VPG 7600 Velocity 4

The Velocity 7600 goal pad is an enhanced design that is an evolution in development of our Velocity series of goal pads. The pad is constructed using a special light weight internal High Density foam core that provides a precise shape and stronger internal structure that has a more ridged perimeter edge strength for a firmer blocking surface. Wider inside pad edge makes the pad more stable while on the ice. This provides added stability for more dynamic slides across the ice giving improved balance and control. Tall thigh rise with plus one sizing helps seal off the five-hole area and the lower pad break angle holds the pad taller for improved net coverage in all positions. Narrower outer side panel shape provides lighter weight and improved lateral pad balance for improved feel and improves the pad interaction with the pants when transitioning to the ice. Wide leg and knee cradle structure is lined with a specially designed low friction Micro fiber synthetic leather. This speeds pad rotation for faster movement and a quicker pad seal to the ice. The inner toe design allows the skate blade to contact the ice sooner for quicker foot movement and faster recovery. The wider knee cradle also features a double elastic strap with dual Velcro adjustments for a custom fit, the higher density inside knee protection provides greater stability and protection. The knee lifter design and construction uses high density foams

layered to maximize impact resistance for less shock to the inner knee area when impacting the ice.

- Full Pro spec construction with high density inner core gives greater pad stability in both length and width
- Wider inner edge allows for more control in aggressive pad slide moves
- Low profile balance stabilizer allows for quicker movement and provides greater stability while in a butterfly position on the ice
- Dual knee straps provide greater adjustment and increased pad control
- Flex-Pac internal padding system allows for pad to break-in to the user and provides added rebound control
- Firmer perimeter edge for more effective puck blocking
- Wider leg cradle with low friction material for quick pad rotation
- Low pad scoop angle designed to hold pad in improved position for more effective use of pad height
- Narrower outer pad panel reduces weight and improves lateral balance
- The Velocity 4 graphics present a taller visual appearance to make the goaltender look larger
- Molded thigh boards with lace adjustment for added protection
- Available in sizes 32+1", 33+1", 34+1", 35+1", 36+1", 37+1", 38" and custom sizes

Goal Pads

VPG 9500 Vision

All new for 2011 the 9500 Vision goal pad is designed for the goaltender that prefers a pad with a more ridged knee and thigh rise and typically uses a blocking style butterfly save selection. The 9500 pad design features a complete solid firmer flat front blocking surface with a single horizontal flex seam at the ankle area. The pad interior is constructed with our Flex-lam padding system that consists of several layers of varying foam densities that are hand lasted together to give the pad consistent shape and feel with excellent durability. The outside roll features a beveled profile for light weight and puck deflection and solid construction from the bottom ankle break to the top of the thigh rise. Large thigh rise areas feature a square shape that functions to seal the five hole area. The solid firm internal construction helps prevent pucks from slipping through the five hole. Narrow outside panel has a pre-curved design to shape the pad to the natural bend at the knee and ankle areas of the leg, this places the goaltender in a more ergonomically correct position for more power and speed. The leg cradle features a tapered shape that gets progressively wider from the ankle to the top of the pad to provide the goaltender with control and comfort. This also gives the pad quick rotation speed when moving to the ice so the pad squares up and seals to the ice. Wide knee cradle has Velcro and lace adjustment that allows the knee cradle to be moved vertically and horizontally for a perfect custom fit.

- Large thigh rise with square top corners to maximize blocking surface
- Pre curved shape allows for easy break-in
- Solid flat face construction
- Adjustable knee cradle
- Adjustable thigh guard with molded insert for protection
- Solid outside roll with wedged profile shape
- Adjustable knee lifter
- Flex-lam construction for light weight
- Available in sizes 32+1", 33+1", 34+1", 35+1", 36+1", 37+1", 38" and custom sizing

VPG 7900 Velocity Limited Edition

All new for 2011 is the Velocity 7900 goal pad is a hybrid design that provides the feel of a conventional Velocity pad in the lower leg, but with a thinner upper knee and thigh section with a more solid construction with tighter five-hole coverage. Tall thigh rise with standard plus sizing with 1.5" added length and square top corners to maximize blocking surface. Narrow outside panel features a gradual top taper and pre-formed side profile. Movable buckles on the top three straps provide custom adjustment. Knee cradle is adjustable vertically and horizontally for precise positioning and custom fit. Angled knee cradle strap with dual Velcro adjustment strap keeps strap more secure. Large outside leg protector features high density foam inserts over the calf muscle and outer ankle for added protection. The leg cradle is designed to encapsulate the leg and provide control without having to over tighten the main leg straps and features two adjustable Velcro straps to adjust the pad to the desired tension to the leg. Wide leg channel with low friction synthetic leather for fast pad rotation. New wider solid inside leg landing pad at the calf and knee with high density foam inserts provides a solid landing and balance area for correct

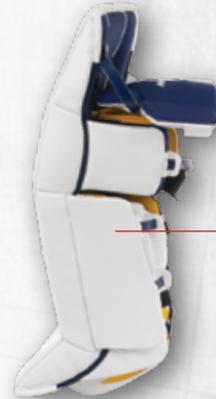

positioning and more control. Internal high density foam boards give the pad added stability.

- Tall thigh rise with plus 1.5" sizing
- Flex-Pac internal stuffing for rebound control and easy break-in
- Stiffer knee and thigh rise area for solid feel
- Pre-shaped upper knee curve
- Adjustable main upper leather straps for custom fit
- Fully adjustable knee cradle
- High density inner side landing pad
- Light weight balanced design
- Adjustable knee lifter pad
- Deep leg cradle to protect the back leg areas
- Solid top outside roll
- Square outside roll profile
- Available in sizes 32+1.5", 33+1.5", 34+1.5", 35+1.5", 36+1.5", 37+1" and custom sizing

Goal Pads

VPG 7480 Velocity Limited Edition

The Velocity 7480 limited edition goal pad features our tall plus 1.5" longer thigh rise area to provide improved five-hole coverage. The Velocity 7480 goal pad is a hybrid design to provide the feel of a conventional Velocity pad in the lower leg, but with a thinner upper knee and thigh section with a more solid construction with tighter five-hole coverage. Tall thigh rise and solid top outside roll with solid inner high density board construction stiffens the top thigh area of the pad for more solid blocking surface. Fully adjustable knee cradle with Velcro and lace adjustment allows the pad to be specifically fit to the goaltender. Special high density molded thigh guard for added protection and extends into the side knee area for greater coverage. The 7480 pad features a wide flat inner edge to provide excellent pad stability while down on the ice and uses a high density foam on the inner edge to prevent hard shots from pushing past the five-hole and to give a tighter seal while down on the ice surface. Wide leg channel aids in pad rotation while keeping the pad under control so the pad can be moved into position faster and quicker and allow more precise positioning for greater net coverage.

- Taller plus 1.5" sizing
- Movable and fully adjustable knee cradle
- Solid top outside roll design
- Flex-Pac internal padding for rebound control
- Molded thigh guard
- Adjustable knee lifter
- Inner edge balance stabilizer with solid flat construction
- New graphics give the pad a larger visual appearance
- Full leg cradle for pad control
- Custom spec construction for higher performance
- Available in sizes
- 32+1.5", 34+1.5", 35+1.5", 36+1.5", 37+1"

VPG 7450 Velocity

The 7450 Velocity 4 series leg pad features a new lighter weight construction and new design features for improved performance. Foam internal core provides lighter weight and adds stability to the pad structure. Wide inside pad edge provides increased pad control and balance while on the ice for faster more controlled movement. Tall plus one sizing with taller length high surface provides superior five-hole coverage. Tapered outer panel design provides lighter weight and gives the pad improved lateral balance for increased pad control and performance. Pro style wider knee cradle allows for faster pad rotation to allow for quicker pad movement while down on the ice, adjustable knee lifters keep the knee elevated from the ice surface to reduce knee impacts and stress when impacting the ice and allows for easier leg extension. The inner edge balance stabilizer ensures proper pad placement while on the ice to give the pad added stability and a tight seal along the ice surface and squares the pad for increased net coverage. Molded pro style thigh guards provide increased flexibility and contour and follow the leg for increased protection. Velocity 4 tribal style graphics give the pad a larger visual appearance.

