VPG 7800 VELOCITY 5

The 7800 velocity 5 goal pad continues the evolution of design excellence and performance with many features and enhancements. The pad inner core is constructed with special high density foams formed in segments with multiple layers and varying densities of foams to provide longevity to the shape, consistency of feel and superior rebound control. This design provides a stronger structure with added stability to keep the pad length and width consistent and gives a solid blocking surface on all edges for maximum performance. The knee cradle has a wider cross section and is lined with nylon and with our proprietary MSH3 synthetic material for quick pad rotation. The knee cradle features a flex section on the outer top edge and angled adjustable strap these all contribute to improved pad control and faster pad rotation for precise pad positioning while executing a butterfly move. The inner landing area and higher density inner edge provide added stability and balance for more powerful and explosive slides across the ice. The knee landing pad is designed to incorporate the knee lifter concept and inside knee protection into one solid component to transfer leg movements to the pad for quicker response. The knee cradle design elevates the goaltenders knee from the ice to facilitate a wider butterfly spread across the ice for increased coverage. The leg cradle design functions to surround the leg and allows for complete strap adjustment so the goaltender can fully control and adjust the pad rotation to their individual preference. The wider outside leg protection gives more protection and coverage to the leg plus provides the advantage of filling in gaps when tight up against the post for better net coverage. The top outside roll features a more square top section to provide added skip over protection on shots in the five-hole, higher density foam in the outside roll sections provide added blocking on higher impact shots on the outer edge of the pad. The inner knee design and knee cradle changes use select density of foams specifically layered to reduce impacts to the knee while driving the pad to the ice in a butterfly

move. The lightweight design has been carefully optimized to distribute the weight evenly over the length and width of the pad for reduced weight and balance. The outside panel of the pad has a more tapered section at the knee to facilitate a more complete pad rotation and provide more spacing for the goal pants to allow the pads to align in a more vertical position on the ice for a more solid complete butterfly with greater net coverage.

- Full Pro spec construction and fully domestically manufactured to exact pro specifications for superior performance and durability
- Dual knee straps with four point user selectable buckle locations for custom fit
- Flex-Pac internal foam stuff system slows the pad to flex and break-in to each goaltenders own leg shape for maximum performance and feel
- The V5 graphics provide a longer and taller visual image
- Molded thigh/knee board with improved attach location for more complete coverage
- Tapered outer panel at knee area for improved pad positioning
- Firm inside edge for improved five-hole seal to the ice
- Fully balanced to enhance performance
- New wider knee cradle with knee lifter incorporated to the inside edge for a more ergonomic knee positioning to reduce stress to the knee and hip
- Wider leg cradle with increased protection on the outer leg padding
- Improved scoop angle allows pad to set taller on leg and provides more ice clearance
- Firm perimeter edge on inside and outside of the pad for stronger blocking surface
- Wide inner edge and landing pad area provide superior balance
- Available in sizes 31+1", 32+1", 33+1", 33+2", 34+1", 34+2", 35+1", 35+2", 36+1", 36+2", 37+1", and custom

Goal Pads

VPG LT90 VENTUS

All new for 2013 the Ventus LT 90 custom pro goal pad. The design features a full flat front surface with a one piece solid outside roll to give the pad a solid firm shape. The lower scoop break over the skate has a specific design and construction that keeps the pad semi-rigid in this area so the pad keeps the shape and profile even after it is broken in. The pad is constructed around an internal foam core that is constructed with multiple density and thicknesses of foam in a precise arrangement to give the pad a very solid frontal blocking surface and firm perimeter edges for more effective blocking area. The internal core of the pad has multiple layers of foam in varying densities that allows the structure to flex and twist in critical locations to improve performance by allowing the pad to flex, this reduces and limits stress to the knees and hip joints allowing for proper anatomical pad position. This gives the goaltender added extension in the butterfly and faster pad rotation to square up the pads and increase blocking surface even faster. The internal edge of the pad is designed with a wide landing area at the knee, this creates added surface area for increased pad and body balance and also extends the knee landing pad farther behind the knee for increased coverage. The inner shin structure has a wide five-hole pad with a flat structure that flares and widens at the ankle and into the side scoop of the pad. This aligns the pad square to the ice and allows for more stability and control when sliding and moving on the ice. The internal knee cradle has an angled strap system that positions the straps below the bend in the knee for added comfort and less friction during pad rotation. Dual adjustable knee straps allows for custom adjustment and supports the knee in the body of the pad to elevate the knee from the ice surface to provide superior and ergonomically correct body positioning. The inside knee landing pad is built with a special EVA foam cushioning system that reduces G impact

loading and softens the impact transfer to the knee. The leg cradle features a wide inside landing pad that is shaped to encapsulate the leg and cushion the body weight while going down on the ice surface. The outer leg cradle pad is sculpted to cover the calf and extend coverage into the side profile of the pad to cover gaps when tight up against the post to eliminate openings. The knee cradle and leg cradle function to provide precise pad control and faster pad movement, this makes the pad move precisely with the goaltenders leg for faster response and creates a pivoting hinge so the pad will quickly rotate around the leg to effectively square up the pad to the most effective blocking position.

- One piece outside roll structure
- Inner core for precise pad shape
- Extreme light weight with superior pad balance
- Tall plus 2" sizing
- Adjustable outside knee area buckle strap
- Dual leather knee straps system
- Optional top thigh strap can be added
- Laced in adjustable thigh guard
- Off set tie on toe assembly with lace adjustment position
- Pre-shaped firm design and construction
- New Ventus graphics give a taller, longer appearance
- Curved upper side profile helps close five-hole when in a butterfly
- Optional knee flex design with defined knee section and outside roll breaks for more flexibility
- Available in sizes 30+2", 32+2", 33+2", 34+2", 35+2", 36+2", and custom

Goal Pads

VPG 7990 VELOCITY 5

The 7990 Velocity 5 goal pad is a hybrid design that provides the feel of our traditional velocity leg pads in the areas below the knee but provides a thinner profile in the knee and upper thigh sections with a firmer construction for tighter five-hole coverage. Reduced scoop angle gives the pad a taller position on the leg and a taller plus 1.5" thigh rise with square inner and outer corners maximize blocking surface. The outer panel of the pad features a narrower profile that tapers at the knee and top and has a pre formed angle at the knee to provide a precise ergonomic shape. The top three leather straps have buckle positions that are fully adjustable, allow the straps to be angled for comfort to allow for quick pad rotation and custom fit. The knee cradle has a wide mid-section and is fully adjustable and can be adjusted laterally or vertically for precise location for complete custom fit. Angled knee strap features double elastic layered for durability with dual Velcro adjustments to keep the goaltenders leg more secure for added control. Large outside leg protector features high density foam inserts over the calf muscle and outer ankle for added protection and functions to fill in open area when the goaltender is against the post. The leg cradle is designed to surround the leg and provide pad control without having to over tighten the main leg straps and also features adjustment straps to keep the leg cradle properly positioned even if the leg straps are left extremely loose. The wide leg channel has a low friction synthetic surface to allow for quick pad rotation and durability. Wide inner edge and landing area gives the pad great balance while on the inner edge and allows for powerful quick slide across the ice.

- Tall thigh rise with plus 1.5" sizing
- Flex-Pac internal stuffing for rebound control and easy break-in
- Stiffer upper pad section with solid HD internal and solid outside upper roll
- Lightweight balance design for quick movements
- Adjustable knee lifter design
- Full pro spec construction and domestic manufactured
- Fully adjustable knee cradle
- Square shaped outer corners of pad to maximize surface area
- Added coverage to back of leg with wider padding
- Angled knee cradle strapping
- Pre-shaped upper knee curve for precise fit
- Molded thigh guard with lightweight design and construction
- V5 graphics to provide a longer and taller visual look
- Available in sizes 32+1.5", 33+1.5", 34+1.5", 35+1.5", 36+1.5", 37+1", and custom

VPG 7490 VELOCITY 5

The 7490 goal pad features taller plus 1.5" high rise for enhanced five-hole coverage. The V5 graphics create a taller optical image to the shooter. The 7490 features a hybrid design to provide the feel of a conventional Velocity pad in the lower leg, but with a thinner upper knee and thigh section with a more solid construction with tighter five-hole coverage. The knee and thigh area features a solid internal core this with a solid top outside roll give the pad added stiffness in the thigh area and provides more solid blocking surface especially when in a butterfly position covering the five-hole area. Fully adjustable knee cradle with Velcro and lace adjustment allows the pad to be specifically fit to the goaltender. Special high density molded thigh guard gives added protection and extends into the side knee area for greater coverage. The 7490 pad has a wide flat inner edge for superior balance when down on the ice. This along with reinforced construction provides added stability and gives the pad firmer outer edges for improved puck blocking. Wide leg channel aids in pad rotation and keeps the pad under control for precise movements and allows quicker pad positioning.

