GOAL SKATES

GX1 PRO GOAL SKATE

All new for 2014 the GX1 goal skate is ergonomically designed to meet the unique biomechanical needs of a goaltender to achieve maximum performance and comfort. Fuller side counters allow the boot to fully wrap the foot for support. Unique patent pending forward pitch boot allows the goaltender to be in an anatomically correct body position for the quickest movements and increased speed. Wider toe cap gives superior fit and keeps the inner edge and toes from being distorted. This keeps the foot more firmly seated on the foot bed for more control. The ankle area features anatomically correct ankle pockets for a precision fit to allow the foot to stay properly positioned in the boot and prevent heel lifting. Large tongue features a base of orthopedic felt with an Ultra-high density molded inner core to spread lace pressure and a comfort padding to provide cushioning against the instep. Taller side ankle supports are contoured and blend to a rear neoprene comfort color that flexes to allow for increased ankle flex giving greater thrust during a push off. Full carbon fiber outsole gives the boot strength to allow for full power to be applied to the blade without twisting. The boot is lasted and molded under heat so the boot is formed for a precision fit and shape for superior performance and comfort. The shell is specifically designed with an angled inner edge that allows the goaltender to get a more aggressive angle to the ice. The angle functions as a secondary stopping point that allows the goaltender to balance on a flat surface in a half butterfly position providing superior skate control for quicker body positioning. Full toe cap coverage is designed with thicker construction in the high impact areas for added protection. The inner edge of the boot and up to the inside

ankle is fully covered by the shell to increase protection which is critical for goaltenders who wear their pads looser exposing more of their foot. The inner edge features two trim lines so the shell can be customized and be trimmed to a lower point to reduce weight for goaltenders that prefer less coverage on the inner areas of the foot. The rear support post is angled so the bottom leg pad strap sit correctly on the post to prevent excessive wear and give a superior support for more pad control. The front post is designed in a V shape so the tie on toe assembly stays properly positioned when tightened and does not fall down giving the pad proper support off the ice. The blade is a stainless steel construction and features three attachment points for redundancy to prevent catastrophic blade attachment failures. The blades front two attachment points are closer together. This increases blade strength and reduces flex providing more power to get transferred to the ice for more powerful push offs and stride.

- · Unique boot designed specifically for a goaltender
- Full volume for superior foot support and fit.
- Taller side quarters provide more support
- Lean forward design for anatomically correct foot and ankle positioning
- · Full carbon fiber outsole
- · Large tongue with Molded inner components
- · Full shell with maximum protection
- Three point blade attachment
- Available in adult sizes 6 to 12

Angled bevel resting spot

Comfortable Arch Support

VPG 2000 VELOCITY V6

The new 2000 model leg pad is an all new design for 2014 with several new innovations and performance features. Full knee roll style construction on the pad front surface allows for easy flexibility. Sectioned outside rolls feature a wide profile and have flex segments above and below the knee giving great flexibility. Firm outer edge on the outer rolls provides a firm blocking edge to the pad. The pad internal's now feature our new Pro Core design. This new design provides a full length and width frontal foam core that keeps the pad consistent in height and width yet still has the foam flex stuffing next to the leg so the pad can fully conform to leg and break-in to the individual's style of play. This design preserves the incredible feel, control, and rebound that the Velocity pad is famous for. The pad front core features a Carbon fiber recoil plate in the knee and upper thigh section. This allows the pad to bend easily but return the pad to shape after it is flexed providing superior pad positioning and performance. Smooth inner pad edge has no exposed binding in the sliding area to give a true faster more controlled slide along the ice. Dual knee straps and movable buckle locations on the upper three straps allows the goaltender to customize the pad strapping to their style to provide added comfort and pad control. The leg cradle is cushioned, padded, and lined with our proprietary MSH3 material for control and quick pad rotation. The leg cradle features inside and outer protective pads and with an adjustable center strap that allows variable tension adjustment to fine tune pad rotation. Large wider knee cradle features a double layered elastic adjustment strap that is angled to fit the contours of the knee bend precisely. Large inner knee landing area is extended to give the knee more

protection and shock dispersal when contacting the ice. Over squared inside thigh area fills the upper section of the pad to a full 11 inch maximum width and reduces five-hole openings when in a butterfly position. The lightweight design and the new Pro Pac technology with the carbon fiber recoil plate are all carefully optimized to give the pad light weight with even weight distribution and balance to maximize performance and feel.

- Full Pro Spec construction fully domestic manufactured
- Dual knee straps with side buckle adjustment
- Adjustable top thigh strap and buckle
- Wide knee cradle
- Leg cradle with tension adjustment
- Firm inner pad edge for improved Five-hole coverage and seal to the ice
- Wide inner edge and landing pad are for superior balance
- New V6 graphics give a visual taller pad appearance
- Firm perimeter edges for stronger blocking surface
- Over squared top thigh rise
- Plus 2 thigh rise sizing
- Molded lace in adjustable thigh guard
- Pro Pac internal core for excellent rebound control
- Carbon fiber recoil plate for enhanced performance
- Available in sizes 31+2", 32+2", 33+2", 34+2", 35+2", 36+2", 37+1" and custom sizes

VPG LT90 VENTUS

The LT90 Ventus design features a full flat front surface with a one piece solid outside roll to give the pad a solid firm shape. The lower scoop break over the skate has a specific design and construction that keeps the pad semi-ridged in this area so the pad keeps the shape and profile even after it is broken in. The pad is constructed around an internal foam core that is constructed with multiple density and thicknesses of foam in a precise arrangement to give the pad a very solid frontal blocking surface and firm perimeter edges for more effective blocking area. The internal core of the pad has multiple layers of foam in varying densities that allows the structure to flex and twist in critical locations to improve performance by allowing the pad to flex, this reduces and limits stress to the knees and hip joints allowing for proper anatomical pad position. This gives the goaltender added extension in the butterfly and faster pad rotation to square up the pads and increase blocking surface even faster. The internal edge of the pad is designed with a wide landing area at the knee, this creates added surface area for increased pad and body balance and also extends the knee landing pad farther behind the knee for increased coverage. The inner shin structure has a wide five-hole pad with a flat structure that flares and widens at the ankle and into the side scoop of the pad. This aligns the pad square to the ice and allows for more stability and control when sliding and moving on the ice. The internal knee cradle has an angled strap system that positions the straps below the bend in the knee for added comfort and less friction during pad rotation. Dual adjustable knee straps allows for custom adjustment and supports the knee in the body of the pad to elevate the knee from the ice surface to provide superior and ergonomically correct body positioning. The inside knee landing pad is built with a special EVA foam cushioning system that reduces G impact loading and softens the impact transfer to the knee. The leg cradle features a wide inside landing pad that is shaped to encapsulate the leg and cushion the body weight while going down on the ice surface. The outer leg cradle pad is sculpted to

cover the calf and extend coverage into the side profile of the pad to cover gaps when tight up against the post to eliminate openings. The knee cradle and leg cradle function to provide precise pad control and faster pad movement, this makes the pad move precisely with the goaltenders leg for faster response and creates a pivoting hinge so the pad will quickly rotate around the leg to effectively square up the pad to the most effective blocking position.

- · One piece outside roll structure
- · Inner core for precise pad shape
- Extreme light weight with superior pad balance
- Tall plus 2" sizing
- · Adjustable outside knee area buckle strap
- · Dual leather knee straps system
- · Optional top thigh strap can be added
- · Laced in adjustable thigh guard
- · Off set tie on toe assembly with lace adjustment position
- · Pre-shaped firm design and construction
- · Ventus graphics give a taller, longer appearance
- · Curved upper side profile helps close five-hole when in a butterfly
- Optional knee flex design with defined knee section and outside roll breaks for more flexibility
- Available in sizes 30+2", 32+2", 33+2", 34+2", 35+2", 36+2", and custom sizes

VPG 2200 VELOCITY V6

The new 2200 custom pro model goal pad has a full flat face design constructed to give precise puck control. All new Pro Core inner foam technology gives the pad a precise shape and provides a firm density that extends to the edges of the pad to create more effective blocking surface. The new Pro core system features a layer of high performance Carbon fiber through the entire length and width of the pad. This enhances the performance even further by strengthening the internal padding for greater durability and preserves the ideal performance over the life of the pad. The carbon fiber forms an internal recoil plate that functions as a spring that assists the pad after flexing to return to the original shape. This carbon fiber enhanced system aids the pad in extending the thigh sections to give superior five-hole coverage when on the ice and to assist in movement recovery. This system is so unique and advanced it is already patent pending. Over square inner thigh rise holds the pad firmer against the ice to help eliminate gaps in coverage. Smooth inner pad edges allow for faster more consistent movement along the ice surface, this also creates a tighter seal against the ice for improved net coverage. The inside knee and calf landing areas provide a wide area to give superior balance and greater pad control for faster movements. The pad features a wide leg cradle with inner and outer protective panels with an adjustable elastic strap to provide rotation adjustment. The pad profile shape is designed specifically to form the pads to the natural shape of the goaltenders legs during play to maximize performance. Adjustable top strap and buckle system allows the goaltender to custom tune the strapping system to their individual style of play. The large knee cradle is extended on the inner landing area for greater pad control

with a wide lateral profile to allow for quick pad rotation and features a double layered elastic and Velcro strap for adjustment. Smooth style inner instep area and a sliding toe skate attachment system allows for smooth skate rotation to allow faster pad positioning in the butterfly on the ice.