- Full leg cradle for pad control
- Knee cradle with internal knee lifters for improved leg extension
- Flex-Pac internal stuffing for low rebounds
- Internal multi layered high density foam core
- Tall thigh rise with plus one inch sizing
- Pro style thigh guards
- Lighter weight
- High density outside rolls for more solid puck deflection
- Inner edge balance stabilizer
- Available in sizes 32+1", 34+1", 36+1", 37+1"

VPG 7360 Velocity 4 Intermediate

The 7360 Velocity 4 goal pad is our intermediate size of our pro model 7600. The pad is specifically proportioned for a precise fit and is designed and constructed to match all the features as our pro model to meet the needs of the extremely high caliber young adult goaltender. The design increases performance by allowing for more dynamic and aggressive movement while still maintaining full body control and balance. The inner knee area is identical to our pro model to provide the added protection. Pad width is optimized at 10.75 inches to allow for maximum blocking surface without causing unneeded bulk or weight. Dual knee strapping system allows for wider range of adjustment with a full pro style knee cradle and adjustment straps. The wide leg channel provides excellent pad rotation for quick response and improved pad positioning to amplify net coverage.

- Specifically designed and sized for optimal performance
- Intermediate width of 10.75 inches
- Velocity 4 tribal graphics
- Flex-Pac internal padding for rebound control
- Pro thigh board for maximum protection
- High density outer roll foams
- Full pro knee cradle and knee lifters
- Inner edge balance stabilizer
- Available in sizes 29+1", 30+1", 31+1"

Velocity

VPG 7480i Velocity Intermediate

The Velocity 7480i is our new limited edition intermediate sized goal pad and features taller plus 1.5" high rise. The 7480i is a hybrid design to provide the feel of a conventional Velocity pad in the lower leg, but with a thinner upper knee and thigh section with a more solid construction with tighter five-hole coverage. Solid top outside roll and internal high density foams provide for a more solid blocking surface. Fully adjustable knee cradle with Velcro and lace attachment allows for the knee cradle to be moved and customized for a precise fit. The 7480i pad features a wide flat inner edge to provide excellent pad stability while down on the ice and uses a high density foam on the inner edge to prevent hard shots from pushing past the five-hole and gives a tighter seal while down on the ice surface. Wide leg channel aids in pad rotation and allows for complete pad control for quick movements.

- Tall plus 1.5" high rise
- Solid top outside roll
- Adjustable knee cradle
- Flex-Pac internal padding for quick break-in
- Molded thigh guard
- Inner edge balance stabilizer
- Graphics provide a large visual appearance
- Full leg cradle
- Custom Spec construction for higher performance

Goal Pads

VPG 7250 Velocity 4 Junior

The 7250 goal pad features an extreme light weight design with proportional balanced construction to give added pad control along with faster more controlled leg movement. The 7250 pad features extended plus one sizing with taller thigh area to increase five-hole coverage. Wider profile inner leg five-hole rolls give a flat inner edge that gives the pad great stability while down on the ice. This also provides superior body balance to allow for quicker movement. Deep knee cradle design gives added pad control and secures the knee properly for added comfort, protection and pad control. All new Velocity 4 graphics aids the goaltender by making the pads visually appear larger.

- Full knee and leg cradle provide excellent pad control
- Pro style thigh guard for increased performance
- Inner edge balance stabilizer
- High density outside roll for firmer pad edge
- Wide leg channel for quick pad rotation
- All stitched graphics
- Durable Clarino micro fiber exterior
- Flex-Pac internal stuffing allows for less rebounds and quick break-in

VPG 9200 Vision

All new for 2011 the 9200 Vision goal pad is our junior sized goal pad designed for the goaltender that prefers a pad with a more ridged knee and thigh rise and typically uses a blocking style butterfly save selection. The 9200 pad design features a complete solid firmer flat front blocking surface with a single horizontal flex seam at the ankle area. The pad interior is constructed with our Flex-lam padding system that consists of several layers of varying foam densities that are hand lasted together to give the pad consistent shape and feel with excellent durability. Tall thigh rise area features a square shape that functions to seal the five-hole area. The solid firm internal construction helps prevent pucks from slipping through the five-hole. Narrow outside panel has a pre-curved design to shape the pad to the natural bend at the knee and ankle areas of the leg. This places the goaltender in a more ergonomically correct position for more power and speed. The leg cradle features a tapered shape that gets progressively wider from the ankle to the top of the pad to provide the goaltender with control and comfort.

- Large thigh rise with square top corners to maximize blocking surface
- Pre-curved shape allows for easy break-in
- Solid flat face construction
- Adjustable knee cradle
- Adjustable thigh guard with molded insert for protection

Goal Pads

VPG 7150 Velocity 4

The 7150 leg pad features our Velocity design and styling to give a higher level of performance for the smaller junior sized goaltender. Very light weight gives smaller goaltenders a better strength to equipment weight ratio for quicker movement and the design incorporates added flexibility for easy break-in. Full pro style outside rolls help add to the blocking surface to maximize net coverage. Full knee and leg cradle provide pad control and allow pad to rotate while going down to the ice surface to give five-hole coverage. Molded thigh protector designed to follow the leg for increased protection and to help fill in gaps in the five-hole area coverage.

- Full Velocity 4 graphics and styling
- Adjustable knee cradle with elastic straps
- Full leg cradle for pad control
- Easy break-in design
- Light weight
- Full pro style outside roll construction
- Full inner leg protection
- Available in sizes 22+1", 24+1", 26+1"

Adjustable spine protector

VP 7600 Velocity 4

The 7600 model Velocity 4 arm and chest protector for 2011 follows in the tradition of innovation and quality with many new design features to achieve the highest level of performance and protection possible. Light weight and balanced design provides superior fit and speeds upper body movements and flexibility. Larger shoulder floaters are constructed with superior protection and increased rigidity for greater blocking surface and protection. The chest pad is constructed with three layers to allow complete flexibility and increased protection by creating superior protection with impact reduction. Lower chest pad belly flap allows the unit to stay positioned while in a deep crouched position. The shoulder and back pad adjustment system allows the unit to be more balanced with even weight distribution over the shoulders and allows for a custom fit. Large shoulder caps with lower extensions fill in gaps around the arm pit area. Adjustable side chest pad wings give adjustable coverage in the upper side rib cage. Anatomically designed arms prevent padding from shifting away from critical areas of the arm and wider bicep arm caps for greater coverage and protection. Large high density reinforced main arm floaters provide a firm blocking surface and aid in puck deflection.

- Pro spec construction for added protection and durability
- Multi section chest protector with flex panel on lower belly area
- Lighter weight for quicker movement
- Tapered forearm caps for improved glove interaction
- Four point adjustable elbow pads
- Adjustable wrist straps
- Larger shoulder floaters with solid high density foam inserts
- Anatomically designed for precise fit
- Side chest pad extensions for wrap around protection
- Military spec buckles for added durability
- Wider design in shoulder area to increase blocking surface and add protection
- Available in sizes XS, SM, MED, LG, XLG

Black/Silver

Arm and Chest

VP 9500 Vision

The new VP 9500 arm and chest protector features full Pro spec construction to achieve an elevated level of performance and protection. The unit is designed to work with the natural movements of the body utilizing Bio-Flex engineering that adds flexibility but keeps the protection focused in the critical areas of impact. Larger shoulder floaters increase net coverage and increase protection by 30% utilizing new multi layered HD inserts that strengthen the surface area for increased blocking and deflecting ability. Main arm floaters feature a no gap design that adds protection from all angles and creates a more solid blocking surface. The top portion of the floater is angled to eliminate gaps at the upper arm and increases surface area. Wide bicep padding envelops the outer area of the arm for more complete coverage and features 30% thicker foam padding for greater

impact resistance. Multi-piece chest protector allows the unit to flex and follow lower body movements so the unit stays in place while in a crouched position. Large sternum protector creates a larger surface area for improved shock dispersal. New inner blocks in the base of the chest pad hold the unit more stable in the chest region for improved impact resistance and creates a firmer surface to support the shoulder floaters for added rigidity for puck blocking. Unique design and construction supports the weight of the unit on the shoulders and functions to balance the weight of the unit over the body core for a lighter feel and precise custom fit. The arms are constructed with an aero spacer dimensional mesh material for ventilation and extreme flexibility. This also provides added cooling and faster than ever break-in.