- Knee cradle has adjustment laterally and vertically for custom fit
- Solid top outside roll
- Taller plus 1.5" sizing
- Molded lightweight thigh guard
- Inner edge balance stabilizer with wide profile for balance
- Full leg cradle
- Flex-Pac internal padding for rebound control
- Custom spec construction for a higher level of performance
- Available in sizes 32+1.5", 34+1.5", 35+1.5", 36+1.5", 37+1"

VPG 7460 VELOCITY 5

The 7460 Velocity 5 goal pad features a light weight construction and design features for superior performance. The V5 graphics provides a larger visual image making the pads look larger. Internal foam core provides lighter weight and extends to the edges of the pad to increase pad stability and stiffness. Wide inside pad edge provides increased pad control and balance when positioned on the ice and allows for faster more controlled movements. Tall plus one inch length thigh rise adds to overall pad coverage area and helps fill in the five-hole area while in a butterfly position. Wide pro style knee cradle with angled adjustable strapping allows for precise knee placement and faster pad rotation. Adjustable knee lifter system keeps the goaltenders knee raised away from the ice surface to reduce impacts and allows for increased leg extension and limits stress on the knees and hips. Inner edge balance stabilizer ensures proper pad placement while on the ice to give the pad added stability and a tight seal along the ice surface and squares the pad for increased net coverage. Molded thigh/knee guard with raised attachment location contours to the shape of the leg for increased protection and adds extra coverage to the five-hole area. Full leg cradle allows full control of the pad without having to over tighten the main straps and allows for more precise pad movement. The wide outside calf guard fills gaps when positioned up against the post and adds extra protection to the back of the lower leg.

- Tall thigh rise with plus 1" sizing
- Full pro width knee cradle with angled strapping
- Flex-Pac internal stuffing for rebound control
- Molded thigh guards
- Inner edge balance stabilizer
- Internal high density foam core
- Knee lifter for more ergonomic body positioning
- Available in sizes 32+1", 34+1", 36+1", 37+1"

VPG LT80 VENTUS

All new for 2013 the Ventus LT 80 goal pad. The design features a full flat front surface with a one piece solid outside roll to give the pad a full firm shape. The pad is constructed around an internal foam core that is constructed with multiple density and thicknesses of foam in a precise arrangement to give the pad a very solid frontal blocking surface and firm perimeter edges for more effective blocking area. The internal core of the pad has multiple layers of foam in varying densities that allows the structure to flex and twist in critical locations to improve performance by allowing the pad to flex, this reduces and limits stress to the knees and hip joints allowing for proper anatomical pad position. This gives the goaltender added extension in the butterfly and faster pad rotation to square up the pads and increase blocking surface even faster. The internal edge of the pad is designed with a wide landing area at the knee, this creates added surface area for increased pad and body balance and also extends the knee landing pad farther behind the knee for increased coverage. The inner shin structure has a wide five-hole pad with a flat structure that flares and widens at the ankle and into the side scoop of the pad this aligns the pad square to the ice and allows for more stability and control when sliding and moving on the ice. The internal knee cradle has an angled strap system that positions the straps below the bend in the knee for added comfort and less friction during pad rotation. Knee cradle with adjustable retention strap supports the knee in the body of the pad to elevate the knee from the ice surface to provide superior and ergonomically correct body positioning. The leg cradle features a wide inside landing pad that is shaped to encapsulate the leg and cushion the body weight while going down on the ice surface. Large outer calf guard pad covers gaps when tight up against the post. The knee cradle and leg cradle function to provide precise pad control and faster pad movement, this makes the pad move precisely with the goaltenders leg for faster response and creates a pivoting hinge so the pad will quickly rotate around the leg to effectively square up the pad to the most effective blocking position.

Goal Pads

VPG 7490i VELOCITY 5 INTERMEDIATE PRO

The 7490i goal pad is our intermediate Pro sized goal pad with all the top features of the adult model scaled to provide the same exacting performance to the younger goaltender who requires the ultimate in performance. Tall 1.5" thigh rise for enhanced five-hole coverage. The V5 plus graphics create a taller optical image to the shooter. The 7490i features a hybrid design to provide the feel of a conventional Velocity pad in the lower leg, but with a thinner upper knee and thigh section with a more solid construction with tighter five-hole coverage. The knee and thigh area features a solid internal core this with a solid top outside roll give the pad added stiffness in the thigh area and provides more solid blocking surface especially when in a butterfly position covering the five-hole area. Fully adjustable knee cradle with Velcro and lace adjustment allows the pad to be specifically fit to the goaltender. Special high density molded thigh guard gives added protection and extends into the side knee area for greater coverage. Inner pad edge designed with a wider flat inner edge for superior balance when down on the ice. The reinforced construction provides added stability and gives the pad firmer outer edges for improved puck blocking. Wide leg channel aids in pad rotation and keeps the pad under control for precise movements and allows quicker pad positioning.

- Knee cradle has adjustment laterally and vertically for custom fit
- Solid top outside roll
- Intermediate pro construction for higher levels of play
- Taller plus 1.5" sizing
- Molded lightweight thigh guard
- Inner edge balance stabilizer with wide profile for balance
- Full leg cradle
- Flex-Pac internal padding for rebound control
- Custom spec construction for a higher level of performance
- Available in sizes 29+1.5", 30+1.5", 31+1.5"

Steve Mason

VPG 7260 VELOCITY 5 INTERMEDIATE

The 7260 intermediate size goal pad is designed with lightweight and balanced construction to facilitate quick leg movement and faster break-in. Excellent pad control is provided with full leg cradle and large outer edge calf guard. Extended plus one inch thigh rise adds coverage to the five-hole area and molded thigh guard with five-hole block adds protection and increases coverage. Inner pad edge has a wide profile and large surfaced landing area to provide optimal pad placement while in the butterfly position on the ice and allows for quick powerful slides on the ice. Deep knee cradle with flex portion on the outer edge and angled adjustable knee strapping to facilitate faster pad rotation and alignment.

- V5 graphics are designed to give the pad a taller larger appearance.
- Intermediate sizing with proportional design
- Wide leg channel
- Knee lifter system for improved ergonomic body positioning
- Full stitched graphics
- Durable Clarino micro fiber outer shell construction
- High density outside rolls for improved puck deflection
- Inner edge balance stabilizer
- Pro style thigh guard
- Full wide knee cradle with angled strap position
- Available in sizes 26+1", 28+1", 30+1", 31+1"

VPG LT60 VENTUS

All new for 2013 the Ventus LT60 junior goal pad. The design features a full flat front surface with a one piece solid outside roll to give the pad a solid firm shape. The pre-shaped scoop and side profile keeps the pad in a taller posture to increase net coverage and reduce drag along the ice. Internal foam core is constructed with multiple density and thicknesses of foam in a precise arrangement to give the pad a very solid frontal blocking surface and precise flex points. The internal edge of the pad is designed with a wider landing area at the inner knee, this creates added surface area for increased balance and control. The inner shin structure five-hole structure gives a flatter surface area for solid pad position and quick sliding on the ice surface. The internal knee cradle has an angled strap system that positions the straps below the bend in the knee for added comfort and less friction during pad rotation. Adjustable knee straps allow for precise adjustment to support the knee in the body of the pad to elevate the knee from the ice surface. This also allows the goaltender to get a wider butterfly spread and reduces the stress on knees and hips. The leg cradle features a wide inside landing pad that is shaped to encapsulate the leg and cushion the body weight while going down on the ice surface. The outer leg cradle pad is sculpted to cover the calf and extend coverage into the side profile of the pad to cover gaps when tight up against the post. Knee and leg cradle are designed to create a pivoting hinge so the pad will quickly rotate around the leg to effectively square up the pad to the most effective blocking position.

- Full firm flat frontal blocking surface
- One piece outside roll structure
- Inner core for precise pad shape
- Extreme light weight with superior pad balance
- Tall plus 2" sizing
- Laced in adjustable thigh guard
- Inner leg cradle shin cushioning
- Off set tie on toe assembly with lace adjustment position
- Pre-shaped firm design and construction
- Available in sizes 24+2", 26+2", 28+2"

Goal Pads

VPG 7190 VELOCITY 5

Junior size model Velocity 7190 is styled after our pro model and optimized in shape and design to provide superior performance for the smaller junior sized goaltender. Packed with features not normally found on pads at this level the 7190 has full leg cradle to enhance pad control, full knee cradle with angled adjustment strap to speed pad rotation and provide pad control and precise placement. Balance stabilizer on the inner pad edge provides wide landing surface to improve pad positioning during a butterfly move to the ice. Molded thigh guard adds extra protection and helps fill the five-hole area. Pre shaped design gives optimal angles to the ankle and knee area for precise fit and stability.

- Knee cradle for pad control
- Inner edge balance stabilizer
- Molded thigh/knee guard
- Solid top outside roll
- Full inner leg protection
- Easy break-in design and construction
- Flex-pack internal foam for rebound control
- Lightweight for quick movement
- Available in sizes 22+1", 24+1", 26+1"

Velocity

VPG 7110 VELOCITY 5

The youth model is designed to provide added performance. The 7110 leg pad features a front surface with knee roll inserts this gives maximum net coverage and improves flexibility. Inner edge padding and structure allows for proper pad positioning while on the ice to allow for stability and balance, this gives the goaltender added agility and control. Each pad size is carefully proportioned and scaled for optimal fit of all sizes so all flex points are correctly located for fast easy break-in.

- Knee cradle for pad security and control
- Segmented outside roll adds flexibility
- Designed to maximize blocking area
- Available in sizes 20+1.5", 22+1.5", 24+1.5", 26+1.5"

VP 7800 VELOCITY 5

The 7800 Velocity 5 arm and chest protector features several innovations and enhancements to achieve the highest level of performance and protection possible. Every component is carefully sized to ensure proper fit and the entire unit is designed and every component carefully optimized to give the unit great balance for the ultimate feel. Superior fit helps keep all the padding ergonomically positioned and allows the unit to mold with the body to provide flexibility and quick body movements. Large shoulder floaters are constructed with superior protection and increased rigidity with High density internal material for more effective blocking surface. The chest pad design features three independent layers in the construction which allows for extreme flexibility and increase protection with multiple load paths to reduce impacts. Lower chest pad belly flap allows the unit added flex when in a deep crouched position so the unit stays positioned and aligned with the body for added net coverage and greater protection. The shoulder design features adjustable cross over support straps that attach to the rear shoulder blade area and the back padding. This all functions to distribute weight to keep the unit properly positioned and suspended from the shoulders. The side chest pad extensions extend into the upper rib cage and feature high density foam padding that extends over the side buckles for greater protection coverage. Anatomically designed arms

prevent padding from shifting away from critical areas of the arm, wide bicep molded caps provides added net coverage and adds greater protection. Large high density reinforced main arm floaters provide a firm blocking surface and aid in puck deflection. Multiple adjustments for the back padding, arm width and elbow position allow for custom adjustment.