- Plus 2" thigh rise standard, custom sizes available
- · Large impact reducing padding on inner knee landing area
- Enhanced Carbon fiber performance
- · New thigh guard with full knee cap
- · Adjustable strapping system
- · Full Pro Spec and domestic manufactured
- Angled knee cradle strapping
- · Extremely light weight with full pro features
- Pre shaped for superior fit and performance
- Internal foam core for durability and consistent rebound performance
- · Full top and bottom wear trim
- · Over squared inner thigh for greater five-hole coverage
- Precision balanced for superior feel and quicker movements
- Available in sizes 32+2", 33+2", 34+2", 35+2", 36+2", and 38", and custom sizes

VPG 1100 VELOCITY V6

The new 1100 pro model goal pad has a full flat face design constructed to give precise puck control. All new Pro Core inner foam technology gives the pad a precise shape and provides a firm density that extends to the edges of the pad to create more effective blocking surface. The Pro Core internal padding features ultra-high density foam across the entire length and width of the pad to hold the pad shape and keep the edges more firm for more effective blocking surface. Over square inner thigh rise holds the pad firmer against the ice to help eliminate gaps in coverage. Smooth inner pad edges allow for faster more consistent movement along the ice surface, this also creates a tighter seal against the ice for improved net coverage. The inside knee and calf landing areas provide a wide area to give superior balance and greater pad control for faster movements. The pad features a wide leg cradle with inner and outer protective panels with an adjustable elastic strap to provide rotation adjustment. The pad profile shape is designed specifically to form the pads to the natural shape of the goaltenders legs during play to maximize performance. Adjustable top strap and buckle system allows the goaltender to custom tune the strapping system to their individual style of play. Large knee cradle is extended on the inner landing area for greater pad control with a wide lateral profile to allow for quick pad rotation and features a double layered elastic and Velcro strap for adjustment. Smooth style inner instep area and a sliding toe skate attachment system allows for smooth skate rotation to allow faster pad positioning in the butterfly on the ice.

- Plus 2" thigh rise standard
- · Large impact reducing padding on inner knee landing area
- New thigh guard with full knee cap
- Adjustable strapping system
- Angled knee cradle strapping
- · Extremely light weight with full pro features
- Pre shaped for superior fit and performance
- Internal foam core for durability and consistent rebound performance
- Full top and bottom wear trim
- · Over squared inner thigh for greater five-hole coverage
- · Precision balanced for superior feel and quicker movements
- Available in sizes 32+2", 33+2", 34+2", 35+2", 36+2"

VPG LT60 VENTUS

The Ventus LT60 junior goal pad design features a full flat front surface with a one piece solid outside roll to give the pad a solid firm shape. The preshaped scoop and side profile keeps the pad in a taller posture to increase net coverage and reduce drag along the ice. Internal foam core is constructed with multiple density and thicknesses of foam in a precise arrangement to give the pad a very solid frontal blocking surface and precise flex points. The internal edge of the pad is designed with a wider landing area at the inner knee, this creates added surface area for increased balance and control. The inner shin five-hole structure gives a flatter surface area for solid pad position and quick sliding on the ice surface. The internal knee cradle has an angled strap system that positions the straps below the bend in the knee for added comfort and less friction during pad rotation. Adjustable knee straps allow for precise adjustment to support the knee in the body of the pad to elevate the knee from the ice surface. This also allows the goaltender to get a wider butterfly spread and reduces the stress on knees and hips. The leg cradle features a wide inside landing pad that is shaped to encapsulate the leg and cushion the body weight while going down on the ice surface. The outer leg cradle pad is sculpted to cover the calf and extend coverage into the side profile of the pad to cover gaps when tight up against the post. Knee and leg cradle are designed to create a pivoting hinge so the pad will quickly rotate around the leg to effectively square up the pad to the most effective blocking position.

- · Full firm flat frontal blocking surface
- One piece outside roll structure
- Inner core for precise pad shape
- Extreme light weight with superior pad balance
- Tall plus 2" sizing
- Laced in adjustable thigh quard
- Inner leg cradle shin cushioning
- Off set tie on toe assembly with lace adjustment position

VPG 800 VELOCITY V6 JUNIOR

The new 800 junior Velocity goal pad is styled from our pro models and optimized in shape and design to provide superior performance and level of play for the smaller junior sized goaltender. Full knee cradle with angled adjustment strap allows for full pad rotation and control. Wide inside landing edge of the pad allows for easy pad placement in a butterfly move to the ice and gives added balance for quicker movement along the ice. Flat style pad front gives a firm blocking surface a solid protection. Large outside rolls feature a firm outer edge for increase blocking surface. Molded thigh guard adds extra protection and helps fill in the five-hole area. Pre shaped design conforms to the ideal flex angles in the knee and ankle areas for precise fit and pad stability.

- Knee cradle with angled adjustment strap
- Large inner knee landing pad
- High density side calf guard
- Sliding tie on toe assembly
- Large outside rolls with firm outer edge
- Full leg cradle for pad control
- New pro core internal foam for durability
- Solid top outside roll design
- Available in sizes 22+1.5", 24+1.5", 26+1.5"

New for 2014 the Ventus youth LT50 goal pad. The new model is designed with a full flat front pad face for solid firm blocking surface. The knee section features flex seams to allow for easy flex and break-in for smaller youth goaltenders. The internal foam core features a higher density outer layer to add protection and keep the pad shape to maximize blocking area. Wide inner side edge and large knee landing area help the youth goaltender maintain balance while on the ice. Full knee cradle with adjustment strap allows for pad rotation and keeps the knee secure to the pad. Full leg cradle protects the calf area and provides added protection and full leg coverage. Dual knee straps and dual calf straps and skate retention strap provide for pad control and adjustment.

- · Firm frontal blocking surface
- Large outer roll
- Full leg cradle with shin cushioning
- · Wide inner balance side area
- Pre-curved shape for optimal performance
- · Dual knee flex points for easy break-in
- Plus 2" thigh rise
- Pre-shaped for optimal fit
- Available in size. 22+2", 24+2", 26+2"

VPG 700 VELOCITY V6 YOUTH

The new V6 youth goal pad is designed to provide the smaller youth goaltender with added performance allowing for proper lower body positioning and movements. The pad features knee rolls for increased flexibility and easy break-in. Inner edge leg and knee. padding allows for proper pad positioning while on the ice surface giving stability and balance to increase agility and pad control. The knee cradle features a wide adjustment strap to keep the knee properly located in the pad for optimal control. Scaled in size and width for proper pad proportions.

- Knee cradle for pad security and control
- · Segmented outside rolls add flex
- · Large thigh rise to fill five-hole area
- Available in sizes 20+1.5", 22+1.5", 24+1.5", 26+1.5"

VP LT90 VENTUS

Black/Fluorescent Lime

The Ventus LT90 Custom Pro arm and chest protector is designed to allow the maximum amount of flexibility for an athletic fast moving goaltender while providing the maximum allowable blocking surface and protection for enhanced performance. The arms are constructed of a mesh stretchable base to provide ventilation to reduce heat buildup provide quick drying and superior arm flex. The arm design features precision molded high density plastic caps encapsulated in foam padding for increased impact resistance and features a wide outer bicep pad that adds extra coverage area and squares off the arm for added blocking surface. Large mid arm floaters feature light weight high density foam and large side elbow caps for greater impact resistance, the floater also features a forearm attachment tension adjustment to optimize the pad position and to adjust the desired flex. The arms also feature molded elbow caps that feature four point lace adjustments to allow rotation and width adjustment for any arm size, along with back arm straps and a Velcro adjustable wrist strap. . Large shoulder floaters have a wide frontal blocking surface and are constructed with an extra thick layer of extra hard high density foam to increase protection and provide a superior blocking surface. The shoulder floaters also feature an air cushion backing pad that lifts and elevates the position of the padding for maximum protection and optimal blocking position. The chest pad is sectioned in three unique sections that allow the unit to flex with the natural body movements unique to a goaltender, this design and construction allows the chest pad to stay properly positioned during rapid body movements and keeps the unit in place when in a deep crouched body position. The chest pad features a large sternum plate with polyethylene plastic reinforcement to cover

vital areas of the chest and extends to add coverage to the upper stomach region. Large shoulder caps are elliptical in shape and extend into the upper rib cage area to expand the coverage area. The chest pad features a cross over top adjustment at the shoulder blade to allow the chest pad to be adjusted for vertical positioning to secure the pad closer around the neck and clavicle areas. This allows for precision fit, this balances the unit's weight across the shoulders and body to keep the unit precisely positioned for an even lighter weight feel for superior performance.