- Enhanced performance with Pro spec construction
- Light weight and faster break-in
- Large shoulder floaters with HD inserts for solid blocking surface
- Main arm floaters with increased coverage
- Light weight aero spacer mesh arms for flexibility
- Multi-flex chest pad design
- Four point adjustable elbow pads
- Adjustable wrist straps
- Tapered forearm padding
- High density spine protector
- Military spec two color buckles for durability
- Cushioned chest pad back for comfort and added shock dispersal
- Available in two colors
- Available in sizes XS, SM, MED, LG, XLG

VP 7450 Velocity 4

The Velocity 7450 arm and chest protector design features anatomically designed chest protector with angled blocks and a lower belly flex section to align all the flex points of the chest pad to the natural movements of the body. Large pro style shoulder floaters give added net coverage and increased protection. Arm padding features true pro construction with wider bicep cap protection and new more protective main arm floaters with high density internal construction. Full arm straps and four point adjustable elbow pads allow for precise fit to optimize performance. Large reinforced sternum plate with increased thickness adds extra protection in the critical chest area. Back padding features multiple adjustments with high density spine protection and military spec side release buckles for added durability.

- Pro style molded arm caps
- Adjustable wrist strap
- Molded tapered forearm cap
- High density extra thick shoulder floaters
- Lower belly flex pad
- Large plastic reinforced chest sternum plate
- Large main arm floaters
- Extended shoulder cap design
- Available in sizes XS, SM, MED, LG, XLG

Velocity

VP 9400 Vision

The new Vision 9400 arm and chest protector is designed to work with the natural movements of the body to optimize the flexibility while providing superior protection. Large shoulder floaters and sternum chest plate create more blocking surface giving greater net coverage and increase protection. The arm design provides added protection and makes the arms more stable to more effectively hold the padding into position for improved protection and increased effectiveness blocking pucks. The chest pad features lower flex panels to allow for a deep crouched position and aid in flexibility. Internal lining of the arms and chest prevents water build up to prevent weight gain. Large shoulder caps and shoulder cap extensions add shoulder width and protection. Tapered fore arm padding with wrist straps give added stability and allows the protection to taper into the gloves for overlapping protection.

- Fully molded arm and shoulder caps to maximize protection
- Large arm floaters with High density construction
- Adjustable wrist and arm straps
- Four point adjustable elbow pads for precise fit
- Large shoulder floaters and sternum plate
- Nylon internal lining for water resistance
- Extra flex design chest pad
- Adjustable back padding
- Side chest pad extensions
- Available in sizes SM, MED, LG, XLG

VISION

Arm and Chest

VP 7360 Velocity 4 Intermediate

The 7360 Velocity 4 arm and chest protector features special intermediate sizing that is enhanced in design to fit the young adult goaltender that needs maximum protection and performance but does not have the body size or weight to fit in the full adult models. The protection and material selection are scaled from our pro models and optimized precisely to achieve the perfect blend of protection and mobility. New large shoulder floaters ensure maximum net coverage with larger surface area and add protection. Wide arm floaters feature the same thickness and materials as our pro models to maximize blocking strength and are carefully sized to optimize performance. Full adjustable back and shoulder adjustment allows for precise adjustment and functions to better support the weight and balance of the unit to the upper body so all the padding remains in proper orientation for maximum performance.

- Large shoulder floaters with Pro High density construction
- Flex pad on lower chest pad
- Intermediate sizing for proper fitting
- Full pro thickness over chest area
- Large mid arm floaters
- Adjustable wrist straps and arm straps for precise fit
- Available in sizes MED, LG, XLG, and XXLG

VP 7250 Velocity Junior

The 7250 junior arm and chest protector features our anatomically designed body pad with angled protective blocks and lower belly flap all arranged to align the flex points of the chest pad to match body movement. Large shoulder floaters with high density foam construction increase shoulder protection and add blocking surface. The arm padding is molded and tapered at the forearm for proper fitting and tapers into the glove cuffs. Adjustable arm and wrist straps allow for a large adjustment range for precise fitting. Nylon lined interior of the chest and arms prevents water weight gain.

- Light weight design and construction
- Full back spine protector
- Large shoulder protection
- Adjustable elbow pads
- Flex pad at belly
- Anatomically designed chest pad with cushion padding
- Molded bicep, forearm caps and shoulder caps
- Available in sizes SM, MED, LG, and XLG

VP 9200 Vision Junior

The new VP 9200 junior arm and chest protector features a flexible design to provide easy break-in and to optimize range of motion. The shoulder floaters provide extra protection and a larger blocking surface. Nylon lining on all interior surfaces provides added comfort and prevents water build up and facilitates quick drying. The chest pad features lower flex panels to allow for a deep crouched position and the design helps keep the chest pad stationary to ensure maximum coverage. Large molded shoulder and arm caps provide added impact resistance and a large chest sternum plate further increases protection.

- Large shoulder floaters
- Four point adjustable elbow pads
- Nylon water resistant internal lining
- Adjustable wrist and arm straps for precise fit
- Adjustable back spine protector
- Cushion padding on internal chest area
- Large sternum plate with plastic reinforcement
- Molded shoulder and arm caps

VP 7100 Velocity Youth

The 7100 youth sized Velocity arm and chest protector unit features large shoulder area to protect the vulnerable collar bone and shoulder area. Large plastic reinforced sternum plate adds protection in critical impact areas. Fully molded plastic components in the arms, shoulders and elbows along with a padded back spine protector provide added impact resistance. Wide cut easy-flex arms with adjustable wrist strap for a secure fit. Nylon exterior covering material for added durability and limits water absorption to keep unit light weight.

- Pre-shaped design for comfort and easy-break-in
- Wrap around style chest pad to increase coverage
- Cushioned inner chest pad lining
- Back spine padding
- Quick dry internal mesh lining
- Available in Youth sizes SM/MED and MED/LG

Catch Gloves

ICEBERG

PULSE

T 7600 Velocity 4

The T 7600 Velocity 4 catch glove is designed with a wide palm area to allow for the maximum amount of catch surface. This dimensionally deeper shape creates more volume in the palm and pocket for improved catching and puck retention for maximum performance. The top thumb and cuff area features a molded in deflecting ramp that is engineered to limit pucks from skipping over the top edge of the glove. The internal hand features mesh finger construction to aid in quicker drying and to reduce heat build up in the hand. The back of the fingers features an adjustable retention strap across the lower knuckle area to provide added hand control. This provides a precise fit and secures the hand to the glove and limits twisting from high impact shots near the glove perimeter. Internal thumb tunnel design with adjustable loop that allows the thumb angle tightness to be adjusted, this provides more closing power for quicker reaction. Wide back cuff opening allows for added wrist room and facilitates improved hand position to help keep the glove more square to the shooter to increase net coverage. The back hand padding features three piece construction that allows flexibility and incorporates HD foam over the back of the fingers for slash protection and includes a finger tip deflecting ramp to further protect the finger tip area. The back pad can be fully opened for easy access to the adjustment straps and to facilitate quick drying. Large dual bar T-web with reinforced top bar provides increased pocket depth and functions to reduce puck spin for puck retention.

- Velocity 4 graphics
- Side thumb and cuff deflecting ramp
- Three piece back hand protection
- Pro spec construction for added protection and durability
- Heat moldable for custom fit
- Internal hand control straps
- Full flex seams in palm and internal padding for quick precise break-in
- Full access opening back hand protection
- Thumb tunnel design for more closing power
- No binding cuff for more effective blocking area
- Reinforced perimeter edge and added palm protection

THESE AND MANY OTHER COLORS AVAILABLE

T 7680 Velocity 4

The Velocity 7680 catch glove is a new special edition version of our standard 7600 catch glove with additional features. Solid molded cuff and thumb are integrated together to create a more solid frontal impact area to provide additional protection and increased rigidity to the cuff area. The catching surface shape and closure of the glove is identical to the 7600 so it maintains the exact same comfortable high performance feel.

- Solid one piece cuff and thumb construction
- More solid molded components for added rigidity in the wrist area
- Full Pro spec construction

T 9500 Vision

The T 9500 catch glove features an advanced anatomical design to give superior control and balance. The glove features an internal Neoprene glove with adjustment strapping that provides for custom hand adjustment and alignment that results in superior control and makes the glove feel more of a natural extension to the hand for more precise and quicker movement. Thumb tunnel design provides additional closing power along with added protection to the thumb. Extra wide glove face design allows the glove to be opened wider to achieve greater net coverage and a large T-web pocket with skate lace webbing for puck control and retention. Internal Pro specification padding increases protection and provides added perimeter stability with added reinforcing layer. Select materials allow the glove to be custom heat fitted to the individuals hand for the ultimate fit and rapid break-in. Wider notch heel area of the glove allows added room for stick placement while stick handling or shooting. Two piece back hand padding provides added glove flexibility and provides high density slash protection over the back of the fingers along with a finger tip deflector bar to provide even further more complete finger protection. Wide cuff opening, added wrist mobility and flared cuff box for arm padding to over lay into the cuff area without interference.