- Pro spec construction for added protection and durability
- Multi sectioned chest protector with flex low panel at belly
- Tapered forearm padding for improved fit with gloves
- Four point adjustable elbow pads with molded end caps
- Large shoulder floaters
- Anatomical design for superior fit and balance
- Military spec hardware for strength
- Wider spec shoulder floaters for greater upper body coverage
- Available in light or dark color combination
- Side chest pad extensions in upper rib cage with Velcro adjustment
- Available in sizes XS, SM, MED, LG, XLG

VP LT 90 VENTUS

The new Ventus LT 90 Custom Pro arm and chest protector is designed to allow the maximum amount of flexibility for an athletic fast moving goaltender while providing the maximum allowable blocking surface and protection for enhanced performance. The arms are constructed of a mesh stretchable base to provide ventilation to reduce heat buildup provide quick drying and superior arm flex. The arm design features precision molded high density plastic caps encapsulated in foam padding for increased impact resistance and features a wide outer bicep pad that adds extra coverage area and squares off the arm for added blocking surface. Large mid arm floaters feature light weight high density foam and large side elbow caps for greater impact resistance, the floater also features a forearm attachment tension adjustment to optimize the pad position and to adjust the desired flex. The arms also feature molded elbow caps that feature four point lace adjustments to allow rotation and width adjustment for any arm size, along with back arm straps and a Velcro adjustable wrist strap. Large shoulder floaters have a wide frontal blocking surface and are constructed with an extra thick layer of extra hard high density foam to increase protection and provide a superior blocking surface. The shoulder floaters also feature an air cushion backing pad that lifts and elevates the position of the padding for maximum protection and optimal blocking position. The chest pad is sectioned in three unique sections that allow the unit to flex with the natural body movements unique to a goaltender, this design and construction allows the chest pad to stay properly positioned during rapid body movements and keeps the unit in place when in a deep crouched body position. The chest pad features a large sternum plate with polyethylene plastic

reinforcement to cover vital areas of the chest and extends to add coverage to the upper stomach region. Large shoulder caps are elliptical in shape and extend into the upper rib cage area to expand the coverage area. The chest pad features a cross over top adjustment at the shoulder blade to allow the chest pad to be adjusted for vertical positioning to secure the pad closer around the neck and clavicle areas. This allows for precision fit, this balances the unit's weight across the shoulders and body and to keep the unit precisely positioned for an even lighter weight feel for superior performance.

- Enhanced performance with Pro-Spec construction
- Light weight
- Large shoulder floaters
- No Gap main arm floater pads
- Tapered forearm padding
- Military spec hardware for added durability
- Cushioned padding under shoulder floaters
- Wide outer bicep padding
- Four point adjustable elbow padding
- Mesh based arms for cooler play and flexibility
- Maximum net coverage design
- Available in sizes XS, SM, MED, LG, XLG

Black/Powder Blue/Silver

VP 7460 VELOCITY

The Velocity 7460 Pro arm and chest pad has extensive improvements for 2013. New enchantments and features have been added to provide the highest level of protection and performance. The chest pad is constructed with angular shaped blocks and a lower belly flex section to align all the flex points of the chest pad to move with the natural shape of the goaltenders body giving increased range of motion and comfort. Large lower chest pad flap allows the chest pad to keep proper body alignment while in a bent or crouched position. Large Pro shoulder floaters with thicker high density foam give added net coverage and increase overall width and protection. The arm padding features molded reinforced caps encapsulated in foam for impact resistance and a wide pre-shaped main arm floater with High density internals on front and side areas for increased protection. New added upper bicep extension adds protection and squares off the arm area on the outer edge and increases coverage area. Full arm straps and Velcro adjustable wrist straps with four point adjustable elbow pads allow for a custom precession fit for optimal performance. New upper chest pad shoulder adjustment allows precise chest pad placement to keep the unit secure around the neck and clavicle. Large high density plastic reinforced sternum plate with added form thickness in the chest region adds protection in critical areas and improves shock dispersal. Full back spine padding features multiple adjustments with a high density insert and adjustable belly strap attached allows for added adjustment.

- Pro construction with added padding thickness
- Multi-sectioned chest pad for flexibility
- Large wide shoulder floaters
- Anatomical design for superior fit and balance
- Tapered fore arm padding for fitting into gloves
- Military spec hardware for durability
- Four point adjustable elbow pads
- Full arm width adjustment
- Large sternum plate
- Built in neck guard
- Available in sizes, XS, SM, MED, LG, XLG

Extended bicep protection

Adjustable spine pad

VP LT80 VENTUS

All new for 2103 the Ventus LT80 model. Designed to work with the natural movements of the goaltenders body to optimize flexibility while providing superior protection and maximum net coverage for the upper body. Wide extra-large shoulder floaters increase blocking surface area and to provide greater impact dispersal. Large sternum plate adds protection over critical areas and extends under the shoulder floaters to give more stability to the shoulder protection. Angled block design on the chest pad provides increased flex and body movement, the Lower chest pad features a separate flap extension that adds flexibility to keep the chest pad properly aligned while making quick movements. The arms are anatomically designed to align the arm protection in a precise alignment and location for increased protection. The arms feature four point adjustable elbow pads, adjustable arm width straps and Velcro adjustable wrist straps to provide for a custom fit. The back padding features High density foam padding over the spine and dual buckle waist strap attachment for security and adjustment.

- Fully molded forearm and bicep caps
- Large wide shoulder floaters
- Extra side rib cage guard
- Side chest pad extension padding
- Lower chest pad flex extension flap
- Adjustable back padding
- Large reinforced sternum plate
- Available in sizes SM, MED, LG, XLG

VP 7490i VELOCITY 5 INTERMEDIATE PRO

The 7490i Velocity 5 arm and chest pad is our pro intermediate size that is enhanced in design to fit the young adult goaltender that needs maximum protection and performance but does not have the full body size or weight to fit in the full adult models. The sizing and protection are scaled from our pro models and optimized to provide a precise blend of protection and increased mobility. Large V5 shoulder floaters with high density internal foams give maximum net coverage while increasing protection with a large surface area. Wide arm floaters feature the same thickness as our pro models to maximize protection and provide superior blocking and puck deflecting qualities and are carefully scaled in size to ensure mobility. Unique back and shoulder adjustment allows for precise adjustment and functions to weight and provides for even weight distribution for feel and balance.

- Large shoulder floaters with HD internals
- Four point adjustable elbow pads
- Built in neck frontal protector
- Flexible lower belly flap on chest pad
- Side rib cage protection
- Side belly pad extensions with buckle cover for added protection
- Molded arm caps encapsulated with foam padding
- Adjustable wrist and arm straps
- Large mid arm floaters
- Available in sizes MED, LG, XLG, XXLG

VP 7260 VELOCITY 5 INTERMEDIATE

The 7260 arm and chest pad is our standard intermediate size and features our anatomically designed body pad with angled protective blocks and lower belly flap arranged to align the flex points of the chest pad to match body movements for optimal flexibility. Large sternum plate features plastic reinforcement for added impact resistance. Large shoulder floaters feature high density rigid foam inserts and add to the blocking surface and protection. The arms are constructed with a flexible base material with molded arm caps, and the elbow padding features four point adjustments for precision fit and adjustment. Large main arm floaters add protection and allow for improved puck deflection. Nylon lining on the interior prevents water weight gain and allows for fast drying. Sizing is optimized for a goaltender who has intermediate height but not as much shoulder width or body weight as on a 7490i intermediate Pro model.

- Full adjustable back padding
- Adjustable wrist and arm straps
- Flexible chest pad with belly flap
- Lightweight design and construction
- Cushion padding on lining of chest pad
- Molded arm padding and shoulder caps for superior protection
- Available in sizes SM, MED, LG, XLG, XXLG

VP LT60 VENTUS JUNIOR

The Ventus LT60 junior arm and chest protector is designed to work with the natural movements of the goaltenders body to optimize flexibility while providing superior protection and maximum net coverage for the upper body. New style extra-large shoulder floaters with a wide profile to increase blocking surface area and to provide greater impact dispersal. Angled block design on the chest pad aligns the chest pad flex points with the body movements. This along with lower chest pad flap adds flexibility to keep the chest pad properly aligned while making quick movements. The arms are anatomically designed to align the arm caps in a precise location for increased protection and more effectively hold the padding in proper position for improved protection and increased effectiveness in blocking surface area. Internal lining on the arms and chest pad are water resistant to prevent weight gain and to facilitate fast drying. The arms feature four point adjustable elbow pads, adjustable arm width straps and Velcro adjustable wrist straps to provide for a custom fit. The back padding features High density foam padding over the spine and dual buckle waist strap attachment for security and adjustment.