- Enhanced performance with Pro Spec construction
- Light weight
- Large shoulder floaters
- No Gap main arm floater pads
- Tapered forearm padding
- · Military spec hardware for added durability
- Cushioned padding under shoulder floaters
- · Wide outer bicep padding
- Four point adjustable elbow padding
- Mesh based arms for cooler play and flexibility
- Maximum net coverage design
- Available in sizes XS, S, M, L, XL

VP 2200 VELOCITY V6

New for 2014 the 2200 V6 arm and chest protector is an all new design created to achieve extreme light weight, flexibility and comfort. The design goal for this new revolutionary arm and chest pad required several design and construction innovations. The chest pad is constructed with thinner Ultra high density foam segments that cover Carbon fiber plates that reduce weight and increases protection. Inside the core of the chest pad are layers of Kevlar ballistic material in layers sewn into a ballistic style component to reduce impact penetration, followed by layers of protective and cushioning foams. The chest pad also features a large sternum plate with foam and carbon fiber inserts to further increase the body core protection. The arms are constructed of a dimensional mesh base and feature ultra-high density molded arm caps with increased coverage area, the forearm cap is tapered to the wrist for a precise fit. The bicep area has added ultra-high density components added to the outer edge. Large shoulder floaters also feature ultra-high density foam construction for impact resistance and are supported by an air cushion pad that also incorporates a carbon fiber shield to increase protection. The lower chest pad features a flex section to allow the chest pad to remain properly positioned when in a crouched position. The chest pad sides are extended to provide wrap around coverage and feature buckle covers to increase protection and durability. Special designed elbow pads are all molded foam construction and feature an ultra-high density cap and have four point adjustments for precision adjustment and fit. The upper shoulder area has Velcro adjustments which provide for secure adjustment and placement so the unit remains balanced and

stationary during body movements. Large back protector has dual chest pad straps and adjustment with a ultra-high density insert for increased protection. No compromise was made to the size of components, durability, or protection to achieve a weight that is 18% lighter than other chest pads.

- Extreme light weight
- Extremely protective with advanced construction and design
- · Large shoulder and arm floaters
- Carbon fiber enhanced performance
- Large sternum plate
- Large lower chest belly flex section
- · Ultra-high density foam throughout
- Ballistic style inner chest pad components
- More contoured neck opening for added comfort
- Full Pro Spec domestic construction
- · Available is sizes XS, S, M, L, XL

VP 1000 VELOCITY V6

The new Velocity 1000 Pro arm and chest pad has extensive features for a high level of performance and protection. The chest pad is constructed with angular designed protective blocks that feature layers of high and Ultra-high density foams and a lower belly flex section. This functions to align the flex and bend points of the chest pad to move with the natural shape of the goaltenders body giving increased range of motion and increased comfort. Large lower chest pad flap flexes when in a deep crouched position so the pad remains properly aligned to maximize protection and blocking surface area. The arm padding features molded reinforced caps encapsulated in foam for higher impact resistance and a wide pre-shaped main arm floater with Ultra-high density internals for increased protection and solid blocking area. Upper side bicep pad extends the protected areas and square off the padding for more net coverage. Full arm strap with adjustments, Velcro adjustable wrist straps and four point adjustable elbow pads allow the arm to be fully custom precise fit for superior performance. Upper chest pad shoulder adjustment gives precise chest pad placement to keep the unit secure around the neck and clavicle. Large shoulder contoured shape shoulder floaters have Ultra-high density foam internal components for extra rigidity and shock dispersal. Large shoulder caps extend to the sides for more net coverage and give more complete protection. Large extended length sternum pad with high density foam and plastic reinforcements for increased padding coverage. Full back spine padding features multiple adjustments for precise fit and comfort.

- Pro construction with added padding thickness
- Multi-sectioned chest pad for flex
- Four point adjustable elbow pads
- Adjustable arm and wrist straps
- Lower chest pad belly flap
- Large shoulder floaters
- Extra width shoulder caps Large sternum plate
- Built in neck guard
- Available in sizes XS, S, M, L, XL

VAUGHN

VP LT80 VENTUS

The Ventus LT80 model is designed to work with the natural movements of the goaltenders body to optimize flexibility while providing superior protection and maximum net coverage for the upper body. Wide extra-large shoulder floaters increase blocking surface area and provide greater impact dispersal. Large sternum plate adds protection over critical areas and extends under the shoulder floaters to give more stability to the shoulder protection. Angled block design on the chest pad provides increased flex and body movement. The Lower chest pad features a separate flap extension that adds flexibility to keep the chest pad properly aligned while making quick movements. The arms are anatomically designed to align the arm protection in a precise alignment and location for increased protection. The arms feature four point adjustable elbow pads, adjustable arm width straps and Velcro adjustable wrist straps to provide for a custom fit. The back padding features High density foam padding over the spine and dual buckle waist strap attachment for security and adjustment.

- Fully molded forearm and bicep caps
- Large wide shoulder floaters
- Extra side rib cage guard
- · Side chest pad extension padding
- Lower chest pad flex extension flap
- Adjustable back padding
- Large reinforced sternum plate
- Available in sizes S, M, L, XL

VP 1100i VELOCITY V6

The new 1100i intermediate pro arm and chest pad is an enhanced design to fit the young adult goaltender that needs the maximum protection and performance, but does not yet have the full body size or weight to fit into a full adult size. Large shoulder floaters feature full pro style Ultra-high density foam inserts to maximize protection and ensure a strong deflecting surface and increased net coverage. Large shoulder caps widen the upper shoulder area blocking surface. Extra layered sternum plate provides additional reinforcement to the sternum area and has an added layer of Carbon fiber for ultimate protection. Wide arm floaters provide for full arm flex and give expanded blocking surface at the mid arm. Fully adjustable arm straps and four point adjustable elbow pads give complete arm adjustment for a precision fit. Full pro thickness chest protector ensures maximum protection for any age or level of play. Full back padding connects with the back shoulder and features multiple adjustments for even balance of the unit for enhanced performance and feel.

- Special intermediate design
- Pro thickness protection
- Molded arm caps
- Flexible lower chest pad section
- · Side belly pad extensions
- Side rib cage extension padding
- · Built in neck guard
- Large shoulder floaters
- · Wide profile shoulder caps
- · Available in sizes M, L, XL, XXL

VP 1000i VELOCITY V6

The new Velocity 1000i Intermediate sized arm and chest pad has extensive features for a high level of performance and protection. The chest pad is constructed with our new V6 design using layers of high and Ultra-high density foams and a lower belly flex section. Large lower chest pad flap flexes when in a deep crouched position so the pad remains properly aligned to maximize protection and blocking surface area. The arm padding features molded reinforced caps encapsulated in foam for higher impact resistance and a wide pre-shaped main arm floater with Ultra-high density internals for increased protection and solid blocking area. Upper side bicep pad extends the protected areas and square off the padding for more net coverage. Full arm strap with adjustments, Velcro adjustable wrist straps and four point adjustable elbow pads allow the arm to be fully custom and precise fit for superior performance. Large shoulder floaters have Ultra-high density foam internal components for extra rigidity and shock dispersal. Large shoulder caps extend to the sides for more net coverage and give more complete protection.