- Neoprene inner glove for added control
- Molded high density cuff box construction
- Pro spec construction
- No binding cuff for more effective blocking surface
- Large width thumb tunnel for control
- Select material for heat forming
- Dual hand straps for adjustment
- Reinforced perimeter edge for stiffness
- Large T-web angled to provide complete puck coverage on the ice
- Large depth T-web for puck retention
- Finger tip deflector ramp

Solid one-piece
thumb and cuff

T 9580 Vision

The new Vision T 9580 model catch glove is a new special edition version of our standard 9500 catch glove with new additional features. New solid cuff and thumb are integrated together to create a more solid frontal impact area to provide additional protection and increase rigidity to the cuff area. The glove shape function and closure all keep the same optimal performance.

- New one piece molded cuff and thumb protection
- More solid components for added ridged wrist area
- Full Pro spec construction
- True Vision performance and closure

Catch Gloves

T 7900 Velocity Limited Edition

The New T 7900 limited edition Velocity catch glove is designed with a deep contoured catching surface with an extra wide palm area to give more depth and surface area to the glove. New offset T-web with skate lace provides a larger pocket area along with added reinforcement in the T-web top for extra support along the top perimeter edge.

Top cuff and thumb feature a molded deflecting ramp to limit puck skip over and provide added stability to the top edge of the glove. New internal hand design gives a more vertical thumb angle and hand position. Dual adjustable straps over the fingers and back hand provide added security and custom adjustment along with new anchored wrist strap for an even tighter adjustment around the wrist. The palm area features an internal section insert that is seamed for easy precise break-in and features an extra layer of padding in the palm to add protection and reduce rebounding. Wide cuff opening provides added room for increased wrist movement and features an adjustable strap that allows the back cuff to be adjusted to the goaltenders preference.

Velocity

Three piece back hand protection has HD foams and a deflector ramp over the fingers to deflect impacts away from the ends of the finger tips.

- Extra padding in palm area
- Molded cuff and thumb protection
- Heat moldable for custom fit
- Pre-formed shape with flex seams on internal padding
- Wide surface area to maximize coverage
- Internal hand control straps
- Limited edition graphics
- Light weight and perimeter balanced
- Mid curve front cuff surface enlarges blocking surface
- Heat moldable for custom fit
- Offset T-web with reinforced top bar

THESE AND MANY OTHER COLORS AVAILABLE

T 7480 Velocity Limited Edition

The new T 7480 limited edition catch glove features a design with a deep contoured catching surface with an extra wide palm area to give more depth and surface area to the glove for added net coverage. New style off set T-web provides a larger pocket area and the skate lace webbing functions to reduce puck spin for better puck retention. The T-web top bar is reinforced along the top perimeter edge to provide added strength and rigidity to the top edge of the glove. New internal hand design gives a more vertical thumb angle and hand position. Dual adjustable straps over the back fingers and the back of the hand allow the glove to be tightened on the hand for added security and feel. New style wrist strap has a solid anchor point to allow for an even tighter wrist strap adjustment. The palm area of the glove features an extra layer of internal padding to add protection and reduce rebounding. Wide cuff opening design allows for added wrist movement. The top thumb and cuff feature a molded deflecting ramp to limit puck skip over on hard shots. The back hand protection includes high density foams over the back fingers and a finger tip deflecting ramp to protect the finger tips.

- Added padding in the palm area
- Molded top cuff and thumb
- Heat moldable for custom fit
- Wide open surface area
- Offset T-web design
- Skate lace pocket webbing
- Internal hand control straps
- Front molded cuff curve
- Pre-formed shape with flex seams
- Light weight with perimeter balance

THESE STANDARD COLORS AVAILABLE

T 7450 Velocity

The T 7450 Velocity catch glove features an innovative design with a large catching surface. The deeper shape creates more volume in the palm and pocket for improved catching and puck retention. The internal hand features mesh finger construction to aid in quicker drying and to reduce heat build up in the hand. An adjustable knuckle strap allows for a custom fit and added control. The internal back hand retention system also features an adjustable strap across the back of the hand. It secures the glove to the hand for greater control to limit glove twist when impacted at edges with hard shots. Our unique new thumb tunnel feature integrates added control into the thumb to give greater closing power and added glove control. Wide flared cuff allows for added wrist room and facilitates better hand positioning to keep the glove more square to the shooter to increase net coverage. The back hand features three piece construction with HD foam over the back of the fingers for slash protection. It has a finger tip deflecting ramp to further protect the finger tips from shots. The back pad can also be fully opened to facilitate quicker drying. Dual bar T-web limits puck spin for improved puck retention in the pocket.

- Unique thumb tunnel for added glove control
- Large catching surface with greater volume
- Full access opening back hand padding for protection that can be opened for easy drying
- Dual back hand control straps
- Heat moldable for custom fit
- Full flex seams in palm and internal padding for quick precise break-in
- No binding cuff design for added blocking area
- Flared molded front cuff for added puck deflecting and added wrist mobility

Catch Gloves

T9400 Vision

The T 9400 Vision catch glove features an anatomical design to give superior control and balance. Full Neoprene internal hand with adjustment strap that provides for custom hand adjustment and alignment for superior glove control. Thumb tunnel design secures the thumb and transfers more power from the hand into the glove for quicker closing. The T-web pocket features skate lace pocket to reduce puck spin this provides for better puck retention and control. Select materials allow the glove to be custom heat molded to the hand for precise fit. Internal finger stalls are constructed of vented mesh materials for comfort and fast drying. Exterior back hand padding can be fully opened to access internal hand adjustment and allows the glove to be opened up for quicker drying. Notched lower thumb area allows for stick placement while shooting or stick handling for added control.

- Neoprene inner hand for added control
- Molded front deflecting cuff
- Large open wrist area of cuff
- Custom heat moldable
- Two piece external hand protection with finger tip guard

T 7360 Velocity 4 Intermediate

The T 7360 Velocity 4 catch glove is our intermediate sized version of our pro model. The T 7360 features an innovative design with a large catching surface with a dimensionally deeper shape to create more volume in the palm and pocket for improved catching and puck retention. The top thumb area and cuff are aligned and feature a molded in deflecting ramp engineered to limit pucks from skipping over the top edge of the glove. Internal hand features finger stalls constructed of a dimensional mesh material for added ventilation and quick drying and an internal hand strap across the lower knuckle area provides additional adjustment and added hand control. Thumb tunnel design provides added thumb support and allows the goaltender to adjust internal thumb position and transfers more power and control into the glove for quicker closing. Wide flared cuff allows for added wrist room and facilitates better hand positioning to keep the glove more square to the shooter to increase effective net coverage.

The back hand padding features three piece construction to add flexibility to the glove and provides seamless protection over the back area of the hand for slash protection and has an integral finger tip deflecting bar to further increase protection. Dual bar T-web limits puck spin for good puck retention and reinforced top T-web bar is positioned to give full even coverage when covering pucks on the ice.

- Large catch surface
- Unique sizing for goaltenders that need full adult protection but have a smaller hand
- Dual back hand control straps
- Flared cuff with no binding for more effective blocking
- Reinforced finger perimeter and added palm protection
- Thumb tunnel design
- Heat moldable for custom fit
- Straight top edge with deflecting ramp

Velocity

T 7480i Velocity Intermediate

The New T 7480i intermediate limited edition Velocity catch glove is designed with a deep contoured catching surface with an extra wide palm area to give more depth and surface area to the glove. New offset T-web with skate lace provides a larger pocket area along with added reinforcement in the T-web top for extra support along the top perimeter edge. Top cuff and thumb feature a molded deflecting ramp to limit puck skip over and provide added stability to the top edge of the glove. New internal hand design gives a more vertical thumb angle and hand position. Dual adjustable straps over the fingers and back hand provide added security and custom adjustment along with new anchored wrist strap for an even tighter adjustment around the wrist. Wide cuff opening provides added room for increased wrist movement and features an adjustable strap that allows the back cuff to be adjusted to the goaltenders preference. Three piece back hand protection has HD foams and a deflector ramp over the fingers to deflect impacts away from the ends of the finger tips.