- Fully molded forearm and bicep caps
- Large wide shoulder floaters
- Extra side rib cage guard
- Side chest pad extension padding
- Lower chest pad flex extension flap
- Adjustable back padding
- Large reinforced sternum plate
- Available in Junior sizes SM, MED, LG

JUNIOR FITTING GUIDE			
SM	4'	to	4'3"
MED	4'4"	to	4'7"
LG	4'8"	to	4'11"

VP 7190 VELOCITY 5 JUNIOR

The 7190 arm and chest protector provides a greater level of protection over a junior size range. Molded plastic arm caps provide great protection with foam inserts to reduce impacts. High density chest pad blocks allow easy flex and add protection and provide extreme lightweight. The chest pad area features a built in neck guard and sternum plate for added protection. The arm design features adjustable width and wrist straps to allow for complete adjustment and nylon lining on the interior prevents water weight gain and allows for quick drying.

- Four point adjustable elbows
- Large main arm floaters
- Large shoulder protection and caps
- Pre-shaped for easy break-in
- Molded arm cap padding
- Available in sizes SM/MED, MED/LG

YOUTH/JR FITTING GUIDE			
SM/MED	4'	to	4'5"
MED/LG	4'6"	to	4'9"

VP 7110 VELOCITY 5 YOUTH

The 7110 youth sized Velocity arm and chest protector unit features large shoulder area to protect the vulnerable collar bone and shoulder area. Large plastic reinforced sternum plate adds protection in critical impact areas. Fully molded plastic components in the arms, shoulders and elbows along with a padded back spine protector provide added impact resistance. Wide cut easy-flex arms with adjustable wrist strap for a secure fit. Nylon exterior covering material for added durability and limits water absorption to keep unit light weight.

- Pre-shaped design for comfort and easy-break-in
- Wrap around style chest pad to increase coverage
- Cushioned inner chest pad lining
- Back spine padding
- Quick dry internal mesh lining
- Available in Youth sizes SM/MED, MED/LG

Catch Gloves

T 7800 VELOCITY 5

The T 7800 catch glove is designed and optimized to provide a higher thumb angle for a more natural relaxed hand position. This gives a more open hand position and creates a wider pocket opening for increased net coverage. The palm design is dimensional to provide a curved shape to the palm surface that directs pucks into the pocket area and to provide added leverage for the fingers to close the glove quicker for optimal catching performance. Large double bar T-web provides a deep pocket and the dual bars and lace function to reduce puck spin for greater puck retention. The top thumb and cuff edge have a molded deflection ramp that is engineered to limit pucks from skipping over the top edge of the glove and provide added stiffness to the frontal area for more solid blocking surface. The internal fingers are pre-shaped and constructed in a dimensional mesh material for cooler play and fast drying. Adjustable back finger strap extends across the lower portion of the fingers and provides for more hand control. This provides a precise fit and secures the hand in the glove and limits twisting from high impact shots near the glove perimeter. The internal thumb tunnel design has a wider adjustable thumb loop that gives superior protection, control and leverage to give the glove more precise powerful closing. Wider cuff opening with curved inner surface allows added wrist room and helps improve glove positioning to keep the glove more open and square to the shooter. The back hand padding features a fingertip deflecting ramp to move impacts away from the finger tips. The back hand padding also features multi section design for wrap around hand coverage and greater flexibility and opens for quicker drying and to access adjustment straps. Internal back hand strapping allows the hand to be completely secure in the glove and provides dual adjustment straps to secure the wrist and hand.

- Higher thumb angle provides natural feel
- Open molded palm shape
- Pro spec construction for optimal performance and durability
- Heat moldable for custom fit and fast break-in
- Internal back hand retention for control
- Adjustable wrist strap
- Flex seam and lace break palm for precision closing
- Thumb tunnel design
- No binding cuff adds blocking surface
- Three piece back hand protection
- Reinforced perimeter edge for stability
- Light weight and balanced for ultimate feel

T LT90 VENTUS

The T LT90 Ventus Custom Pro catch glove features an advanced anatomical design to increase the performance through superior control, balance, fit and feel. The shape of the glove is designed to provide superior catching power with precision molded curved palm and thumb components that define the shape of the glove and align the flex area of the palm precisely with the natural closure movement of the hand. The internal hand area features divided finger stalls to align the fingers in the glove for control and closing power. The back of the hand is secured in the glove with a two piece stretchable neoprene and mesh internal glove that aligns the inner hand into the body of the glove for security and control. Adjustable back hand strap and wrist strap allow for precise adjustment and retention. The inner thumb area features our extra wide thumb tunnel design to support the thumb and allow for thumb angle adjustment to superior closure control and power. Extra deep T-web pocket has a reinforced horizontal top bar that is secured into the body of the glove for added strength and durability. Skate lace waxed webbing reduces puck spin for improved puck control and retention. Full Pro-spec construction adds extra reinforcement along the finger perimeter, T-web and extra padding in the palm and thumb. Wide notch heel area of the thumb allows the stick to sit properly in the glove to apply more force to the stick while shooting. Extra-large two piece back hand protection features a fingertip deflecting ramp along with High density foam over the back of the fingers. Extra wide back cuff has a wide tapered opening to improve the fit and overlap with the glove and to allow extra wrist flexibility. The front cuff box is a no binding construction to increase effective blocking surface and features a wrist side flare to reduce puck skip over and it also increases the wrist flex on the back side of the cuff opening.

- Unique neoprene inner glove for superior control
- Precision molded components for stability and durability
- Molded cuff box with no binding design
- Dual adjustment straps
- Reinforced T-web
- Pro Spec constructing
- Select materials allow the glove to be custom heat formed
- Fingertip deflecting rail

Catch Gloves

T 7990 VELOCITY 5

The T 7990 Velocity 5 catch glove is designed with a deep contoured catching surface with an extra wide palm area to give more depth and surface area to the glove. The offset T-web with skate lace provides a larger pocket area along with added reinforcement in the T-web top for extra support along the top perimeter edge. Top cuff and thumb feature a molded deflecting ramp to limit puck skip over and provide added stability to the top edge of the glove. The internal hand design gives a more vertical thumb angle and hand position. Dual adjustable straps over the fingers and back hand provide added security and custom adjustment along with new anchored wrist strap for an even tighter adjustment around the wrist. The palm area features an internal section insert that is seamed for easy precise break-in and features an extra layer of padding in the palm to add protection and reduce rebounding. Wide cuff opening provides added room for increased wrist movement and features an adjustable strap that allows the back cuff to be adjusted to the goaltenders preference.

Three piece back hand protection has HD foams and a deflector ramp over the fingers to deflect impacts away from the ends of the finger tips.

- Extra padding in palm area
- Molded cuff and thumb protection
- Heat moldable for custom fit
- Pre-formed shape with flex seams on internal padding
- Wide surface area to maximize coverage
- Internal hand control straps
- Limited edition graphics
- Light weight and perimeter balanced
- Mid curve front cuff surface enlarges blocking surface
- Heat moldable for custom fit
- Offset T-web with reinforced top bar

T 7490 VELOCITY 5

The T 7490 catch glove features a design with a deep contoured catch frontal area and an extra wide shaped palm are to give more depth and surface area to the glove for added net coverage. The single spine T-web pocket is designed with an offset base attachment and skate lace pocket functions to give improved pocket opening and reduce puck spin for enhanced puck retention. The T-web top bar is reinforced along the top edge to provide added strength and rigidity and provides a tighter close to the pocket. Internal hand features a design with individual finger sections and back hand adjustment strap to provide optimal glove control and adjustment. The wrist strap has a solid anchor point that provides added leverage so strap can be tightened extremely secure. The palm area of the glove features custom spec construction with added padding and thicker plastic to optimize protection and durability. One piece molded cuff and thumb design features a solid molded component to give a more solid surface area for puck deflection and greater impact resistance. Back hand protection features fingertip deflecting bar and multiple section for added flexibility and opens to access adjustment straps on back of hand and wrist.

- Custom Spec construction with added padding
- Heat moldable for custom fit
- Wide open frontal surface palm area
- Offset T-web design
- Skate lace pocket
- Front molded thumb and cuff component
- Pre-formed palm break
- Molded top thumb and cuff deflecting surface
- Lightweight perimeter balanced for feel

T 7260 VELOCITY INTERMEDIATE

New improved model for 2013, the T 7260 Velocity intermediate catch glove features expanded net coverage with a larger overall perimeter area with larger wider T-web pocket. The glove also features increased padding thickness for a higher level of performance. The design features a higher thumb angle for a more natural relaxed hand position. This gives the glove a more open hand position and creates a wider pocket opening for increased net coverage and naturally moves and directs pucks into the pocket. Large double bar T-web provides an extra deep pocket and the dual bars and skate lace function to reduce puck spin for increased puck retention. The internal fingers are pre-shaped and constructed with dimensional mesh material for cooler play and fast drying. Adjustable back finger strap extends across the lower portion of the fingers and provides for added control and leverage when opening and closing the glove. The adjustable hand and finger strap provide a precise fit and secures the hand in the glove for precision fit and control. The internal thumb tunnel design has a wider adjustable thumb loop surface that gives

superior control adds protection and helps create more leverage to give the glove more precise powerful closing. The back hand padding features a fingertip deflecting ramp to move impacts away from the finger tips. The back hand padding also features multi section design for wrap around hand coverage, greater flexibility and opens for quicker drying and to access adjustment straps. Internal back hand strapping allows the hand to be completely secure in the glove and provides dual adjustment straps to secure the wrist and hand.

- Higher thumb angle provides natural feel
- Open molded palm shape
- Heat moldable for custom fit and fast break-in
- Internal back hand retention for control
- Adjustable wrist strap
- Flex seam and lace break palm for precision closing
- Thumb tunnel design
- No binding cuff adds blocking surface

T 7190 VELOCITY 5

The T 7190 is our junior size glove designed to provide a higher level of protection and performance to a smaller catch glove. The overall design and shape is optimized to allow a smaller hand complete glove control with easy break-in and quick closure. Deep style T-web pocket assists in easy catching and allows for a large full open hand position to create a larger catching surface area. The internal hand features a back hand and wrist strap to increase glove control and provide adjustment. Molded components in the palm front and back thumb areas add stability and protection.