- Four point adjustable elbow pads
- · Adjustable arm and wrist straps
- Lower chest pad belly flap
- Large shoulder floaters
 Extra wide shoulder cape
- Extra wide shoulder caps
- Large sternum plate
- Built in neck guard
- Large back spine protector with height adjustment
- Available in sizes S, M, L, XL, XXL

VP LT60 VENTUS JUNIOR

The Ventus LT60 junior arm and chest protector is designed to work with the natural movements of the goaltenders body to optimize flexibility while providing superior protection and maximum net coverage for the upper body. Extra-large shoulder floaters with a wide profile to increase blocking surface area and to provide greater impact dispersal. Angled block design on the chest pad aligns the chest pad flex points with the body movements. This along with lower chest pad flap adds flexibility to keep the chest pad properly aligned while making quick movements. The arms are anatomically designed to align the arm caps in a precise location for increased protection and more effectively hold the padding in proper position for improved protection and increased effectiveness in blocking surface area. Internal lining on the arms and chest pad are water resistant to prevent weight gain and to facilitate fast drying. The arms feature four point adjustable elbow pads, adjustable arm width straps and Velcro adjustable wrist straps to provide for a custom fit. The back padding features High density foam padding over the spine and dual buckle waist strap attachment for security and adjustment.

- · Fully molded forearm and bicep caps
- · Large wide shoulder floaters
- · Extra side rib cage guard
- · Side chest pad extension padding
- · Lower chest pad flex extension flap
- · Adjustable back padding
- · Large reinforced sternum plate
- · Available in Junior sizes S, M, L

VP 800 VELOCITY V6 JUNIOR

The new Velocity 800 arm and chest protector provides our new V6 styling and covers a wide range of junior sizes. Molded plastic arm caps provide protection and feature foam inserts to reduce impacts. High density chest pad blocks allow for easy flex, increase protection, and provide for light weight construction. The chest pad features a lower belly flap to keep the unit positioned while in a deep crouched position, and has a large plastic reinforced sternum plate to increase protection coverage. The arms feature full arm width adjustment and wrist straps and incorporate separate elbow pads for superior performance. Large shoulder floaters and extended shoulder caps provide protection coverage and increase upper body blocking surface.

- · Pre-shaped for easy break-in
- · Durable nylon and mesh exterior materials
- · Lower belly flex pad
- · Adjustable wrist and arm strap
- · Built in neck guard
- · Large sternum plate
- · Available in size. S/M, M/L

VP 700 VELOCITY V6 YOUTH

The 700 youth sized Velocity arm and chest protector unit features large shoulder area to protect the vulnerable collar bone and shoulder area. Large plastic reinforced sternum plate adds protection in critical impact areas. Fully molded plastic components in the arms, shoulders and elbows along with a padded back spine protector provide added impact resistance. Wide cut easy-flex arms with adjustable wrist strap for a secure fit. Nylon exterior covering material for added durability and limits water absorption to keep unit light weight.

- Pre-shaped design for comfort and easy-break-in
- · Wrap around style chest pad to increase coverage
- · Cushioned inner chest pad lining
- Back spine padding
- · Quick dry internal mesh lining
- · Available in Youth sizes S/M, M/L

T 2000 VELOCITY V6 CATCH GLOVE

The new Velocity V6 2000 model catch glove is designed with a higher thumb angle optimizing the glove shape for catching rising shots. The new design provides for a larger more open hand position creating a wider pocket opening for increased net coverage. The palm is designed with a dimensional shape to provide a curved shape to the palm surface. This allows for more hand leverage to close the glove faster, increases the perimeter strength and is molded in Carbon fiber which reduces weight, increases glove strength and perimeter rigidity. The T-web is designed with an extended length deep pocket and the dual vertical bars and lace function to reduce puck spin for puck retention. The top thumb and cuff have a molded in ridge to prevent puck skip over and to give greater strength to the glove edge for enhanced blocking strength. The back thumb is molded in carbon fiber to provide lighter weight and to provide greater thumb support under high impact loads. The internal thumb features a wider thumb loop with extra padding for greater thumb support and protection. The inner palm hand area features a grip material and grip rail located at the fingertip area giving more leverage and grip for the hand. Mesh finger stalls and back hand control strap allow for a precise fit and adjustable glove control. New floating cuff design allows the glove to have increased wrist flex. This allows for improved hand positioning to give greater net coverage. The back hand padding features a four piece design for increased flex to speed glove break-in and provides more surface area coverage. The design also features an Ultra-high density fingertip deflecting rail to add protection on deflected shots. Internal back hand and wrist straps allows for complete adjustment to secure the glove to the hand for optimal performance.

- · Carbon fiber molded palm for enhanced performance
- · Carbon fiber back thumb guard for increased thumb support
- Pro Spec construction domestic manufactured
- Heat moldable for custom fit and fast break-in
- Four piece full flex back hand protection
- Inner finger grip rail for closing leverage
- Reinforced perimeter edge
- · Defined flex seam for precision closing
- Deep T-web design
- · No binding cuff adds blocking surface
- · Light weight and balanced for feel and performance

TLT90 VENTUS

The T LT90 Ventus Custom Pro catch glove features an advanced anatomical design to increase the performance through superior control, balance, fit and feel. The shape of the glove is designed to provide superior catching power with precision molded curved palm and thumb components that define the shape of the glove and align the flex area of the palm precisely with the natural closure movement of the hand. The internal hand area features divided finger stalls to align the fingers in the glove for control and closing power. The back of the hand is secured in the glove with a two piece stretchable neoprene and mesh internal glove that aligns the inner hand into the body of the glove for security and control. Adjustable back hand strap and wrist strap allow for precise adjustment and security. The inner thumb area features our extra wide thumb tunnel design to support the thumb and allow for thumb angle adjustment to superior closure control and power. Extra deep T-web pocket has a reinforced horizontal top bar that is secured into the body of the glove for added strength and durability. Skate lace waxed webbing reduces puck spin for improved puck control and retention. Full Pro Spec construction adds extra reinforcement along the finger perimeter, T-web and extra padding in the palm and thumb. Wide notch heel area of the thumb allows the stick to sit properly in the glove to apply more force to the stick while shooting. Extra-large two piece back hand protection features a fingertip deflecting ramp along with High density foam over the back of the fingers. Extra wide back cuff has a wide tapered opening to improve the fit and overlap with the glove and to allow extra wrist flexibility. The front cuff box is a no binding construction to increase effective blocking surface and features a wrist side flare to reduce puck skip over and it also increases the wrist flex on the back side of the cuff opening.

- · Unique neoprene inner glove for superior control
- · Precision molded components for stability and durability
- · Molded cuff box with no binding design
- Dual adjustment straps
- · Reinforced T-web
- Pro Spec construction
- · Select materials allow the glove to be custom heat formed
- Fingertip deflecting rail

T 2200 VELOCITY V6

New for 2014 the new 2200 V6 catch glove has a large one piece cuff and thumb section that provides increased protection along the cuff and thumb, this design feature creates a more solid blocking surface. The catch surface is a larger shape and design to give the glove more depth and frontal catch surface area. The T-web is a double bar design with a wider top profile that gives the glove a wider profile and more open pocket for enhanced catching. New Carbon fiber molded palm reduces weight and increases protection, additional carbon fiber segments in the palm surface act further to provide a secondary shock dispersal to reduce impacts to the hand. The internal hand features divided finger stalls with back hand control strap to provide increased hand grip. Inner mid hand pad feature two way adjustments to allow a customizable fit for hand shape and adjustment strap for security. Internal palm base has a grip texture and fingertip grip rail to give more leverage and close the glove faster for puck retention. Large wrist pad incorporates a leather wrist strap that is precisely located to allow the strap to be located directly over the flex area of the wrist for improved hand retention and superior glove feel. New style four piece back

hand pad provides extreme glove flexibility and features our fingertip deflecting ramp covering the finger ends. Wide flared back cuff allows for more wrist flexibility and gives room for arm pads to overlap the gloves properly.

- · Carbon fiber palm increase hand protection and perimeter strength
- · Reinforced finger perimeter strengthens glove edges
- Internal hand design provides precision hand placement and glove control
- · Large double bar T-web
- · Light weight and balanced for feel
- Heat moldable to speed break-in
- Wider catch surface area with wider T-web top
- Curved cuff for puck deflection
- · Solid one piece thumb and cuff design
- · Internal palm with grip surface
- Fingertip inner grip rail

B 2000 VELOCITY V6

The B 2000 blocker features a no binding front blocking board surface and incorporates a Carbon fiber front layer over the Ultra-high density internal foam core for lighter weight and added protection under extreme impacts. The hand location on the board base is carefully designed to provide for balance and feel and to optimize stick placement during paddle down moves on the ice. The bottom edge of the board is beveled to allow the glove to get tight to the ice and reduces weight on the lower end of the glove for improved balance. The top section of the blocking board is curved and laced through the body of the glove, this secures the blocking surface to the inner foam core providing more consistent deflection and control when making saves. The large side shield has a thick Ultra-high density foam layer reinforced with polyethylene plastic providing increased protection to the side of the hand while enlarging the coverage and blocking area of the glove. New floating cuff functions to provide greater range of motion for the wrist and aids in improving the glove angle to the puck. Large finger protectors with a wide base for stability wrap the finger sides and ends for more complete protection. The index finger has a double layer inside edge padding for even more protection. The palm features MSH≠3 base material with a grip layer for added stick control. The palm design is optimized for the hand in the grip position with each finger having a pre shaped curve to the design. The palm has mesh gussets for flexibility and air flow and a cushion pad on the back hand to further increase protection. Full Pro Spec construction adds durability and protection giving the glove the ultimate in performance.