- Extra padding in palm area
- Molded cuff and thumb protection
- Heat moldable for custom fit
- Pre-formed shape with flex seams on internal padding
- Wide surface area to maximize coverage

B 7600 Velocity 4

The Velocity 4 blocker has been optimized for lighter weight. Every component has been carefully engineered to achieve precise balance to provide for enhanced glove control and feel. The front board section is designed with the board having a slight forward tilt this helps to square the blocking surface more to the shooter to give greater net coverage. The board edges are beveled to reduce perimeter weight. This not only reduces overall weight but functions to bring the center of balance directly over the back of the hand giving even greater glove control. The bottom edge bevel and design allows the board to fully contact the ice surface while in a paddle down stick position and prevent excess wear. Large side hand protection features high density foam protection and plastic reinforcement for a solid protection and blocking surface, the side wrist area is also further protected by an air cushion pad to reduce impacts to the side of the hand. Ergonomically designed palm features each finger is designed with its own unique pre curved positioned to allow for easy stick grip and to keep a smoother surface to provide a more precise stick control, side vented palm gussets allow for air circulation for heat dispersal and ease of flexibility. Pro design finger protectors provides multi layered padding over the side index finger for superior impact resistance with high density foam and plastic inserts. Full Pro spec design and construction adds protection and durability.

- Pro finger protection for superior performance
- Reinforced side hand protection
- Anatomically designed palm with gusset ventilation
- Tapered bottom board
- Articulating cuff for added wrist movement and flex
- Air cushion back hand
- Adjustable wrist strap
- Light weight balanced design with beveled edges
- Tilted forward board design for enhanced net coverage

Blockers

B 9500 Vision

The new B 9500 Vision pro blocker is an all new design that incorporates unique construction with the side shield integral to the front blocking surface. This gives the glove increased rigidity and stiffens the perimeter edge for superior blocking and increases the protection to the inside edge of the hand. Special high density foam board provides light weight and is reinforced with a polyethylene overlay for added durability. Pro design finger protectors cover the index finger when extended over the paddle of the stick for increased coverage. The side shield features a narrow design slot for the paddle of the stick and closes gaps to prevent pucks from sliding up the paddle of the goal stick and impacting the hand. Contoured palm is pre curved to keep a smooth surface when gripping the stick for precise feel and stick control. Wide cuff opening allows for maximum wrist movements.

- High density internal blocking board for light weight
- Tapered board end for less ice interference
- Full pro-spec construction
- Reduced perimeter weight for balance and control
- Adjustable wrist strap
- Pro design finger protection
- Ergonomically designed palm with mesh gusset construction
- No binding design for more effective blocking surface
- Large top flare
- Large side shield

VISION

B 7900 Velocity Limited Edition

The new B 7900 limited edition blocker features a no binding front construction to enhance the blocking area with a firmer outer edge perimeter. The blocking board is designed with a tilt forward to provide an enhanced angle to provide more net coverage. The board features beveled edges to reduce weight around the perimeter and brings the center of balance directly over the back of the hand this also gives the goaltender added control and limits board twisting when pucks impact the outer edges improving blocking performance. The bottom board bevel allows for a quick paddle down movement to the ice and creates a tight seal allowing no gaps for complete protection. Large side hand shield with high density foam protection and plastic reinforcement for a solid protection and blocking surface. The side wrist area is further protected by an air cushion pad to reduce impact forces on the side of the hand and to keep the blocking surface square. Ergonomically designed palm is designed with each finger having its own unique curve for superior stick grip and control. The palm features vented side gusset construction for heat dispersal and quick drying and a padded palm area to reduced vibrations from stick impacts. The blocker hand is positioned one inch higher in the board this extends the reach of the board to

effectively increase net coverage. Pro design finger protection provides multi layered padding over the side index finger for superior impact resistance. This design provides complete side coverage with no gaps for more complete coverage and protection. Full Pro spec design and construction gives enhanced protection and adds durability.

- Pro design finger protection
- Pro Spec construction
- Tilt forward board design
- Cushion padded back hand
- Adjustable wrist strap
- Light weight perimeter balanced design
- Higher hand position
- Reinforced side hand shield
- Articulating cuff for enhanced wrist movement
- Tapered bottom board

B 7450 Velocity

The Velocity 7450 blocker has been optimized to present a larger blocking surface by keeping the board positioned more square to the puck position on the ice. This is done by rotating the hand position at the wrist area to tilt the board forward at the wrist attachment point. This gives the glove a better blocking angle to the puck with our face forward design. Beveled board edges on all sides reduces weight and moves the center of balance directly over the back of the hand for improved glove control and balance. The bottom taper improves the glove positioning during paddle down moves to the ice. Large side hand protection with puck deflector rail provides added net coverage and protection. Articulating finger protection and large side index finger protector gives excellent stick grip for added control and protection. Reinforced palm with vented side gussets to dissipate heat and facilitate quicker drying.

- Large side plate with deflector rail
- Tilted face forward board design for added blocking ability
- Light weight balanced design with beveled edges to reduce weight
- Reinforced thumb protection
- Air cushion protection on back of hand

Goal Masks

VM 9500

The VM 9500 goal mask features a complete composite outer shell constructed with Carbon and Aramid fibers for lighter weight and strength. The shell is high pressure molded and infused with epoxy resin to ensure complete saturation of the composite fibers and heat cured to provide durability and a smooth finish. The shell shape is carefully designed and contoured to move impact loads away from the frontal impact areas. Flared chin allows the mask to be tucked in the chest area to better protect the neck area. Extra wide facial opening provides enhanced vertical and peripheral vision. The cage design is optimized to provide true vision sight lines and positions the cage bars to achieve for optimum clarity and features stainless steel construction for durability and low glare. Internal padding of lightweight pro VN foam has full coverage and no gaps for continuous protection, padding is completely removable to allow for cleaning and maintenance.

- Available in standard colors: Black, White, Navy, Red
- Available in Adult size: Medium and Large

VM 9500 Cert. Cat-eye

The VM 9500 Cat-eye model features the same design and construction as our VM 9500 but with the certified Cat eye styled cage.

VM 9500 PC

The VM 9500PC is the same design and features as our VM 9500 but features a non certified large eye opening Pro cage.

Non certified mask not available in all areas due to government regulations.

VM 7700

The 7700 goal mask is engineered to provide increased performance with greater visibility and sight lines. The shell shape has been carefully contoured and molded to reduced flat spots in the design to reduce impacts in critical areas and provide lighter weight and higher strength. The flared lower chin provides added rigidity and allows the goaltender to close off the area between the neck and chest for greater protection coverage. Full inner shell padding with no gaps in impact areas gives complete coverage and meets all new certification rules. Dual density vinyl nitrile VN padding provides exceptional protection, comfort and fit. The cage design has been optimized to provide true vision sight lines and positions the cage bars to achieve maximum forward and peripheral vision. Cages are all constructed from high grade stainless steel with a low luster finish to reduce glare and blend into the ice surface to increase visibility. The stainless steel will not rust and provides added durability. All attachment hardware is manufactured in stainless steel for strength and durability to increase longevity. Full skull plate harness with heavy duty elastic straps and buckles provides complete adjustment. The chin cup features a quick change Velcro adjustment to allow the goaltender more options on fitting. Vent holes are positioned to facilitate rapid air ventilation and heat dispersal for cooler play.

- Pro style shape for enhanced fit
- Dual density internal lining
- Light weight
- Stainless steel cage and attachment hardware
- Pro style adjustable harness.
- Narrow profile chin area
- Adjustable chin cup and low profile chin strap
- Chin cup with anti bacterial treatment
- Replaceable sweat band
- Mask comes with padded carry bag
- Standard colors of Black, Navy, Red and White
- Graphic decal and paint options available
- Available with straight bar or certified cat eye cage style
- Fully HECC, CSA and CE certified

Goal Masks

VM 7500

The VM 7500 goal mask is designed and engineered to create optimal visibility. The recessed cage area moves the cage closer to the eyes which improves vision and gives wider sight lines. Anatomically designed for optimal fit and performance with raised mold lines that reduces flat spots for superior puck deflection to lessen impacts. High impact shell is constructed in special high strength Lexan material that is custom engineered for greater impact resistance. The shell is engineered with precisely located ridge lines that add strength and reduce shell flex under high impacts. The jaw area is profiled with a flared lower short chin to give superior downward visibility and allows the mask to be fitted closer to the face for improved visibility. The chin design allows the mask to be tucked in tight to the chest to provide more protection and allows for added adjustment to the chin cup for a more custom fit. Large air vent holes and face opening are designed to provide maximum ventilation to reduce heat build up. The cage is constructed entirely of low luster stainless steel for added durability and reduced glare for optimal visibility. High density pro style vinyl nitrile foam liner provides durability and is low water absorbing to provide light weight and comfort.