- Large deep T-web
- Internal wrist strap
- Molded thumb and palm protection
- Hand laced construction
- Full back hand padding
- Dual bar T-web to reduce puck spin

T 7110 VELOCITY YOUTH

The T 7110 catch glove is designed and constructed to allow for quick and easy closing which allows young goaltenders to better control the puck while catching. Internal padding with soft sting guard layering and molded plastic in the palm and thumb for added protection. Internal wrist strap provides added control and security for improved glove control. External padding covers the back of the hand for added slash protection while covering pucks along the ice.

- Large deep T-web design
- Molded thumb and palm protection
- Internal wrist strap system

B 7800 VELOCITY 5

The B 7800 features a no binding front blocking surface and incorporates a thicker side profile to add stiffness to the board for improved puck deflection under hard impact loads. The front board section is engineered with a forward angle from the hand position so as to tilt forward to square the blocking surface more to the shooter to give greater net coverage. The bottom edge of the board is beveled to allow the glove to fit tightly to the ice in a paddle down position and reduces weight and improves durability. The top surface of the board features a gradual curved surface to improve puck deflecting angles and also creates added space in the wrist area for increased range of motion. Large side shield gives complete side hand coverage with added layers of High density foam and plastic to further increase protection and stiffness and adds to the overall blocking surface area. Wide cuff with a two piece articulating design allows for added wrist flexibility. Side hand protection is configured with a smaller opening for the stick to fit with a close tolerance to reduce gaps to prevent pucks from traveling up the paddle of the stick and impacting the side of the hand. The finger protector's features floating auxiliary pad over the side index finger with High density foam and plastic insert to increase index finger protection. The padding extends around the tip of the inside edge of the index finger to give more complete coverage. Two piece main finger guards feature foam and plastic layers to add protection and two-piece design adds flexibility to improve stick grip. The palm features a pre shaped curved design to match the natural shape of the hand and keeps a smooth surface to improve grip and provide a precise feel and stick control. The hand components are carefully located and attached to the board to evenly balance the weight for a lighter feel and to keep the glove from twisting under high impact loads on the board

edges for improved puck deflection. The wrist strap encircles the wrist area to give more complete adjustment and allows for more secure fit and glove control. Full Pro-spec construction adds durability and protection throughout the glove.

- Side shield design adds blocking area
- Wider cuff and hand opening
- Reinforced dual finger protectors
- Added side index finger guards
- Molded High density board insert for lightweight
- Back hand cushion padding reduces impacts
- Added Pro-spec plastic inserts for more protection
- Tilt forward board design
- Tapered bottom edge
- Vented side gussets on palm
- Articulating cuff design for flexibility when shooting

VENTUS

B LT90 VENTUS

The new Ventus LT90 custom pro blocker features a unique construction that incorporates the side shield into the front blocking board, this creates added stiffness and reduces twisting under high impact loads and provides a more solid blocking surface. Special high density internal foam board provides light weight and is reinforced with a polyethylene plastic overlay to give added protection and durability. The palm is constructed of our special MSH3 material that gives an incredible feel and durability. The palm is designed with anatomically curved fingers to naturally allow a more comfortable hand position and has a textured overlay surface that provides a precise grip for excellent stick control, mesh gussets allow for air flow to improve hand cooling and reduce heat buildup. Large side and a wrist shield has a high density insert of foam and plastic creating a solid blocking surface area and also features an air chamber pad behind the shield to increase protection and keep the shield square and extended for added coverage. Narrowed taper bottom board edge allows for a quick paddle down movements with a tight seal to the ice with no gaps for more complete protection. Extra-large finger protectors have HD foam and plastic inserts for maximum impact reduction, dual inner index finger pads seal the index finger from shots that can ride up the stick paddle to impact the side of the hand and fingers. The hand position is moved one inch from a normal attachment location on the blocking board to drop the board lower to extend and increase the goaltenders reach

and effectively increasing net coverage. Fully custom hand crafted with Pro-spec construction with added plastic in the front and side surfaces increases protection and durability.

- High density internal foam blocking board for light weight
- Ergonomically shaped palm with cushion padding to reduce vibration
- Large side shield with air cushion pad
- Angled blocking board increases blocking surface area
- Tapered bottom board
- Large wrist opening with flex cuff
- No binding construction increases usable blocking space
- Adjustable wrist strap
- Two piece finger protectors with large surface area
- Dual side index finger protection
- Large top board flare for puck deflecting

B 7990 VELOCITY 5

The B 7990 blocker features a no binding front construction to enhance the blocking area with a firmer outer edge perimeter. The blocking board is designed with a tilt forward to provide an enhanced angle to provide more net coverage. The board features beveled edges to reduce weight around the perimeter and brings the center of balance directly over the back of the hand. This also gives the goaltender added control and limits board twisting when pucks impact the outer edges improving blocking performance. The bottom board bevel allows for a quick paddle down movement to the ice and creates a tight seal allowing no gaps for complete protection. Large side hand shield with high density foam protection and plastic reinforcement for a solid protection and blocking surface. The side wrist area is further protected by an air cushion pad to reduce impact forces on the side of the hand and to keep the blocking surface square. Ergonomically designed palm is designed with each finger having its own unique curve for superior stick grip and control. The palm features vented side gusset construction for heat dispersal and quick drying and a padded palm area to reduced vibrations from stick impacts. The blocker hand is positioned one inch higher

in the board this extends the reach of the board to effectively increase net coverage. Pro design finger protection provides multi layered padding over the side index finger for superior impact resistance. This design provides complete side coverage with no gaps for more complete coverage and protection. Full Pro spec design and construction gives enhanced protection and adds durability.

- Pro design finger protection
- Pro Spec construction
- Tilt forward board design
- Cushion padded back hand
- Adjustable wrist strap
- Light weight perimeter balanced design
- Higher hand position
- Reinforced side hand shield
- Articulating cuff for enhanced wrist movement
- Tapered bottom board

B LT80 VENTUS

The new Ventus LT80 blocker features a unique construction that incorporates the side shield into the front blocking board. This creates added stiffness and reduces twisting under high impact loads for improved precision puck control and more solid blocking surfaces. The hand and palm position is designed to angle and tilt the board forward from the hand this effectively improves the gloves blocking angle to the puck for more net coverage. Special high density internal foam board provides light weight and is reinforced with a polyethylene plastic overlay to give added protection and durability. The palm is constructed of our special MSH3 material that gives an incredible feel and durability. The palm is designed with anatomically curved fingers to naturally allow a more comfortable hand position and has a textured overlay surface that provides a precise grip for excellent stick control, mesh gussets allow for air flow to improve hand cooling and reduce heat buildup. Large side shield with a solid high density foam insert creates a rigid side blocking surface. The bottom board edge is tapered to provide for quick paddle down movements with a tight seal to the ice with no gaps for more complete protection. Extra-large finger protectors have HD foam and plastic inserts for maximum impact reduction. Inner index finger pad closes the index finger from shots that can ride up the stick paddle to impact the side of the hand and fingers. The hand position is moved one inch from standard location on the blocking board to

drop the board lower to extend and increase the goaltenders reach effectively increasing net coverage.

- High density internal foam blocking board for light weight
- Ergonomically shaped palm with cushion padding to reduce vibration
- Large side shield with air cushion pad
- Tapered bottom board
- Large wrist opening with flex cuff
- No binding construction effectively increases usable blocking space
- Adjustable wrist strap
- Two piece finger protectors with large surface area
- Large top board flare for puck deflecting

7 CUSTOM SERIES

This product is available in our Velocity 7 Custom Pro Series. For details and custom order forms go to vaughnhockey.com

THESE STANDARD COLORS AVAILABLE

B 7260 VELOCITY INTERMEDIATE

The B 7260 features a no binding front blocking surface and incorporates a thicker side profile to add stiffness to the board for improved puck deflection under hard impact loads. The front board section is engineered with a forward angle from the hand position so as to tilt forward to square the blocking surface more to the shooter and gives greater net coverage. Larger front blocking surface has been enlarged for greater coverage. The top surface of the board features a gradual curved surface to improve puck deflecting angles and also creates added space in the wrist area for increased range of motion. Large side shield gives complete side hand coverage with added layers of High density foam and increases the overall blocking surface area. Wide cuff opening with a two piece articulating design allows for added wrist flexibility. The side hand protection is configured with a smaller opening for the stick to reduce impacts to the side of the hand. The finger protectors are constructed with a two piece main body and also incorporate a side index guard and fingertip pads to increase coverage area. The palm features a pre shaped curved design to match the natural shape of the hand and keeps a smooth surface to improve grip and provide a precise feel and stick control.

- Large side shield design adds blocking area
- Wider cuff and hand opening
- Adjustable wrist strap
- Reinforced dual finger protectors
- Added side index finger guards
- Molded High density board insert for lightweight
- Back hand cushion padding reduces impacts
- Tilt forward board design
- Tapered bottom edge
- Vented side gussets on palm

THESE STANDARD COLORS AVAILABLE

B LT60 VENTUS JUNIOR

The new Ventus LT60 junior sized blocker features a unique construction that incorporates the side shield into the front blocking board for a firmer stronger construction. Special high density internal foam board provides light weight and is reinforced with a polyethylene plastic overlay to give added protection. The palm is constructed of our special MSH3 material that gives an incredible feel and grip and durability. Large side shield increases side hand protection and increases net coverage during side impacts. The bottom board edge is tapered to allow for quick paddle down movements with a tight seal to the ice. Extra-large finger protectors have HD foam and plastic inserts for maximum impact reduction. Inner edge index finger pad covers the index finger from shots that can ride up the stick paddle to impact the side of the hand and fingers.