- · Large side shield
- · Carbon fiber front shield and molded thumb component
- Double layered inside edge finger guard
- Tapered bottom edge
- Vented palm side gussets
- Back hand cushion padding to reduce impacts
- · Full adjustable wrist strap
- · Side wrist air cushion under side shield
- Floating articulated cuff design for superior wrist movement
- Full Pro Spec domestic construction

B LT90 VENTUS

The Ventus LT90 pro blocker features a unique construction that incorporates the side shield into the front blocking board, this creates added stiffness and reduces twisting under high impact loads and provides a more solid blocking surface. Special high density internal foam board provides light weight and is reinforced with a polyethylene plastic overlay to give added protection and durability. The palm is constructed of our special MSH3 material that gives an incredible feel and durability. The palm is designed with anatomically curved fingers to naturally allow a more comfortable hand position and has a textured overlay surface that provides a precise grip for excellent stick control, mesh gussets allow for air flow to improve hand cooling and reduce heat buildup. Large side and a wrist shield has a high density insert of foam and plastic creating a solid blocking surface area and also features an air chamber pad behind the shield to increase protection and keep the shield square and extended for added coverage. Narrowed taper bottom board edge allows for a quick paddle down movements with a tight seal to the ice with no gaps for more complete protection. Extra-large finger protectors have HD foam and plastic inserts for maximum impact reduction, dual inner index finger pads seal the index finger from shots that can ride up the stick paddle to impact the side of the hand and fingers. The hand position is moved one inch from a normal

attachment location on the blocking board to drop the board lower to extend and increase the goaltenders reach and effectively increasing net coverage. Fully custom hand crafted with Pro Spec construction with added plastic in the front and side surfaces increases protection and durability.

- · High density internal foam blocking board for light weight
- Ergonomically shaped palm with cushion padding to reduce vibration
- Large side shield with air cushion pad
- Angled blocking board increases blocking surface area
- Tapered bottom board
- Large wrist opening with flex cuff
- No binding construction increases usable blocking space
- Adjustable wrist strap
- Two piece finger protectors with large surface area
- Dual side index finger protection
- Large top board flare for puck deflecting

B 2200 VELOCITY V6

The new V6 2200 blocker glove is a complete new design that has been optimized to achieve extremely light weight without any compromise to durability or protection. New style blocking board features contoured shape which tapers in thickness to provide even weight distribution and enhance glove balance. The palm and cuff are located at a higher point on the board back surface this effectively extends the glove net coverage. Solid style High density foam and plastic side shield increase protection from impacts and features a vertical deflecting rail to increase effectiveness of the blocking surface. The thumb area features a Carbon fiber molded thumb shield to reduce weight and further increase protection. Large index finger protector has a wider attachment base to prevent twisting with precision placement and also features dual layer side index finger protection. The front blocking board features a layer of Carbon fiber over an increased thickness of HD foam, this provides for enhanced performance when deflecting pucks to the corners. The palm is constructed with a Clarino nash material for great stick feel and has vented gussets for ventilation and flexibility and features a back hand cushion pad to further increase protection and comfort. The cuff is a two piece design that allows the cuff to flex with the goaltenders wrist movements this also increases the range of motion

that is especially helpful when stickhandling or shooting.

- Carbon fiber reinforced front blocking board
- Extremely light weight
- Precision balanced to give superior performance and feel
- Full Pro Spec construction domestic manufactured
- Air cushioned back hand padding
- Full adjustable wrist strap
- Flex cuff for full range of motion
- Higher hand position to increase net coverage area
- Tapered top and bottom board edges
- Large side shield with deflecting rail
- Contoured palm for comfort designed for how the hand grips the stick
- · Large finger protectors with dual layered inner index finger guards

BLOCKERS

THESE STANDARD COLORS AVAILABLE

B 1000 VELOCITY V6

The B 1000 blocker features a no binding front blocking board surface and incorporates an Ultra-high density internal foam core for lighter weight and added protection under extreme impacts. The hand location on the board base is carefully designed to provide for balance and feel and to optimize stick placement during paddle down moves on the ice. The bottom edge of the board is beveled to allow the glove to get tight to the ice and reduces weight on the lower end of the glove for improved balance. The top section of the blocking board is curved and laced through the body of the glove, this secures the blocking surface to the inner foam core providing more consistent deflection and control when making saves. The large side shield has a thick Ultra-high density foam layer reinforced with polyethylene plastic providing increased protection to the side of the hand while enlarging the coverage and blocking area of the glove. New floating cuff functions to provide greater range of motion for the wrist and aids in improving the glove angle to the puck. Large finger protectors with a wide base for stability wrap the finger sides and ends for more complete protection. The index finger has a reinforced inside edge padding for even more protection. The palm features MSH3 base material with a grip layer for added stick control. The palm design is optimized for the hand in the grip position with each finger having a pre shaped curve to the design. The palm has mesh gussets for flexibility and air flow and a cushion pad on the back hand to further increase protection. Full Pro Spec construction adds durability and protection giving the glove the ultimate in performance.

- · Large side shield
- Tapered bottom edge
- · Vented palm side gussets
- · Back hand cushion padding to reduce impacts
- Full adjustable wrist strap
- Side wrist air cushion under side shield
- · Floating articulated cuff design for superior wrist movement

B LT80 VENTUS

The Ventus LT80 blocker features a unique construction that incorporates the side shield into the front blocking board. This creates added stiffness and reduces twisting under high impact loads for improved precision puck control and more solid blocking surfaces. The hand and palm position is designed to angle and tilt the board forward from the hand. This effectively improves the gloves blocking angle to the puck for more net coverage. Special high density internal foam board provides light weight and is reinforced with a polyethylene plastic overlay to give added protection and durability. The palm is constructed of our special MSH3 material that gives an incredible feel and durability. The palm is designed with anatomically curved fingers to naturally allow a more comfortable hand position and has a textured overlay surface that provides a precise grip for excellent stick control, mesh gussets allow for air flow to improve hand cooling and reduce heat buildup. Large side shield with a solid high density foam insert creates a rigid side blocking surface. The bottom board edge is tapered to provide for quick paddle down movements with a tight seal to the ice with no gaps for more complete protection. Extra-large finger protectors have HD foam and plastic inserts for maximum impact reduction. Inner index finger pad closes the index finger from shots that can ride up the stick paddle to impact the side of the hand and fingers. The hand position is moved one inch from standard location on the blocking board to drop the board lower to extend and increase the goaltenders reach effectively increasing net coverage.

- · High density internal foam blocking board for light weight
- · Ergonomically shaped palm with cushion padding to reduce vibration
- · Large side shield with air cushion pad
- · Tapered bottom board
- Large wrist opening with flex cuff
- No binding construction effectively increases usable blocking space
- Adjustable wrist strap
- · Two piece finger protectors with large surface area
- · Large top board flare for puck deflecting

BLOCKERS

B 1100i VELOCITY V6

The V6 1100i Intermediate blocker glove is a complete new design that has been optimized to achieve extremely light weight without any compromise to durability or protection. New style blocking board features contoured shape which tapers in thickness to provide even weight distribution and enhance glove balance. The palm and cuff are located at a higher point on the board back surface this effectively extends the glove net coverage. Solid style High density foam side shield to increase protection from impacts and features a vertical deflecting rail to increase effectiveness of the blocking surface. Large index finger protector has a wider attachment base to prevent twisting with precision placement and also features dual layer side index finger protection. The front blocking board features a layer of high impact polyethylene over a durable HD foam core. This provides for enhanced performance when deflecting pucks to the corners. The palm is constructed with a Clarino Nash material for great stick feel and has vented gussets for ventilation and flexibility and features a back hand cushion pad to further increase protection and comfort. The cuff is a two piece articulating design that allows the cuff to flex with the goaltenders wrist movements this increases the range of motion that is especially helpful when stickhandling or shooting.

