions to reduce rebounds and deflect pucks toward the pocket.

- Open face design adds to net coverage
- Lightweight balanced design for fast maneuverability
- Two-piece backhand padding with high density protection
- Fingertip deflector for added backhand protection
- T-web design closes tight to ice for puck retention
- Internal strap for hand adjustment for glove control
- Pre-shaped for easy break-in

T 5550 VISION

The Vaughn T 5550 intermediate-sized vision catch glove features our full Bio-Flex technology and design, with composite reinforced palm that can be heat molded for a custom fit, and large Tri-web pocket for enhanced catching performance.

- Two piece dimensionally shaped palm
- Large Tri-web pocket
- Molded flared cuff
- Three piece pack hand padding
- Bio-Flex internal glove system
- Individual finger stalls for added control
- Composite reinforced palm
- Heat moldable for custom fit
- Patented design

Catch Gloves

T 6060 LEGACY

The T 6060 junior catch glove features a pre-shaped easy to close and control design, with a large catch surface for added net coverage. Large deep T-web pocket for puck retention, molded thumb and finger areas have plastic reinforcements. Cuff design features a molded flared front for added wrist mobility and a floating cuff to keep glove more square to the puck.

- External back hand protection
- Molded thumb and palm plastic reinforcement
- Large T-web
- Adjustable wrist strap
- Pre-shaped for easy break-in
- Floating cuff design
- Molded front cuff

T 690 VISION

The T 690 junior catch glove features a wider open pocket and palm for added net coverage and easier closing for quick break-in, and our larger T-web for puck retention.

- Molded thumb and palm protection
- Lightweight well balanced design
- Large T-web
- External back hand protection
- Adjustable wrist strap

T 400 VISION

The T 400 is a beginner's/novice model catch glove with special emphasis in the design for open shape and easy closing to allow younger goaltenders to control the puck while catching.

- Full adjustable wrist strap
- Deep T-web design pocket
- Full back hand protection
- Molded thumb and palm plastic for added protection
- Easy close design
- Available in black/white color only

Blockers

B 7000 VELOCITY

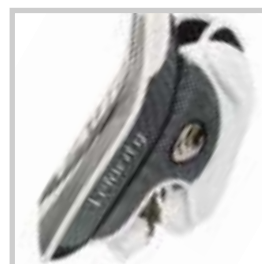

The Velocity 7000 blocker is designed to provide the greatest amount of net coverage by having the blocking surface constructed with a gradual curve from the mid board to the top so as not to limit the length of the board. The bottom edge of the board is tapered to allow easy transition to the ice while making paddle down moves. The top area of the board also features a tapered edge. This, along with the full-flex cuff, provides for increased wrist

movement. The protective foam board features layers of ultra high-density foam with a polycarbonate Lexan composite shield for increased protection. Unique side hand protection with deflector bar adds to the overall amount of net coverage area.

- Blocking board with Lexan composite reinforcement
- Full articulating flex cuff design
- Adjustable wrist strap

- Full large finger protectors with side finger guards
- Side hand guard for added protection
- Palm with Diamond grip material provides additional stick grip control and dries extremely fast
- Air cushioned padding to back of hand
- Tapered bottom of board for paddle down move
- Light weight

B 5500 VISION

New features for 2003 the B 5500 Vision blocker features our revolutionary Bio-flex articulating cuff that moves to follow the natural angles and movements of the wrist to provide a full range of motion. The hand position is angled to provide an anatomically correct grip that keeps the board in a more vertical position, angled hand position provides for greater board control when impacted at the edges and prevents unwanted board rotation on the hand for more precision in deflecting shots. Side deflecting wedge increased the blocking surface when the face of the glove gets turned on high shots. Tapered board bottom end and angled hand optimize the design for movement when in the paddle down position. Internal padding with Ultra high density foams with a Lexan

composite insert to dissipate impacts. New Gel-Tec thermal form padding over the back area of the hand to limit impact and vibration transfer to the hand.

- Two piece finger protector with wrap around protection
- Adjustable wrist strap for precise glove control
- Side deflection ramp
- Large flare at top of board for puck deflection
- Index finger side guard
- Double layered palm with New "Ever Fresh" treatment
- Tapered bottom edge
- Angled hand position for anatomically correct positioning
- Articulating Bio-Flex cuff

- Molded thumb protection
- Split dual finger protector
- Available in black/white color only

Goal Pants

P 7000 VELOCITY

All new for 2003, the P 7000 Velocity goal pant is designed to achieve the maximum amount of net coverage with minimal bulk and lightweight. The Velocity goal pant features our unique thigh-cradle technology that provides stability to the thigh guards and limits thigh pad twisting for greater puck stopping and deflecting. Large five-hole rolls with internal support padding give quick rapid closure to minimize openings in the five-hole. Full stretch crotch area and inner thigh area provide for increased flex and ventilation. Rear leg split prevents the thigh area from being displaced while going down to the ice, to keep thigh guards blocking as much area as possible. Low rebound foams provide for quick break-in and comfort and absorb impact to limit rebounds. Wide profile design and contoured waistband improves pant and chest pad interaction, increased flexibility.

- Thigh cradle technology for enhanced performance
- Lace-up fly area for added adjustment
- Adjustable belt for customized fit
- Rear leg split to optimize performance
- Inner leg stretch material
- Large five hole blocks
- Front abdominal protection
- Available in sizes SM (36-38), MED (40-42), LG (44-46), XLG (48-50), XXL (52-54)

Note: add 8-10 inches to actual waist size to choose proper size goal pant.