- Large side shield
- Tapered bottom board
- Large wrist opening with flex cuff
- No binding construction effectively increase usable blocking space
- Adjustable wrist strap
- Two piece finger protectors with large surface area
- Large top board flare for puck deflecting

B 7190 VELOCITY 5

The B 7190 is our junior size blocker. It is scaled to provide the maximum blocking area but provide a precise fit for good glove control. Lightweight construction with less mass allows younger goaltenders quicker movements. Large side shield adds side hand protection and added blocking area. Articulating cuff provides increased volume in the wrist area to allow arm padding to overlap for complete protection and increased wrist movement. Adjustable wrist strap provides added glove control and large finger protectors also features side index finger padding for more complete coverage. The blocking board is designed with beveled edges to reduce weight and improve balance and performance. Reinforced palm with double wear layer for durability and mesh gussets provide easy flex and ventilation.

- Adjustable wrist strap for control
- Tapered bottom board
- Reinforced palm
- Articulated flex cuff
- Side hand shield
- Light weight perimeter balanced design

Velocity

B 7110 VELOCITY YOUTH

The B 7110 youth blocker is designed with the younger goaltender in mind. Lower hand position allows for easy stick pick-up and paddle down moves to the ice. Large top board curve gives added wrist movement and allows for greater mobility. Full thickness blocking surface along with molded plastic reinforced fingers and thumb for added protection.

- Side hand shield for added net coverage and protection
- Split finger protectors for hand dexterity and movement
- Durable quick drying palm

Goal Masks

VM 9500 SB

The VM 9500 SB goal mask features a complete composite outer shell constructed with Carbon and Aramid fibers for lighter weight and strength. The shell is high pressure molded and infused with epoxy resin to ensure complete saturation of the composite fibers and heat cured to provide durability and a smooth finish. The shell shape is carefully designed and contoured to move impact loads away from the frontal impact areas. Flared chin allows the mask to be tucked in the chest area to better protect the neck area. Extra wide facial opening provides enhanced vertical and peripheral vision. The cage design is optimized to provide true vision sight lines and positions the cage bars to achieve for optimum clarity and features stainless steel construction for durability and low glare. Internal padding of lightweight pro VN foam has full coverage and no gaps for continuous protection, padding is completely removable to allow for cleaning and maintenance.

- Available in standard colors: Black, White, Navy, Red
- Available in Adult size: Medium and Large

VM 9500 CC

The VM 9500 CC model features the same design and construction as our VM 9500 but with the certified Cat eye styled cage.

VM 9500 PC

The VM 9500 PC is the same design and features as our VM 9500 but features a non certified large eye opening Pro cage.

VM CUSTOM PRO

Hand crafted custom goal mask, used by professional goal tenders. Made to order only.

VM 7700 SB

The 7700 SB goal mask is engineered to provide increased performance with greater visibility and sight lines. The shell shape has been carefully contoured and molded to reduced flat spots in the design to reduce impacts in critical areas and provide lighter weight and higher strength. The flared lower chin provides added rigidity and allows the goaltender to close off the area between the neck and chest for greater protection coverage. Full inner shell padding with no gaps in impact areas gives complete coverage and meets all new certification rules. Dual density vinyl nitrile VN padding provides exceptional protection, comfort and fit. The cage design has been optimized to provide true vision sight lines and positions the cage bars to achieve maximum forward and peripheral vision. Cages are all constructed from high grade stainless steel with a low luster finish to reduce glare and blend into the ice surface to increase visibility. The stainless steel will not rust and provides added durability. All attachment hardware is manufactured in stainless steel for strength and durability to increase longevity. Full skull plate harness with heavy duty elastic straps and buckles provides complete adjustment. The chin cup features a quick change Velcro adjustment to allow the goaltender more options on fitting. Vent holes are positioned to facilitate rapid air ventilation and heat dispersal for cooler play.

- Pro style shape for enhanced fit
- Dual density internal lining
- Light weight
- Stainless steel cage and attachment hardware
- Pro style adjustable harness.
- Narrow profile chin area
- Adjustable chin cup and low profile chin strap
- Chin cup with anti bacterial treatment
- Replaceable sweat band
- Mask comes with padded carry bag
- Standard colors of Black, Navy, Red and White
- Graphic decal and paint options available
- Available with straight bar or certified cat eye cage style
- Fully HECC, CSA and CE certified
- Available in non certified large eye opening Pro cage
- Available in sizes adult Small, Medium, Large

VM 7700 CC

The VM 7700 CC model features the same design and construction as our VM 7700 but with the certified Cat eye styled cage.

Goal Masks

VM 7500 SB

The VM 7500 SB goal mask is designed and engineered to create optimal visibility. The recessed cage area moves the cage closer to the eyes which improves vision and gives wider sight lines. Anatomically designed for optimal fit and performance with raised mold lines that reduces flat spots for superior puck deflection to lessen impacts. High impact shell is constructed in special high strength Lexan material that is custom engineered for greater impact resistance. The shell is engineered with precisely located ridge lines that add strength and reduce shell flex under high impacts. The jaw area is profiled with a flared lower short chin to give superior downward visibility and allows the mask to be fitted closer to the face for improved visibility. The chin design allows the mask to be tucked in tight to the chest to provide more protection and allows for added adjustment to the chin cup for a more custom fit. Large air vent holes and face opening are designed to provide maximum ventilation to reduce heat build up. The cage is constructed entirely of low luster stainless steel for added durability and reduced glare for optimal visibility. High density pro style vinyl nitrile foam liner provides durability and is low water absorbing to provide light weight and comfort.

- Available in standard colors: White, Black, Red, Navy
- Adult sizes: SM, STD, XLG and Junior
- Available in graphics as shown
- Available with straight bar cage and certified Cat-eye style cage
- Full CSA, HECC and CE certification

VM 7700 JUNIOR

The 7700 junior provides our same adult styling for the younger youth goaltender. The shell shape has been carefully contoured and molded to reduce flat spots to reduce impacts in critical area and provide light weight and a high strength structure. Flared lower chin provides added shell strength and allows the goaltender to tuck the mask in tighter to the chest to protect the neck region. Full inner shell padding is designed with no gaps between the padding to ensure continuous protection from any angle of impact. Cage design is optimized for maximum forward and peripheral vision. Cage is a straight bar design with low profile bars to reduce glare. Molded chin cup with Velcro adjustment straps and adjustable chin strap allows for proper alignment to ensure proper fit. Vent holes are positioned to facilitate rapid air circulation for heat dispersal and cooler play.

- All stainless steel fasteners for durability
- Removable head band
- Pro style rear adjustment harness
- Chin cup features anti-bacterial treatment
- Straight bar cage with low profile bar design
- Pro style shape for enhanced fit
- Fully CSA, HECC, and CE certified
- Available in Black or White

Robin Lehner

VM 7400

The VM 7400 goal mask is designed and engineered to create optimal visibility with a recessed cage area that improves peripheral vision and gives wider sight lines. Anatomically designed for optimal fit and performance with raised mold lines that reduce flat spots for superior puck deflection to lessen impacts. High impact shell constructed with a specially engineered high strength injected Lexan material is custom engineered for greater impact resistance. The shell is engineered with precisely located ridge lines that add strength and reduce shell flex under high impacts. The design provides maximum downward visibility and the flare at the bottom of the chin allows the mask to be tucked in tighter to the chest for added coverage. Air vent holes and face opening are designed to provide maximum ventilation to reduce heat build up. The cage is constructed from high tensile carbon steel and features a silver powder coated surface for added durability.

- Available in Black or White
- Sizes: Adult STD, Junior
- Fully CSA, HECC, and CE certified

Goal Pants

P 7800 VELOCITY 5

The Velocity 5 goal pant is designed to achieve a maximum amount of net coverage and still provide excellent flexibility and ease of movement. The 7800 goal pant uses new molded high density hips and thigh pads to reduce weight and increase protection. The design and internal molded components improve the pant balance and fit for enhanced performance. Internal thigh cradle design has been designed to provide thigh pad stability and limits thigh pad twisting for greater puck stopping and deflecting. Large five-hole rolls with internal support padding give quick rapid closure to reduce any openings in the five-hole area between the thigh guards. Full length stretch crotch area and inner thigh area provide increased flexibility and ventilation. Large side groin pads square up the frontal area of the pant and add protection. Rear leg split in the shell keeps the thigh pads properly positioned while going down so the thigh pads achieve greater coverage above the knee area. Orange Hydro quick mesh internal lining provides light weight, comfort, durability and faster drying. Constructed with high tenacity nylon exterior for water resistance the nylon surface allows the pant to move along the ice without grabbing to allow for quicker movement. Front area features an internal belly pad for added protection and a laced frontal area to provide adjustment. Wide profile design and contoured waistband provides added comfort and allows the chest pad to be worn inside or outside the pant.

- Thigh cradle technology keeps thigh pad square for maximum net coverage
- Lace up frontal area for adjustment
- Adjustable full diameter belt
- Rear leg split on pant shell
- Front side groin pads to square up blocking area
- Inner leg and crotch stretch for added flexibility
- Available in Black, Navy, Red and custom colors
- Available in sizes: SM (36-38), MED (40-42), LG (44-46), XLG (48-50), XXLG (52-54)

Note: add 8-10 inches to actual waist size then match to appropriate pant size.