- Extremely light weight
- Precision balanced to give superior performance and feel
- Air cushioned back hand padding
- Full adjustable wrist strap
- Flex cuff for full range of motion
- Higher hand position to increase net coverage area

BLOCKERS

THESE STANDARD COLORS AVAILABLE

B LT60 VENTUS JUNIOR

The Ventus LT60 junior sized blocker features a unique construction that incorporates the side shield into the front blocking board for a firmer, stronger construction. Special high density internal foam board provides light weight and is reinforced with a polyethylene plastic overlay to give added protection. The palm is constructed of our special MSH3 material that gives an incredible feel and grip and durability. Large side shield increases side hand protection and increases net coverage during side impacts.

- · Large side shield
- · Tapered bottom board
- · Large wrist opening with flex cuff
- No binding construction effectively increase usable blocking space
- Adjustable wrist strap
- . Two piece finger protectors with large surface area
- · Large top board flare for puck deflecting

B 800 VELOCITY V6 JUNIOR

The B 800 is our junior size blocker. It is scaled to provide the maximum blocking area but provide a precise fit for good glove control. Lightweight construction with less mass allows younger goaltenders quicker movements. Large side shield adds side hand protection and added blocking area. Articulating cuff provides increased volume in the wrist area to allow arm padding to overlap for complete protection and increased wrist movement. Adjustable wrist strap provides added glove control and large finger protectors also features side index finger padding for more complete coverage. The blocking board is designed with beveled edges to reduce weight and improve balance and performance. Reinforced palm with double wear layer for durability and mesh gussets provide easy flex and ventilation.

- · Adjustable wrist strap for control
- Tapered bottom board
- Reinforced palm

B 700 VELOCITY V6 YOUTH

The B 700 youth blocker is designed with the younger goaltender in mind. Lower hand position allows for easy stick pick-up and paddle down moves to the ice. Large top board curve gives added wrist movement and allows for greater mobility. Full thickness blocking surface along with molded plastic reinforced fingers and thumb for added protection.

- Side hand shield for added net coverage and protection
- · Split finger protectors for hand dexterity and movement
- · Durable quick drying palm

VM CARBON ELITE

Fully hand crafted pro goal mask features an increased thickness shell for increased impact resistance and low flex. The shell is constructed with Carbon fiber and reinforced with additional layers of aramid fiber bonded and infused with Epoxy resin. The shell is compression molded under heat and is compressed from interior and exterior surfaces to provide added strength and even shell dimensions. Triple layered interior foam surrounds the head with no gaps for even complete protection. The foam liner features a perforated top surface to increase air flow and allow for quick drying, vent holes aid in air flow to reduce heat buildup when playing. The shell is designed with sloping contoured shape to deflect impacts away from the head to increase protection. The cage is available in two styles a straight bar or cat eye style and the cage is made with super lightweight Titanium for extreme strength. The pro cat eye cage features a large angled center bar for increased cage strength and to provide amazing sight lines. Cheek padding is made with molded EVA foam that is tapered and contoured for a precise fit and provides incredible comfort. Large rear skull plate also features the triple layer padding and gives full coverage with no gaps and features a five point adjustable harness to allow for a snug fit. The chin cup is a molded foam covered with an anti-microbial fabric and is adjustable with dual Velcro straps.

- Special order pro mask
- Available in adult sizes Medium and Large

VM 9500 SB

The VM 9500 SB goal mask features a complete composite outer shell constructed with Carbon and Aramid fibers for lighter weight and strength. The shell is high pressure molded and infused with epoxy resin to ensure complete saturation of the composite fibers and heat cured to provide durability and a smooth finish. The shell shape is carefully designed and contoured to move impact loads away from the frontal impact areas. Flared chin allows the mask to be tucked in the chest area to better protect the neck area. Extra wide facial opening provides enhanced vertical and peripheral vision. The cage design is optimized to provide true vision sight lines and positions the cage bars to achieve for optimum clarity and features stainless steel construction for durability and low glare. Internal padding of lightweight pro VN foam has full coverage and no gaps for continuous protection, padding is completely removable to allow for cleaning and maintenance.

- Available in standard colors. Black, White, Navy, Red
- · Available in Adult size: Medium and Large

GOAL MASKS

VM 7700 SB

The 7700 SB goal mask is engineered to provide increased performance with greater visibility and sight lines. The shell shape has been carefully contoured and molded to reduced flat spots in the design to reduce impacts in critical areas and provide lighter weight and higher strength. The flared lower chin provides added rigidity and allows the goaltender to close off the area between the neck and chest for greater protection coverage. Full inner shell padding with no gaps in impact areas gives complete coverage and meets all new certification rules. Dual density vinyl nitrile VN padding provides exceptional protection, comfort and fit. The cage design has been optimized to provide true vision sight lines and positions the cage bars to achieve maximum forward and peripheral vision. Cages are all constructed from high grade stainless steel with a low luster finish to reduce glare and blend into the ice surface to increase visibility. The stainless steel will not rust and provides added durability. All attachment hardware is manufactured in stainless steel for strength and durability to increase longevity. Full skull plate harness with heavy duty elastic straps and buckles provides complete adjustment. The chin cup features a quick change Velcro adjustment to allow the goaltender more options on fitting. Vent holes are positioned to facilitate rapid air ventilation and heat dispersal for cooler play.

- Pro style shape for enhanced fit
- · Dual density internal lining
- · Light weight
- · Stainless steel cage and attachment hardware
- Pro style adjustable harness.
- Narrow profile chin area
- · Adjustable chin cup and low profile chin strap
- · Chin cup with anti bacterial treatment
- Replaceable sweat band
- Mask comes with padded carry bag
- Standard colors of Black, Navy, Red and White
- · Graphic decal and paint options available
- · Available with straight bar or certified cat eye cage style
- · Fully HECC, CSA and CE certified
- · Available in non certified large eye opening Pro cage
- · Available in sizes adult Small, Medium, Large

GOAL MASKS

VM 7500 SB

The VM 7500 SB goal mask is designed and engineered to create optimal visibility. The recessed cage area moves the cage closer to the eyes which improves vision and gives wider sight lines. Anatomically designed for optimal fit and performance with raised mold lines that reduces flat spots for superior puck deflection to lessen impacts. High impact shell is constructed in special high strength Lexan material that is custom engineered for greater impact resistance. The shell is engineered with precisely located ridge lines that add strength and reduce shell flex under high impacts. The jaw area is profiled with a flared lower short chin to give superior downward visibility and allows the mask to be fitted closer to the face for improved visibility. The chin design allows the mask to be tucked in tight to the chest to provide more protection and allows for added adjustment to the chin cup for a more custom fit. Large air vent holes and face opening are designed to provide maximum ventilation to reduce heat build up. The cage is constructed entirely of low luster stainless steel for added durability and reduced glare for optimal visibility. High density pro style vinyl nitrile foam liner provides durability and is low water absorbing to provide light weight and comfort.

- Available in standard colors. White, Black, Red, Navy
- · Adult sizes. S, STD, and Junior

VM 7700 JUNIOR

The 7700 junior provides our same adult styling for the younger youth goaltender. The shell shape has been carefully contoured and molded to reduce flat spots to reduce impacts in critical area and provide light weight and a high strength structure. Flared lower chin provides added shell strength and allows the goaltender to tuck the mask in tighter to the chest to protect the neck region. Full inner shell padding is designed with no gaps between the padding to ensure continuous protection from any angle of impact. Cage design is optimized for maximum forward and peripheral vision. Cage is a straight bar design with low profile bars to reduce glare. Molded chin cup with Velcro adjustment straps and adjustable chin strap allows for proper alignment to ensure proper fit. Vent holes are positioned to facilitate rapid air circulation for heat dispersal and cooler play.

- · All stainless steel fasteners for durability
- · Removable head band
- · Pro style rear adjustment harness
- · Chin cup features anti-bacterial treatment
- · Straight bar cage with low profile bar design
- · Pro style shape for enhanced fit
- Fully CSA, HECC, and CE certified
- · Available in Black or White

VM 7400

The VM 7400 goal mask is designed and engineered to create optimal visibility with a recessed cage area that improves peripheral vision and gives wider sight lines. Anatomically designed for optimal fit and performance with raised mold lines that reduce flat spots for superior puck deflection to lessen impacts. High impact shell constructed with a specially engineered high strength injected Lexan material is custom engineered for greater impact resistance. The shell is engineered with precisely located ridge lines that add strength and reduce shell flex under high impacts. The design provides maximum downward visibility and the flare at the bottom of the chin allows the mask to be tucked in tighter to the chest for added coverage. Air vent holes and face opening are designed to provide maximum ventilation to reduce heat build up. The cage is constructed from high tensile carbon steel and features a silver powder coated surface for added durability.