- Available in standard colors: White, Black, Red, Navy
- Adult sizes: SM, STD, XLG and Junior

VM 7400

The VM 7400 goal mask is designed and engineered to create optimal visibility with a recessed cage area that improves peripheral vision and gives wider sight lines. Anatomically designed for optimal fit and performance with raised mold lines that reduce flat spots for superior puck deflection to lessen impacts. High impact shell constructed with a specially engineered high strength injected Lexan material is custom engineered for greater impact resistance. The shell is engineered with precisely located ridge lines that add strength and reduce shell flex under high impacts. The design provides maximum downward visibility and the flare at the bottom of the chin allows the mask to be tucked in tighter to the chest for added coverage. Air vent holes and face opening are designed to provide maximum ventilation to reduce heat build up. The cage is constructed from high tensile carbon steel and features a silver powder coated surface for added durability.

- Available in Black or White
- Sizes: Adult STD, Junior
- Fully CSA, HECC, and CE certified

Brian Boucher

Goal Pants

P 7600 Velocity 4

The Velocity 4 goal pant is designed to achieve a maximum amount of net coverage and still provide excellent flexibility and ease of movement. The 7600 goal pant uses new molded high density hips and thigh pads to reduce weight and increase protection. The design and internal molded components improve the pant balance and fit for enhanced performance. Internal thigh cradle design has been designed to provide thigh pad stability and limits thigh pad twisting for greater puck stopping and deflecting. Large five-hole rolls with internal support padding give quick rapid closure to reduce any openings in the five-hole area between the thigh guards. Full length stretch crotch area and inner thigh area provide increased flexibility and ventilation. Large side groin pads square up the frontal area of the pant and add protection. Rear leg split in the shell keeps the thigh pads properly positioned while going down so the thigh pads achieve greater coverage above the knee area. New orange Hydro quick mesh internal lining provides light weight, comfort, durability and faster drying. Constructed with high tenacity nylon exterior for water resistance the nylon surface allows the pant to move along the ice without grabbing to allow for quicker movement. Front area features an internal belly pad for added protection and a laced frontal area to provide adjustment. Wide profile design and contoured waistband provides added comfort and allows the chest pad to be worn inside or outside the pant.

- Thigh cradle technology keeps thigh pad square for maximum net coverage
- Lace up frontal area for adjustment
- Adjustable full diameter belt
- Rear leg split on pant shell
- Front side groin pads to square up blocking area
- Inner leg and crotch stretch for added flexibility
- Available in sizes: SM (36-38), MED (40-42), LG (44-46), XLG (48-50), XXLG (52-54)

Note: add 8-10 inches to actual waist size then match to appropriate pant size.

Velocity

P 9500 Vision

The new Vision 9500 goal pant has a large diameter waist for a loose fit, large thigh guards with a slight curve give increased protection and maximize net coverage. High density foam blocks on the inner leg help close off the five-hole area and add extra protection. Wide front profile features side groin extensions with HD inserts to maximize flexibility while increasing protection. Large molded hip plastic and extended tailbone padding for added protection. Rear leg splits on the shell prevents the pant from being displaced while going down to the ice. This optimizes the thigh guard placement for maximum five-hole coverage and protection.

- Hydro quick internal lining for fast drying
- Large HD side groin protection
- Adjustable belt
- Inner thigh five-hole padding
- Larger tailbone protection
- Contoured front waist and belly pad
- Lace up front for adjustment
- Full stretch crotch and inner leg panels for flexibility
- Available in sizes: SM (36-38), MED (40-42), LG (44-46), XLG (48-50), XXLG (52-54)

Note: add 8-10 inches to actual waist size then match to appropriate pant size.

P 7450 Velocity

The 7450 Velocity goal pant is constructed and tailored specifically to work with the movements of a goaltender to give optimum performance and comfort. Wide thigh guards feature a slight curve and are designed to give maximum blocking surface and fill in the five-hole area when going down to the ice surface. Sport mesh lining for low water absorption and quick drying. Large side abdominal floating pads extend down to the side groin area for added protection and give the pant flexibility while in a crouched position. Front contoured waist gives a lower front profile for chest pad fit and easier bending while in a crouched position.

- Inner thigh HD blocks with internal support padding
- Adjustable belt with double front pull adjustment
- Low profile thigh guards fit well under tall leg pads
- Extended tailbone protection
- Full stretch crotch and inner leg panels for flexibility
- Available in sizes XS (32-34), SM (36-38), MED (40-42), LG (44-46), XLG (48-50), XXLG (52-54)

Note: add 8-10 inches to actual waist size then match to appropriate pant size.

VISION

P 9400 Vision

The 9400 VISION goal pant is designed with a wide profile cut for added room and comfort in the waist and leg areas to increase flexibility. Wide thigh guards with internal high density five-hole blocks and side slash guards with cushion padding for added protection. Quick dry internal mesh lining provides for added comfort and air flow. Side groin internal padding with flex blocks and High density padding in the shell increase protection level and square the frontal area of the pant. Rear leg splits allow the thigh pads to remain properly positioned when down on the ice for more complete leg coverage. Larger tailbone and molded hip protection with thicker padding increase protection. The 9400 goal pant is designed with a softer, looser fit with a shorter thigh guard length than our other adult models.

- Larger and thicker tailbone protection
- Molded hips and kidney protection
- Cool fit mesh lining
- External padded belt
- Lace up front for added adjustment
- Flex pad on back spine
- Inside thigh protection
- Available in sizes: SM (36-38), MED (40-42), LG (44-46), XLG (48-50)

Note: add 8-10 inches to actual waist size then match to appropriate pant size.

Goal Pants

Velocity

P 7360 Velocity Intermediate

The 7360 Velocity intermediate goal pant is designed and optimized for performance and protection. Large five-hole blocks with internal support padding provide for added protection and faster more solid closing of the five-hole area. Rear leg splits in the pant shell help keep the thigh guards positioned properly while going down to the ice for added net coverage. Side groin floating flex pads add blocking area and increase protection.

- Lace-up front for added adjustment
- Intermediate sizing and increased protection
- Adjustable belt for customized fit
- Rear leg split to optimize performance
- High density inner thigh protection
- Large thigh guards with cushion padding
- Available in sizes: MED (24-26), LG (26-28), XLG (28-30), XXLG (30-32)

Note: add 6-8 inches to actual waist size then match to appropriate pant size.

VISION

P 9200 Vision Junior

The 9200 VISION junior goal pant is designed with a wide profile cut for added room and comfort in the waist and leg areas to increase flexibility. Wide thigh guards with internal high density five-hole blocks and side slash guards with cushion padding for added protection. Quick dry internal mesh lining provides for added comfort and air flow. Side groin internal padding with flex blocks and High density padding in the shell increase protection level and square the frontal area of the pant. Rear leg splits allow the thigh pads to remain properly positioned when down on the ice for more complete leg coverage. Larger tailbone and molded hip protection with thicker padding increase protection. The 9200 goal pant is designed with a softer looser fit with a shorter thigh guard length than our other adult models.

- Molded hips and kidney protection
- Cool fit mesh lining
- External padded belt
- Lace up front for added adjustment
- Flex pad on back spine
- Inside thigh protection
- Available in sizes junior sizes: SM (20-22), MED (24-26), LG (26-28), XLG (28-30)

Note: add 6-8 inches to actual waist size then match to appropriate pant size.

Velocity

VGS 7900 Composite

The 7900 Velocity goal stick features a construction of carbon fiber and fiberglass for light weight with superior balance and feel. The blade is constructed with special wide weave high tensile strength fibers to provide added strength and feel. The blade features internal ribs for added durability to limit twisting and features a high density internal foam core to absorb shock to reduce rebounding. The paddle area is shaped with a thin profile design and constructed with a full composite exterior with reinforced edging. It has a high density internal foam core to dampen impacts and prevent unwanted paddle flex. This gives the stick incredible response by preventing twisting and also provides additional stiffness for shooting and poke checking. Molded under high pressure to ensure resin transfer and flow through all layers for consistency and strength.