P LT90 VENTUS

The new Ventus LT90 goal pant is designed with a large diameter upper waist section for a loose fit and to give complete coverage when pulling the arms into the body in a blocking position. Large thigh guards are designed to stay centered on the thighs and hang naturally to help fill the five-hole area and create added net coverage. The wide front profile features side groin pads that hold the pant outward at the hip region increasing coverage even more. The side groin pad extensions are constructed with HD inserts to maximize flexibility while increasing protection. Large molded hip sections and extended length tailbone protection provide greater protection. The rear leg features a vertical shell split at the rear of the leg that allows the thigh area to stay in position and resist being displaced while moving down to the ice. This also helps to optimize the thigh guard positioning in the five-hole area for maximum performance.

- Hydro quick internal lining
- Adjustable belt for custom fit
- Skate lace front for added adjustment
- Reinforced tab mounted suspender buttons
- Inner thigh five-hole padding
- Contoured front waist and belly flap
- Full stretch crotch and inner leg panels
- Available in Black, Navy, Red and custom colors
- Available in sizes SM (36-38), MED (40-42), LG (44-46), XLG (48-50), XXLG (52-54)

Note: add 8-10 inches to actual waist size then match to appropriate pant size the extra room is needed because of the padding thickness and to allow for your chest protector.

VENTUS

P 7460 VELOCITY 5

The 7460 Velocity 5 goal pant is constructed and tailored specifically to work with the movements of a goaltender to give optimum performance and comfort. Wide thigh guards feature a slight curve and are designed to give maximum blocking surface and fill in the five-hole area when going down to the ice surface. Sport mesh lining for low water absorption and quick drying. Large side abdominal floating pads extend down to the side groin area for added protection and give the pant flexibility while in a crouched position. Front contoured waist gives a lower front profile for chest pad fit and easier bending while in a crouched position.

- Inner thigh HD blocks with internal support padding
- Adjustable belt with double front pull adjustment
- Low profile thigh guards fit well under tall leg pads
- Extended tailbone protection
- Full stretch crotch and inner leg panels for flexibility
- Available in Black, Navy, Red and custom colors
- Available in sizes XS (32-34), SM (36-38), MED (40-42), LG (44-46), XLG (48-50), XXLG (52-54)

Note: add 8-10 inches to actual waist size then match to appropriate pant size.

VENTUS

P LT80 VENTUS

The Ventus LT80 goal pant is designed with a wide profile cut to create added room and comfort with a large diameter upper waist section for a loose fit and to give complete coverage and flexibility for improved body movement. Wide style thigh guards are designed to stay centered on the thighs and hang naturally to help fill the five-hole area. Large side thigh slash pads help to extend net coverage and increase the protected areas and square the edge of the pant and provide a stiff blocking surface. Quick dry internal mesh lining provides for added comfort and increases air flow around the body to reduce heat retention. Front side groin pads that hold the pant outward at the hip region increasing protection coverage and square up the frontal area of the pant. Large molded hip sections and extended length tailbone protection provide expanded protection. The rear leg features a vertical shell split at the rear of the leg that allows the thigh area to stay in position and resist being displaced while moving down to the ice, this helps optimize the thigh guard positioning in the five-hole area for maximum performance.

- Adjustable belt for custom fit
- Skate lace front for added adjustment
- Mesh lining for cooler play
- Reinforced tab mounted suspender buttons
- Inner thigh five-hole padding
- Contoured front waist and belly flap
- Full stretch crotch and inner leg panels
- Available in Black, Navy, Red
- Available in sizes SM (36-38), MED (40-42), LG (44-46), XLG (48-50),

Note: add 8-10 inches to actual waist size then match to appropriate pant size the extra room is needed because of the padding thickness and to allow for your chest protector.

Goal Pants

P 7490i VELOCITY INTERMEDIATE PRO

The 7490i Velocity intermediate pro goal pant is designed and optimized for performance and protection. Large five-hole blocks with internal support padding provide for added protection and faster more solid closing of the five-hole area. Rear leg splits in the pant shell help keep the thigh guards positioned properly while going down to the ice for added net coverage. Side groin floating flex pads add blocking area and increase protection.

- Lace-up front for added adjustment
- Intermediate sizing and increased protection
- Adjustable belt for customized fit
- Rear leg split to optimize performance
- High density inner thigh protection
- Large thigh guards with cushion padding
- Available in Black, Navy, Red and custom colors
- Available in sizes: MED (24-26), LG (26-28), XLG (28-30), XXLG (30-32)

P LT60 VENTUS JUNIOR

The Ventus LT60 junior goal pant is designed with a wide profile cut to create added room and comfort with a large diameter upper waist section for a loose fit and to give complete coverage and flexibility for improved body movement. Wide style thigh guards are designed to stay centered on the thighs and hang naturally to help fill the five-hole area. Side thigh slash pads help to extend net coverage and increase the protected areas. Quick dry internal mesh lining provides for added comfort and increases air flow around the body to reduce heat retention. Front side groin pads hold the pant outward at the hip region increasing protection coverage and square up the frontal area of the pant. Large molded hip sections and extended length tailbone protection provide expanded protection. The rear leg features a vertical shell split at the rear of the leg that allows the thigh area to stay in position and resist being displaced while moving down to the ice, this helps optimize the thigh guard positioning in the five-hole area for maximum performance.

- Adjustable belt for custom fit
- Skate lace front for added adjustment
- Mesh lining for cooler play
- Reinforced tab mounted suspender buttons
- Inner thigh five-hole padding
- Contoured front waist and belly flap
- Full stretch crotch and inner leg panels
- Available in Black, Navy, Red
- Available in junior sizes SM (20-22), MED (24-26), LG (26-28), XLG (28-30)

P 7190 VELOCITY JUNIOR

The 7190 junior goal pant is designed specifically to match the body movements of a goaltender to allow increased range of motion and flexibility. Wide upper waist section allows for chest protector to be tucked into the pants if desired, front belly pad and side groin padding improves frontal impact protection. Thigh guards are shaped specifically for a goaltender to maximize net coverage, and also feature molded side slash protection and added padding on the inside of the thigh. Large tailbone padding, lower back extension and reinforced kidney and hip pads complete the protection to vital areas.

- Padded adjustable belt
- Extended lower back protection
- Cool fit mesh lining
- Available in Black only
- Available in sizes: SM/MED (20-24), MED/LG (24-28)

VGS LT90 VENTUS

The new Ventus LT90 composite goal stick is designed to achieve a new standard in light weight, feel and balance with an average weight of 690 grams. The paddle area features a flat frontal profile to effectively increase square inch blocking area. Constructed of pure carbon fiber composite and epoxy resins all layered in a precise schedule of layers to provide incredible strength, durability and controlled stiffness. Internal ribbed chambers in the blade and paddle add strength and allow for increased stiffness along the edges of the paddle and reduce twisting motion under impact and while shooting for a cleaner crisper feel with more power. High impact foams laminated into the inner core of the paddle reduces and dampens vibrations from impacts and prevents unwanted paddle flexing. The entire stick is molded under high pressure and heat to precisely control the shape and cure of the resin system to ensure optimum performance and consistency.

- Extreme light weight, average under 700 grams
- Incredible balance point
- Foam dampened paddle
- Mid blade twist curve pattern
- Full Pro-Spec SOP patterns and construction
- Flat paddle design
- Dimpled texture on shaft for added grip
- Rounded heel reduces wear
- Natural carbon finish on paddle and blade
- Black/white color combination only
- Available in Paddle heights 25", 26", 27"

Textured Grip Finish

Mid Heal Twist

Thomas Greiss

VGS 7990 COMPOSITE GOAL STICK

The 7990 pro composite goal stick is constructed with 100% carbon fiber to achieve extreme light weight with superior balance for incredible feel and performance. Paddle area has a flat profile on the frontal surface to make for a more effective blocking surface and has reinforced internal layering of carbon graphite to strengthen the edges of the paddle. The blade features internal rib structures for added durability and stiffness. The design and construction functions to limit twisting with internal foam core to absorb shock to reduce rebounding and feel. High density foam in the paddle area reduces and dampens vibrations from impacts and prevents unwanted paddle flex and twisting. High pressure heat molded to ensure full resin transfer to all fibers for added strength and consistency.

- Rounded heel prevents wear and improves shooting
- Mid blade twist curve
- Light weight balanced construction
- Paddle height available in 25", 26", 27"
- White color with Black carbon blade and graphics

Matt Hackett

Mid Blade Twist

VGS 7490 COMPOSITE GOAL STICK

The 7490 goal stick has full graphite carbon fiber and fiberglass construction for extreme light weight and superior balance and feel. The blade is constructed with special high tensile strength fibers and resins with internal ribs for added strength. It features a high density internal core to absorb shock to reduce rebounding and provides excellent feel and control of the puck. The paddle area is shaped with a thin profile design and is constructed with a full composite exterior. It has a high density internal foam core to dampen impacts and prevent unwanted paddle flex. This gives the stick incredible response by preventing torsional twisting and also provides additional stiffness for shooting and poke checking. The edges of the paddle are reinforced with additional layers of fiber to limit chipping and add strength. The molding process is completed under extreme high pressure and heat to ensure full wet out of all the fibers, to ensure complete structural bonding of all the layers of fiber and adhesion to the internal foam core for added durability.