- · Available in Black or White
- · Sizes. Adult STD, Junior
- Fully CSA, HECC, and CE certified

GOAL PANTS

P 2000 VELOCITY V6

The Velocity V6 goal pant is designed to achieve a maximum amount of net coverage and still provide excellent flexibility and ease of movement. The 2000 goal pant uses new molded high density hips and thigh pads to reduce weight and increase protection. The design and internal molded components improve the pant balance and fit for enhanced performance. Internal thigh cradle design has been designed to provide thigh pad stability and limits thigh pad twisting for greater puck stopping and deflecting. Large five-hole rolls with internal support padding give quick rapid closure to reduce any openings in the five-hole area between the thigh guards. Full length stretch crotch area and inner thigh area provide increased flexibility and ventilation.

- Thigh cradle technology keeps thigh pad square for maximum net coverage
- · Lace up frontal area for adjustment
- Adjustable full diameter belt
- · Rear leg split on pant shell
- · Front side groin pads to square up blocking area
- · Inner leg and crotch stretch for added flexibility
- Available in Black, Navy, Red and custom colors
- Available in sizes: S (36-38), M (40-42), L (44-46), XL (48-50), XXL (52-54)
 Note: add 8-10 inches to actual waist size then match to appropriate pant size.

PLT90 VENTUS

The Ventus LT90 goal pant is designed with a large diameter upper waist section for a loose fit and to give complete coverage when pulling the arms into the body in a blocking position. Large thigh guards are designed to stay centered on the thighs and hang naturally to help fill the five-hole area and create added net coverage. The wide front profile features side groin pads that hold the pant outward at the hip region increasing coverage even more. The side groin pad extensions are constructed with HD inserts to maximize flexibility while increasing protection. Large molded hip sections and extended length tailbone protection provide greater protection. The rear leg features a vertical shell split at the rear of the leg that allows the thigh area to stay in position and resist being displaced while moving down to the ice. This also helps to optimize the thigh guard positioning in the five-hole area for maximum performance.

- Hydro quick dry internal lining
- · Adjustable belt for custom fit
- Skate lace front for added adjustment
- Reinforced tab mounted suspender buttons
- · Inner thigh five-hole padding
- Contoured front waist and belly flap
- Full stretch crotch and inner leg panels
- · Available in Black, Navy, Red and custom colors
- Available in sizes S (36-38), M (40-42), L (44-46), XL (48-50), XXL (52-54)

Note: add 8-10 inches to actual waist size then match to appropriate pant size the extra room is needed because of the padding thickness and to allow for your chest protector.

GOAL PANTS

P 2200 VELOCITY V6

The new P 2200 Velocity V6 goal pant features a new concept in fit and protection. The pant is designed with a narrower upper waist section that fits closer to the body. The kidney and upper sections of the pant is designed with special Ultra-high density foam segments that are specifically designed to give complete flexibility to the body core. The inner section of the pant features an air cushion pad over the hips and tail bone, this increased protection and grips the pant to the body for a precision fit. The interior of the pant also features a padded belt with dual front adjustment buckles so the pant can be tightened for a precise fit to the individual goaltender. Large Carbon fiber thigh guards reduce weight and increase protection and give a more solid blocking area on the thigh guard edges as they will not flex as much as a conventional molded plastic component. Carbon fiber inserts are used in the double layer tail bone section to increase protection. Large front side groin pads are segmented and constructed with Ultra-high density foam to reduce weight. Large splits on the rear leg keep the thigh portions precisely positioned when going down to the ice, this lets the thigh guard stay properly positioned to increase five-hole coverage. The pant inner lining is constructed with a special two layered mesh material that increases durability, sheds water, and dries quickly. Wide inner thigh and crotch stretch material allow for complete flexibility and easy body core movement.

- Two layer mesh lining for increased durability and fast drying
- Large Carbon fiber thigh guards for enhanced performance
- Unique fit and cut for a more athletic style goaltender
- · Lighter weight with the use of composites.
- · Large side groin pad adds blocking surface and protection
- · Hip and tail bone cushion pads add protection and comfort
- · Internal belt for added adjustment
- · Outer belt and front lace allows for more adjustment and precision fit.
- · Inner thigh five-hole HD padding
- · Inner thigh lace tab to attach thigh guards
- · Larger rear leg spilt opening to keep thigh guards in place
- · Pro Spec construction domestically manufactured
- Available in sizes S (36-38), M (40-42), L (44-46), XL (48-50), XXL (52-54). Add 8-10 inches to actual waist size then match to appropriate pant size.

Note: This pant will fit about 4 inches smaller around the waist than our other model in any given size so it does not fit loose as a typical goal pant does.

GOAL PANTS

P 1000 VELOCITY V6

The 1000 Velocity V6 goal pant is constructed and tailored specifically to work with the movements of a goaltender to give optimum performance and comfort. Wide thigh guards feature a slight curve and are designed to give maximum blocking surface and fill in the five-hole area when going down to the ice surface. Sport mesh lining for low water absorption and quick drying. Large side abdominal floating pads extend down to the side groin area for added protection and give the pant flexibility while in a crouched position. Front contoured waist gives a lower front profile for chest pad fit and easier bending while in a crouched position.

- Inner thigh HD blocks with internal support padding
- Adjustable belt with double front pull adjustment
- · Low profile thigh guards fit well under tall leg pads
- · Extended tailbone protection
- · Full stretch crotch and inner leg panels for flexibility
- Available in Black, Navy, Red and custom colors
- Available in sizes XS (32-34), S (36-38), M (40-42), L (44-46), XL (48-50), XXL (52-54)

Note: add 8-10 inches to actual waist size then match to appropriate pant size.

PLT80 VENTUS

The Ventus LT80 goal pant is designed with a wide profile cut to create added room and comfort with a large diameter upper waist section for a loose fit and to give complete coverage and flexibility for improved body movement. Wide style thigh guards are designed to stay centered on the thighs and hang naturally to help fill the five-hole area. Large side thigh slash pads help to extend net coverage and increase the protected areas and square the edge of the pant and provide a stiff blocking surface. Quick dry internal mesh lining provides for added comfort and increases air flow around the body to reduce heat retention. Front side groin pads that hold the pant outward at the hip region increasing protection coverage and square up the frontal area of the pant. Large molded hip sections and extended length tailbone protection provide expanded protection. The rear leg features a vertical shell split at the rear of the leg that allows the thigh area to stay in position and resist being displaced while moving down to the ice, this helps optimize the thigh guard positioning in the five-hole area for maximum performance.

- · Adjustable belt for custom fit
- Skate lace front for added adjustment
- · Mesh lining for cooler play
- · Reinforced tab mounted suspender buttons
- Inner thigh five-hole padding
- · Contoured front waist and belly flap
- · Full stretch crotch and inner leg panels
- · Available in Black, Navy, Red
- Available in sizes S (36-38), M (40-42), L (44-46), XL (48-50)

Note: add 8-10 inches to actual waist size then match to appropriate pant size the extra room is needed because of the padding thickness and to allow for your chest protector.

P 1100i VELOCITY V6 INTERMEDIATE PRO

The 1100i Velocity V6 intermediate pro goal pant is designed and optimized for performance and protection. Large five-hole blocks with internal support padding provide for added protection and faster more solid closing of the five-hole area. Rear leg splits in the pant shell help keep the thigh guards positioned properly while going down to the ice for added net coverage. Side groin floating flex pads add blocking area and increase protection.

- · Lace-up front for added adjustment
- Intermediate sizing and increased protection
- · Adjustable belt for customized fit
- Rear leg split to optimize performance
- · High density inner thigh protection
- · Large thigh guards with cushion padding
- Available in Black, Navy, Red and custom colors
- Available in sizes. M (24-26), L (26-28), XL (28-30), XXL (30-32).
 Actual waist size.