- Paddle heights 25", 26", 27"
- Mid blade twist curve
- Lighter weight construction
- Rounded heel for shooting and puck handling
- Available in Silver or Yellow

Mid Blade Twist Curve

Goal Sticks

VGS 7480 Composite

The 7480 goal stick has full graphite carbon fiber and fiberglass construction for extreme light weight and superior balance and feel. The blade is constructed with special high tensile strength fibers and resins with internal ribs for added strength. It features a high density internal core to absorb shock to reduce rebounding and provides excellent feel and control of the puck. The paddle area is shaped with a thin profile design and is constructed with a full composite exterior. It has a high density internal foam core to dampen impacts and prevent unwanted paddle flex. This gives the stick incredible response by preventing torsional twisting and also provides additional stiffness for shooting and poke checking. The edges of the paddle are reinforced with additional layers of fiber to limit chipping and add strength. The molding process is completed under extreme high pressure and heat to ensure full wet out of all the fibers, to ensure complete structural bonding of all the layers of fiber and adhesion to the internal foam core for added durability.

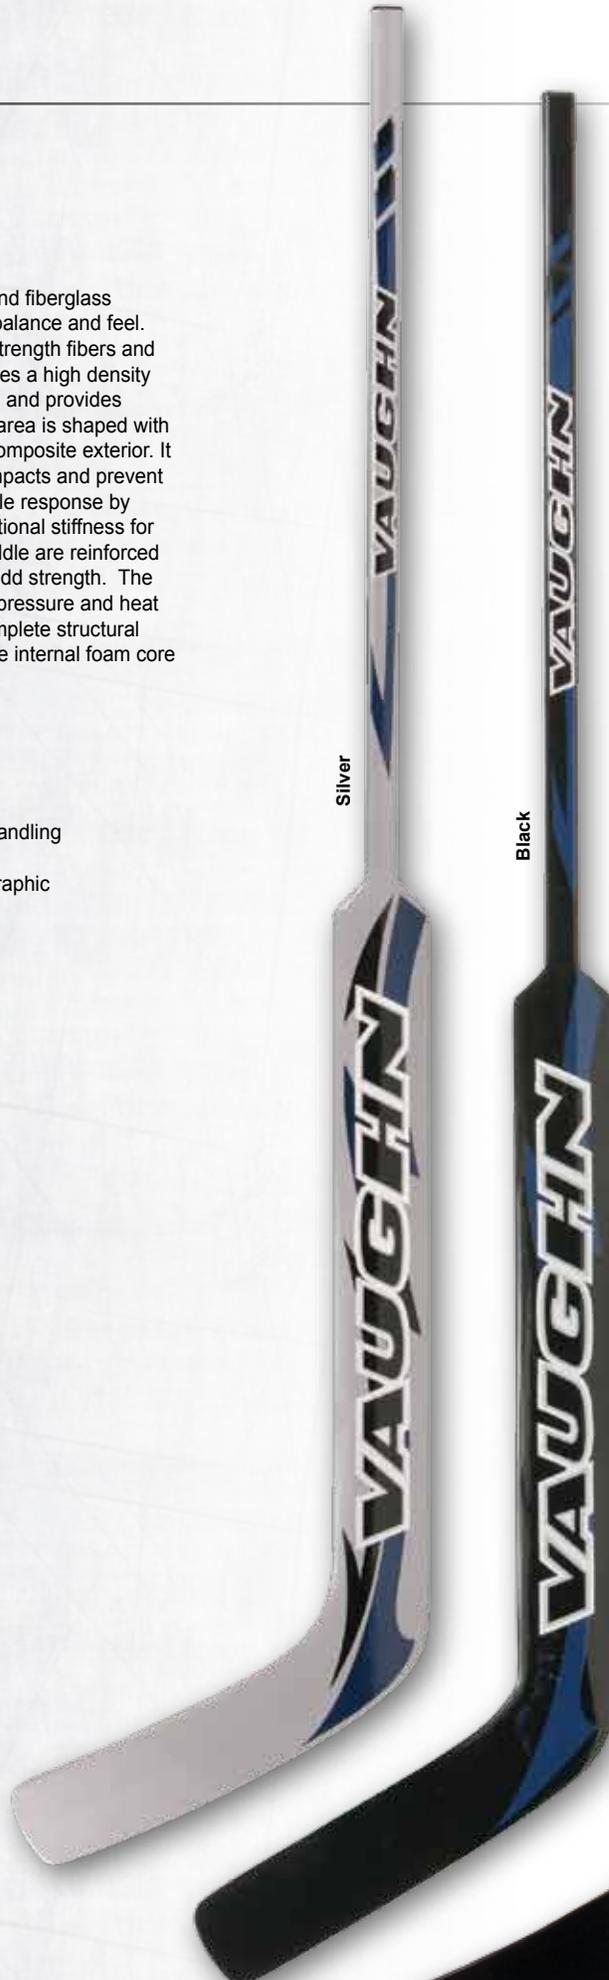

- Paddle height available in 25", 26", 27"
- Full composite construction for light weight
- Heel twist blade curve
- Rounded shoulder at top of paddle
- Internal foam core for low vibration
- Rounded heel area for easy shooting and stick handling
- Available in opposite hand curve
- Available in Silver or Black, or new White tribal graphic

VGS 9500 Carbon Elite

The new 9500 model goal stick has been engineered and optimized to achieve the lightest possible weight with a foam core construction. Carbon elite construction utilizes special woven carbon composite and epoxy resin to achieve lighter weight, the internal foam core features special composite inserts embedded into the foam core for added strength. Aspen and Birch handles are specially selected for weight and density to achieve light weight and balance. The blade features hard laminated strips and Carbon elite construction for added strength and durability.

- Lighter weight than other foam core models
- Carbon elite construction
- Foam core construction for consistency
- Reinforced blade
- Available in paddle heights 24", 25", 26", 27"

Heal Twist Curve

Goal Sticks

VGS 7600 Foam Core

The 7600 goal stick is manufactured with foam core construction with internal composite inserts encapsulated in the foam core in the blade and paddle areas for greater strength and light weight. Laminated wood handle with Birch and Aspen layers provides a constant flex and solid feel and allow for exceptional control while shooting. The paddle is a stiffer construction that is achieved with a special pre-laminated hard composite that is bonded to the stick for exceptional strength and rigidity. The blade area is high temperature molded with special epoxy resin and also contains hard laminate composite inserts on front and back of blade to provide added strength for durability and to limit blade flex while shooting for stronger more precise shots. Reinforced heel area contains an ABS plastic insert that is

bonded with the foam core to prevent heel splitting to increase durability. The new 7600 goal stick has exceptional balance and is available in paddle heights of 24", 25", 26", 27", custom patterns can also be made with a dozen minimum quantity.

- Stiff construction provides exceptional performance
- Hard laminated composites on outer surface increase durability
- Foam core construction for light weight
- Available in several paddle heights and curves
- Standard in natural finish
- Custom colors can be ordered - minimum orders apply

Mid Blade Curve

VGS 7450 Foam Core

The 7450 goal stick features a foam core internal paddle and blade blended with a laminated Aspen wood handle for excellent balance and feel. The foam core is compression bonded under heat and pressure and molded with a glass exterior to provide stiffness and durability.

- Available in paddle heights 24", 25", 26", 27"
- Heel twist curve with rounded heel and square shape blade end
- Light weight foam core construction

VISION
double cup 9500

Black/Red

Black/Navy

Navy/Silver

Red/Silver

VGC 9500 Vision

The Vision 9500 goal cup features advanced double cup design for the ultimate in protection. The internal cup is the advanced design from Shock Doctor Sports Technology that provides multi stage impact protection. The outer cup is a combination of half inch foam and plastic to dissipate and absorb initial impact for true double layered protection. Contoured waist sectioned area for added flexibility and comfort. Adjustable waist and leg support straps. Durable sport mesh and nylon construction. Available in three colors: standard Black, Black/Red and Black/Navy. Fits waist sizes 32" to 44". Also available in an intermediate size.