- Paddle height available in 25", 26", 27"
- Full composite construction for light weight
- Heel twist blade curve
- Rounded shoulder at top of paddle
- Internal foam core for low vibration
- Rounded heel area for easy shooting and stick handling
- Available in opposite hand curve
- Available in White tribal graphic

Joey MacDonald

Heel Twist Curve

Mid Blade Curve

VGS 7800 FOAM CORE

The 7800 goal stick is manufactured with foam core construction with internal composite inserts encapsulated in the foam core in the blade and paddle areas for greater strength and light weight. Laminated wood handle with Birch and Aspen layers provides a constant flex and solid feel and allow for exceptional control while shooting. The paddle is a stiffer construction that is achieved with a special pre-laminated hard composite that is bonded to the stick for exceptional strength and rigidity. The blade area is high temperature molded with special epoxy resin and also contains hard laminate composite inserts on front and back of blade to provide added strength for durability and to limit blade flex while shooting for stronger more precise shots. Reinforced heel area contains an ABS plastic insert that is bonded with the foam core to prevent heel splitting to increase durability. The 7800 goal stick has exceptional balance and is available in paddle heights of 24", 25", 26", 27", custom patterns and colors can also be made with a dozen minimum quantity.

- Stiff construction provides exceptional performance
- Hard laminated composites on outer surface increase durability
- Foam core construction for light weight
- Available in several paddle heights and curves
- Standard in natural finish or black

Heel Twist Curve

VGS 7460 FOAM CORE

The 7460 goal stick features a foam core internal paddle and blade blended with a laminated Aspen wood handle for excellent balance and feel. The foam core is compression bonded under heat and pressure and molded with a glass exterior to provide stiffness and durability.

- Available in paddle heights 24", 25", 26", 27"
- Heel twist curve with rounded heel and square shape blade end
- Available in White or Black
- Light weight foam core construction

Antti Niemi

VENTUS

VGC LT90 VENTUS

The Ventus LT90 goal cup features advanced double cup design for the ultimate in protection. The internal cup is an advanced design that provides multi stage impact protection. The outer cup is a combination of half inch foam and plastic to dissipate and absorb initial impact for true double layered protection. Contoured waist sectioned area for added flexibility and comfort. Adjustable waist and leg support straps. Durable sport mesh and nylon construction. Available in three colors: standard Black, Black/Red and Black/Navy. Fits waist sizes 32" to 44". Also available in an intermediate size.

VGC LT90 Intermediate - fits waist sizes 25" to 32"

Navy/Silver

Red/Silver

VGC 7800 VELOCITY

The Velocity goal cup features a contoured top waist with high-density padding. Layered foam padding throughout for additional comfort and protection. Large side cushion bumpers and banana-style cup features foam edge bumpers for greater protection. Available in three colors: Black/Silver, Red/Silver, and Navy/Silver. Fits waist sizes 32" to 44"

VGC 7490i - fits waist sizes 25" to 32"

VGC 7460

The 7460 Velocity goal cup features a contoured front waist band with HD foam inserts. Large dimensionally molded cup with foam edging, the exterior of the cup also features large cushioned impact bumpers for added comfort and protection. Adjustable waist band and leg straps fits waist sizes 30" to 44".

VGC 7260

The 7260 Velocity junior goal cup features a contoured front waist band with HD foam inserts. Large dimensionally molded junior sized cup with foam edging, the exterior of the cup also features large cushioned impact bumpers for added comfort and protection. Adjustable waist band and leg straps fits waist sizes 20" to 31".

WPP 900

The women's pelvic protector features a high-density reinforced lower abdominal area contoured for comfort and fit, a full adjustable waist strap with Velcro closure and molded plastic protection with foam padding.

- Durable nylon exterior
- Internal molded foam and plastic
- Fits waist sizes: 26" to 36".

Goal Bags

BG 7800

The BG 7800 goal bag is designed to hold a complete set of adult size goal equipment. The bag is constructed with a durable high strength 1680 denier nylon and reinforced with rip stop nylon in critical high stress areas. Carry straps are box stitched and reinforced for added strength. Three wheel design has large size wheels that help keep the bag from dragging on the bottom edge when heavily loaded. Internal storage pockets with zippers on each side and one end for added storage inside the bag. Wide U shaped opening for easy access and added straps across the top of the bag can be adjusted to keep the equipment from shifting and keeps the equipment centered in the bag for easier pulling or carrying of the bag.

- Dimension: 43" long x 21" high x 20" wide
- Available in black only

BG 9400

Full adult size goal bag is designed to fit a full set of equipment. The bag features a 1200 denier nylon construction and reinforced in wear and stress areas on the corners and bottom. Heavy duty webbing and straps with added rivets on the carry handles for increased durability. Three wheel design with larger style wheels for easier pulling. Large U shape top opening with heavy duty #10 zipper for easy access. Two internal pockets on each side of bag for added storage.

- Dimensions: 43" long x 21" high x 20" wide
- Available in silver/black only

BG 7490i INTERMEDIATE

The BG 7490i goal bag is designed to hold a complete set of intermediate size goal equipment. The bag is constructed with a durable high strength 1680 denier nylon and reinforced with rip stop nylon in critical high stress areas. Carry straps are box stitched and reinforced for added strength. Three wheel design has large size wheels that help keep the bag from dragging on the bottom edge when heavily loaded. Internal storage pockets with zippers on each side and one end for added storage inside the bag. Wide U shaped opening for easy access and added straps across the top of the bag can be adjusted to keep the equipment from shifting keeping the equipment centered in the bag for easier pulling or carrying of the bag.

- Dimension: 35" long x 18" high x 20" wide
- Available in black only

BG 7460

The 7460 goal bag is extra super sized to hold an entire set of adult size equipment. The bag features extra heavy 1680 denier nylon construction with all internal seams double stitched and bound for added strength. Large number ten coil zipper for added strength and allows the bag to be fully opened for easy access. Heavy duty webbing reinforces the sides and ends of the bag. Large nylon carry handles with box stitched reinforced seams for durability and reinforced hand grasp handles at each end. Reinforced bottom corners with air vent grommets add durability and strength to the construction. The entire bottom surface of the bag is double layered for added strength and water resistance.

- Dimension 44" long x 22" high x 24" wide
- Extra rugged 1680 nylon construction
- Large #10 zipper
- Reinforced corners
- Internal mesh removable wash bag
- Available in black only

BG 9200

The BG 9200 is designed to fit a full set of junior sized equipment. The bag features a 1200 denier nylon construction and reinforced in wear and stress areas on the corners and bottom. Heavy duty webbing and straps with added rivets on the carry handles for increased durability. Three wheel design with larger style wheels for easier pulling. Large U shape top opening with heavy duty #10 zipper for easy access. Two internal pockets on each side of bag for added storage.

- Dimensions: 34" long x 18" high x 20" wide
- Available in silver/black only

VPC 8000

Shirt style clavicle and neck protection holds unit more securely in place for added protection and comfort. Mesh outer shirt construction to reduce heat build up, cut resistant BNQ certified design.

- Available in sizes MED, LG
- Black only

VPC 7460

The 7460 clavicle protector has high-density plastic and foam layered padding and an adjustable neck strap with durable soft textured sport mesh vented lining and nylon exterior.

- Available in assorted colors

VPC 7260

- Junior size model

VPC 7000

The 7000 clavicle protector has a full ballistic nylon exterior, Velcro adjustable closure and soft internal padding with high density foams for shock dispersal.

- Available in Adult sizes: MED, LG
- BNQ certified
- Available in Black, Navy, Red

VPC 7000 JR

- BNQ certified
- Available in Black, Navy, Red
- Available in one size only

VTG 7800 PRO

The 7800 pro throat shield is designed with a wide profile chin with a flare at the lower edge that allows the unit to fit tight to the upper chest the added width gives a wider area of coverage to the neck. Injection molded with a raised perimeter edge that provides added rigidity and stiffness for improved puck deflection. Molded in a tough Lexan polycarbonate material for shock resistance and maximum durability and visual clarity.

- Available in Clear, Smoke, Blue tint, and Red tint.

VTG 7600

The 7600 throat shield is designed with a curved and flared chin area that allows the unit to fit tighter to the upper chest for added protection and allows the unit to slide across the jersey without catching and limiting head motion. Molded in Lexan polycarbonate for maximum durability, shock resistance and clarity.

- Available in Clear, Smoke tint, Blue tint, Red tint

VTG 7360 Intermediate/Junior - Clear only

VKP 7990 KNEE/THIGH GUARD

The VKP 7990 Pro knee and thigh guard features a three piece design that allows for a close fit and superior flexibility. Molded high density polyethylene plastic and foam inserts overlap to eliminate gaps and are contoured to wrap around the thigh and knee for more complete coverage. Double shield protection is attached over the knee and lower thigh for maximum protection. Wide inner knee padding provides cushioning to reduce side knee impacts. The inner knee section is lined with synthetic leather for durability and to provide a non-slip surface. New adjustable garter belt supports the pads and keeps in precise alignment for improved performance.

- Available in Black, Navy, Red
- Grater belt is available separately
- Also available in a VKP 7990 intermediate model garter belt is optional on the intermediate size.

Black Red Navy

VKP LT80 KNEE/THIGH GUARD

The new VKP LT80 knee and thigh guard is designed with a low profile knee area for a natural fit into the leg pads. Cushion padding on inner and outer areas of the knees. Large molded knee cap gives increase protection coverage. Molded thigh section extends to protect the inner thigh area. Dual elastic straps with grip strips secure the pad to the leg for optimal fit.

- Available in black only
- Also available in a junior **LT 60 model.**

VKP 7460 KNEE/THIGH GUARD

The VKP 7460 knee and thigh guard features a three section design for a close fit. Plastic reinforced thigh padding in two sections and a separate knee section with a low profile construction for a close fit. Three adjustable elastic straps with Velcro closure for full adjustment. Available in Black, Navy, Red. **VKP 7260 Junior**