P 5500 VISION

The P 5500 Vision goal pant has been engineered to provide lighter weight and greater flexibility to enhance mobility and freedom of movement. The large profile design provides comfort along with added net coverage. Wide profile thigh guards feature wraparound construction for added protection, vertical side blocks provide additional blocking surface. The front contoured waist area and abdominal pad allow easy flexing for additional comfort.

- Large thigh guards
- Dual density foam padding
- Five-hole rolls for inner thigh protection
- Large wide design
- Molded hip guards
- Dual adjustable belts
- Front abdominal protection
- Available in sizes SM (36-38), MED (40-42), LG (44-46), XLG (48-50) XXL (52-54)

Note: add 8-10 inches to actual waist size to choose proper size goal pant.

P 6000 LEGACY

Super Pro goal pant with traditional design, extra protection in critical areas, wide profile thigh guards and added side blocks for large blocking surface. Constructed with durable 420-denier water-resistant nylon for extended durability.

- Adjustable padded belt
- Large inner five hole rolls
- Large wide thigh guards
- Extended coverage side blocks
- Large abdominal pad
- Removable padding for easy cleaning
- Available in sizes XS (32-34), SM (36-38), MED (40-42), LG (44-46), XLG (48-50), XXL (52-54)

Note: add 8-10 inches to your actual waist size then match to sizing in parenthesis.

Goal Pants

P XP-CUSTOM

New for 2003, the XP-Custom Pro goal pant is designed specifically to suit the fit requirements of a goal tender with a wider profile cut. Large thigh guards for added blocking area with optimized construction for light weight and comfort to allow for quick break-in. Contoured front waist allows for chest pad fit and added flexibility and movement.

- Lightweight and very comfortable
- Large five-hole rolls with internal support padding
- Adjustable waist belt for custom fit
- Wide profile thigh guards for added blocking area
- Front abdominal pad
- Front padding with flex breaks
- Available in sizes XS (32-34), SM (36-38), MED (40-42), LG (44-46), XLG (48-50), XXL 52-54)

P 6060 LEGACY

The Junior P 6060 Legacy goal pant is specifically design and tailored for the movements of a goaltender. New designed thigh guards have a larger profile for added protection and additional blocking surface. The front contoured waist area allows added flexibility and freedom of movement.

- Full molded hip and large thigh guards
- Five-hole inner thigh rolls
- Large abdominal pad
- Adjustable waist belt
- Available in sizes SM (20-22), MED (24-26), LG (26-28), XLG (28-30), XXL 32-34)

P 690 VISION

The P 690 is designed and constructed to offer added flexibility and additional freedom of movement for the younger goaltender. Large thigh guards add to blocking area.

- Large cut to fit goaltenders movements
- Inner thigh protection
- Adjustable waist belt
- Abdominal padding
- Sectioned waist for flexibility
- Available in sizes SM (20-22), MED (24-26), LG (26-28)

Goal Sticks

VGS 7000 VELOCITY

New for 2003, the Velocity goal stick features internal Polyurethane foam core injected paddle for lightweight and balance. Aspen laminated wood handle with fiberglass laminates provides for added stiffness. Full exterior reinforced glass finish adds durability. Large mid-blade curve blade with rounded heel provides for easy shooting and stick handling. Contoured shape at the top of paddle improves hand position for comfortable anatomically correct grip, and keeps paddle of stick from impacting index finger when using paddle-down move to the ice.

Mid Curve

VGS 5500

New Construction for 2003 features new polyurethane foam core paddle construction for lighter weight and improved balance and mid-height paddle with fiberglass and composite reinforcement. The blade features a large heel curve and a rounded heel for easy shooting and stick handling. Contoured shape at the junction of paddle and handle provide comfortable grip and improved control.

Heel Curve

VGS 6000 LEGACY

The Legacy 6000 goal stick is constructed with a laminated handle with a medium flex with select wood constructed paddle with profile shape for lightweight. Tall paddle height features full fiberglass reinforcement with composite reinforced wear edges on each edge of paddle for added durability. Large mid blade curve with rounded heel for easy shooting and stick handling. Contoured shape at handle and paddle junction provides an anatomically correct grip for full stick control and allows for easy poke-checking and keeps the paddle of the stick from impacting the index finger when using paddle down move to the ice.

Mid Curve

VGS 5550 VISION

The 5550 Vision goal stick features a laminated handle with profile shaped paddle for lightweight. The paddle and blade are reinforced with fiberglass construction with graphite inserts and composite reinforced wear edges for added durability. Medium heel blade curve with rounded heel provides for easy shooting.

Heel Curve

- Durable nylon exterior
- Internal molded foam and plastic
- Fits waist size 26" to 36"

Goal Masks

VM 5500

The VM 5500 mask is designed and constructed with full composite construction with layers of bi-directional fiberglass with composite inserts in the forehead and chin to deflect and dissipate impacts, and provide maximum protection and shell strength. The mask shape is designed to provide optimum fit to give maximum visibility at all angles. Air holes and face opening are designed to provide maximum ventilation to dissipate heat build-up. Cage bars are strategically positioned to obtain maximum visibility while in the crouched position. The cage is constructed of polished stainless steel which provides optimal visibility. Internal padding of dual density Vinyl Nitrile based foams provide lightweight comfort and protection.

- Available in standard colors of Black, White, Royal blue, Red, Navy
- Custom colors and art work also available
- Comes with cloth carry bag
- Removable terry cloth sweat band
- Sizes in Adult SM, Standard and XLG

VM5500PC

The 5500PC mask is of the same shell construction as 5500 mask with fiber glass and composite laminates, but features a pro-style cage with larger eye openings.

- Available in standard colors of Black, White, Royal blue, Red, Navy
- Custom colors and art work also available
- Comes with cloth carry bag
- Removable terry cloth sweat band
- Sizes Adult Standard and X-large