VGC 9500 Intermediate - fits waist sizes 25" to 32"

VGC 7600 Velocity

The Velocity goal cup features a contoured top waist with high-density padding. Layered foam padding throughout for additional comfort and protection. Large side cushion bumpers and banana-style cup features foam edge bumpers for greater protection. Available in three colors: Black/Silver, Red/Silver, and Navy/Silver. Fits waist sizes 32" to 44"

VGC 7360 - fits waist sizes 25" to 32"

VGC 7450

The new 7450 Velocity goal cup features a contoured front waist band with HD foam inserts. Large dimensionally molded cup with foam edging, the exterior of the cup also features large cushioned impact bumpers for added comfort and protection. Adjustable waist band and leg straps fits waist sizes 30" to 44".

VGC 7250

The new 7250 Velocity junior goal cup features a contoured front waist band with HD foam inserts. Large dimensionally molded junior sized cup with foam edging, the exterior of the cup also features large cushioned impact bumpers for added comfort and protection. Adjustable waist band and leg straps fits waist sizes 20" to 31".

WPP 900

The women's pelvic protector features a high-density reinforced lower abdominal area contoured for comfort and fit, a full adjustable waist strap with Velcro closure and molded plastic protection with foam padding.

- Durable nylon exterior
- Internal molded foam and plastic
- Fits waist sizes: 26" to 36".

Goal Bags

BG 7600

All new model for 2011 the BG 7600 goal bag is designed to hold a complete set of adult size goal equipment. The bag is constructed with a durable high strength 1680 denier nylon and reinforced with rip stop nylon in critical high stress areas. Carry straps are box stitched and reinforced for added strength. Three wheel design has large size wheels that help keep the bag from dragging on the bottom edge when heavily loaded. Internal storage pockets with zippers on each side and one end for added storage inside the bag. Wide U shaped opening for easy access and added straps across the top of the bag can be adjusted to keep the equipment from shifting and keeps the equipment centered in the bag for easier pulling or carrying of the bag.

- Dimension: 43" long x 21" high x 20" wide
- Available in black only

BG 9400

Full adult size goal bag is designed to fit a full set of equipment. The bag features a 1200 denier nylon construction and reinforced in wear and stress areas on the corners and bottom. Heavy duty webbing and straps with added rivets on the carry handles for increased durability. Three wheel design with larger style wheels for easier pulling. Large U shape top opening with heavy duty #10 zipper for easy access. Two internal pockets on each side of bag for added storage.

- Dimensions: 43" long x 21" high x 20" wide
- Available in silver/black only

BG 7450

The 7450 goal bag is extra super sized to hold an entire set of adult size equipment. The bag features extra heavy 1680 denier nylon construction with all internal seams double stitched and bound for added strength. Large number ten coil zipper for added strength and allows the bag to be fully opened for easy access. Heavy duty webbing reinforces the sides and ends of the bag. Large nylon carry handles with box stitched reinforced seams for durability and reinforced hand grasp handles at each end. Reinforced bottom corners with air vent grommets add durability and strength to the construction. The entire bottom surface of the bag is double layered for added strength and water resistance.

- Dimension 44" long x 22" high x 24" wide
- Extra rugged 1680 nylon construction
- Large #10 zipper
- Reinforced corners
- Internal mesh removable wash bag
- Available in black only

BG 7360 Intermediate

All new model for 2011 the BG 7360 goal bag is designed to hold a complete set of adult size goal equipment. The bag is constructed with a durable high strength 1680 denier nylon and reinforced with rip stop nylon in critical high stress areas. Carry straps are box stitched and reinforced for added strength. Three wheel design has large size wheels that help keep the bag from dragging on the bottom edge when heavily loaded. Internal storage pockets with zippers on each side and one end for added storage inside the bag. Wide U shaped opening for easy access and added straps across the top of the bag can be adjusted to keep the equipment from shifting keeping the equipment centered in the bag for easier pulling or carrying of the bag.

- Dimension: 35" long x 18" high x 20" wide
- Available in black only

BG 9200

The BG 9200 is designed to fit a full set of junior sized equipment. The bag features a 1200 denier nylon construction and reinforced in wear and stress areas on the corners and bottom. Heavy duty webbing and straps with added rivets on the carry handles for increased durability. Three wheel design with larger style wheels for easier pulling. Large U shape top opening with heavy duty #10 zipper for easy access. Two internal pockets on each side of bag for added storage.

- Dimensions: 34" long x 18" high x 20" wide
- Available in silver/black only

Accessories

VPC 7450

The 7450 clavicle protector has high-density plastic and foam layered padding and an adjustable neck strap with durable soft textured sport mesh vented lining and nylon exterior.

- Available in assorted colors

VPC 7250

- Junior size model

VPC 8000

Shirt style clavicle and neck protection holds unit more securely in place for added protection and comfort. Mesh outer shirt construction to reduce heat build up, cut resistant BNQ certified design.

- Available in sizes SM, MED, LG
- Black only

VPC 7000

The 7000 clavicle protector has a full ballistic nylon exterior, Velcro adjustable closure and soft internal padding with high density foams for shock dispersal. BNQ certified.

- Available in Adult sizes: MED, LG
- BNQ certified
- Available in Black, Navy, Red

VPC 7000 Jr

- BNQ certified
- Available in Black, Navy, Red
- Available in one size only

VTG 7600

The 7600 throat shield is designed with a curved and flared chin area that allows the unit to fit tighter to the upper chest for added protection and allows the unit to slide across the jersey without catching and limiting head motion. Molded in Lexan polycarbonate for maximum durability, shock resistance and clarity.

- Available in Clear, Smoke tint, Blue tint, Red tint

VTG 7360 Intermediate/Junior - Clear only

VKP 7900 knee/thigh guard

New for 2011 the VKP 7900 knee and thigh guard features a three section main body design for flexibility. Molded high density plastic inserts provide impact protection and wrap around the leg for complete coverage. Additional molded double shield protection attaches over the knee and lower thigh for maximum coverage and impact resistance. Wide inside knee area with half inch thick padding to reduce side knee impacts, knee area is lined with synthetic leather for durability and slip resistance. Available in Black, Navy, and Red. **VKP 7900i** Intermediate

Red Black Navy

VKP 7600

The VKP 7600 knee and thigh protector features a molded shape to allow the protector to fit under the goal pants.

VKP 7000

Thigh guard features five-hole blocking design with ultra high density foam protection that also provides light weight. Adjustable strap with buckle, lace on attachment, fits any Vaughn adult size leg pad. Available in Black, Blue, Red, and White. Also available in a smaller **intermediate size** **VKP 7070**

Accessories

VJ 7600 Jersey

The new VJ 7600 goal jersey is extra large cut with a wide body and large diameter arms to properly fit over the arm and chest protector. Durable mesh construction provides ventilation all stripes are sewn in with double stitched seams.

- Available in White/Black, White/Blue, White/Red
- Available in adult sizes LG, XLG, XXLG

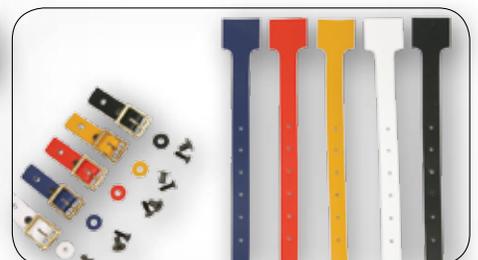

VJ 7360 Jersey

Intermediate/junior sized version of the adult model. Constructed with durable micro mesh fabric for ventilation. Wide cut to properly fit over the arm and chest protector.

- Available in White/Black, White/Blue, White/Red
- Available in junior sizes LG, XLG,

REPLACEMENT PARTS

We offer a full line of replacement parts for all Vaughn products, including: leg straps, toe straps and buckles, tie on toe assemblies, knee spacers, blocker palms, mask hardware, sweatbands, chin cups and replacement cages, plastic hardware for arm and chest protectors and replacement blocker board inserts.

VHU 9500

Performance underwear designed specifically for the needs of a goaltender. Specific goaltender cut for full freedom of movement, with high performance micro mesh moisture wicking fabric construction. Special placement of vent mesh reduces heat buildup and increases moisture evaporation for less body heat build up.

- Fast drying materials
- Navy blue color with white print
- Mesh inserts to keep goaltender cooler
- Durable materials for long wear
- Lightweight
- Special specific goaltender cut
- Adult sizes: SM, MED, LG, XLG