P LT60 VENTUS JUNIOR

The Ventus LT60 junior goal pant is designed with a wide profile cut to create added room and comfort with a large diameter upper waist section for a loose fit and to give complete coverage and flexibility for improved body movement. Wide style thigh guards are designed to stay centered on the thighs and hang naturally to help fill the five-hole area. Side thigh slash pads help to extend net coverage and increase the protected areas. Quick dry internal mesh lining provides for added comfort and increases air flow around the body to reduce heat retention. Front side groin pads hold the pant outward at the hip region increasing protection coverage and square up the frontal area of the pant. Large molded hip sections and extended length tailbone protection provide expanded protection. The rear leg features a vertical shell split at the rear of the leg that allows the thigh area to stay in position and resist being displaced while moving down to the ice, this helps optimize the thigh guard positioning in the five-hole area for maximum performance.

- Adjustable belt for custom fit
- Skate lace front for added adjustment
- · Mesh lining for cooler play
- Reinforced tab mounted suspender buttons
- · Inner thigh five-hole padding
- · Contoured front waist and belly flap
- Full stretch crotch and inner leg panels
- Available in Black, Navy, Red
- Available in junior sizes S (20-22), M (24-26), L (26-28), XL (28-30).
 Actual waist size.

P 800 VELOCITY V6 JUNIOR

The 800 junior goal pant is designed specifically to match the body movements of a goaltenders to allow increased range of motion and flexibility. Wide upper waist section allows for chest protector to be tucked into the pants if desired, front belly pad and side groin padding improves frontal impact protection. Thigh guards are shaped specifically for a goaltender to maximize net coverage, and also feature molded side slash protection and added padding on the inside of the thigh. Large tailbone padding, lower back extension and reinforced kidney and hip pads complete the protection to vital areas.

- · Padded adjustable belt
- Extended lower back protection
- Cool fit mesh lining
- Available in Black only
- Available in sizes. S/M (20-24), M/L (24-28). Actual waist size.

GOAL STICKS

VGS LT90 VENTUS

The Ventus LT90 composite goal stick is designed to achieve a new standard in light weight, feel and balance with an average weight of 690 grams. The paddle area features a flat frontal profile to effectively increase square inch blocking area. Constructed of pure carbon fiber composite and epoxy resins all layered in a precise schedule of layers to provide incredible strength, durability and controlled stiffness. Internal ribbed chambers in the blade and paddle add strength and allow for increased stiffness along the edges of the paddle and reduce twisting motion under impact and while shooting for a cleaner crisper feel with more power. High impact foams laminated into the inner core of the paddle reduces and dampens vibrations from impacts and prevents unwanted paddle flexing. The entire stick is molded under high pressure and heat to precisely control the shape and cure of the resin system to ensure optimum performance and consistency.

- Extreme light weight, average under 700 grams
- · Incredible balance point
- · Foam dampened paddle
- · Mid blade twist curve pattern
- · Full Pro Spec SOP patterns and construction
- Flat paddle design
- · Dimpled texture on shaft for added grip
- · Rounded heel reduces wear
- · Natural carbon finish on paddle and blade
- · White/black color combination only
- Available in Paddle heights 25", 26", 27"

Textured Grip Finish

VGS 2000

The new 2000 model goal stick is constructed with 100% carbon fiber to achieve light weight with superior balance and great feel. The paddle area of the stick features a thin profile that reduces weight, and mass to achieve great stick balance, the flat paddle surface increases blocking and deflecting efficiency. The blade features internal bracing that bonds the front and back surface to increase strength with foam inserts to reduce vibrations from impacts. The composites are layered to reduce twisting from impact this gives more strength to the stick, and increases puck feel for improved shooting. The stick is cured under high pressure and temperature to fully bond the epoxy resins to cure all the composite layers together to enhance the performance.

- Tapered top hand hold area of paddle
- Full composite construction
- · Light weight
- Mid heel twist curve
- · Foam dampening on interior of stick
- · Low vibration construction
- Rounded heel for improved shooting
- White/black color combination only
- Available in paddle heights 25", 26", 27"

GOAL BAGS

BG 2200

The BG 2200 goal bag is designed to hold a complete set of adult size goal equipment. The bag is constructed with a durable high strength 1680 denier nylon and reinforced with rip stop nylon in critical high stress areas. Carry straps are box stitched and reinforced for added strength. Three wheel design has large size wheels that help keep the bag from dragging on the bottom edge when heavily loaded. Internal storage pockets with zippers on each side and one end for added storage inside the bag. Wide U shaped opening for easy access and added straps across the top of the bag can be adjusted to keep the equipment from shifting and keeps the equipment centered in the bag for easier pulling or carrying of the bag.

- Dimension. 43" long x 21" high x 20" wide
- · Available in black only

BG 1000

Full adult size goal bag is designed to fit a full set of equipment. The bag features a 1200 denier nylon construction and reinforced in wear and stress areas on the corners and bottom. Heavy duty webbing and straps with added rivets on the carry handles for increased durability. Three wheel design with larger style wheels for easier pulling. Large U shape top opening with heavy duty #10 zipper for easy access. Two internal pockets on each side of bag for added storage.

- Dimensions: 43" long x 21" high x 20" wide
- Available in silver/black only

BG 2200i

The BG 2200i goal bag is designed to hold a complete set of intermediate size goal equipment. The bag is constructed with a durable high strength 1680 denier nylon and reinforced with rip stop nylon in critical high stress areas. Carry straps are box stitched and reinforced for added strength. Three wheel design has large size wheels that help keep the bag from dragging on the bottom edge when heavily loaded. Internal storage pockets with zippers on each side and one end for added storage inside the bag. Wide U shaped opening for easy access and added straps across the top of the bag can be adjusted to keep the equipment from shifting keeping the equipment centered in the bag for easier pulling or carrying of the bag.

- Dimension. 35" long x 18" high x 20" wide
- · Available in black only

BG 1100

The 1100 goal bag is extra super sized to hold an entire set of adult size equipment. The bag features extra heavy 1680 denier nylon construction with all internal seams double stitched and bound for added strength. Large number ten coil zipper for added strength and allows the bag to be fully opened for easy access. Heavy duty webbing reinforces the sides and ends of the bag. Large nylon carry handles with box stitched reinforced seams for durability and reinforced hand grasp handles at each end. Reinforced bottom corners with air vent grommets add durability and strength to the construction. The entire bottom surface of the bag is double layered for added strength and water resistance.

- Dimension 44" long x 22" high x 24" wide
- Extra rugged 1680 nylon construction
- Large #10 zipper
- Reinforced corners
- · Internal mesh removable wash bag
- · Available in black only

BG 1000i

The BG 1000i is designed to fit a full set of junior sized equipment. The bag features a 1200 denier nylon construction and reinforced in wear and stress areas on the corners and bottom. Heavy duty webbing and straps with added rivets on the carry handles for increased durability. Three wheel design with larger style wheels for easier pulling. Large U shape top opening with heavy duty #10 zipper for easy access. Two internal pockets on each side of bag for added storage.

Evgeni Nabokov

- Dimensions: 34" long x 18" high x 20" wide
- · Available in silver/black only

GOAL CUPS

VGC LT90 VENTUS

The Ventus LT90 goal cup features advanced double cup design for the ultimate in protection. The internal cup is an advanced design that provides multi stage impact protection. The outer cup is a combination of half inch foam and plastic to dissipate and absorb initial impact for true double layered protection. Contoured waist sectioned area for added flexibility and comfort. Adjustable waist and leg support straps. Durable sport mesh and nylon construction. Available in three colors. standard Black, Black/Red and Black/Navy. Fits waist sizes 32" to 44". Also available in an intermediate size.

VGC LT90 Intermediate - fits waist sizes 25" to 32"

VGC 2000

The Velocity goal cup features a contoured top waist with high-density padding. Layered foam padding throughout for additional comfort and protection. Large side cushion bumpers and banana-style cup features foam edge bumpers for greater protection. Available in three colors: Black/Silver, Red/Silver, and Blue/Silver. Fits waist sizes 32" to 44"

VGC 2000i - fits waist sizes 25" to 32"

VGC 1000

The 1000 Velocity goal cup features a contoured front waist band with HD foam inserts. Large dimensionally molded cup with foam edging, the exterior of the cup also features large cushioned impact bumpers for added comfort and protection. Adjustable waist band and leg straps fits waist sizes 30" to 44"

VGC 1000i

The 1000i Velocity junior goal cup features a contoured front waist band with HD foam inserts. Large dimensionally molded junior sized cup with foam edging, the exterior of the cup also features large cushioned impact bumpers for added comfort and protection. Adjustable waist band and leg straps fits waist sizes 20" to 31"

WPP 900

The women's pelvic protector features a high-density reinforced lower abdominal area contoured for comfort and fit, a full adjustable waist strap with Velcro closure and molded plastic protection with foam padding.

- Durable nylon exterior
- Internal molded foam and plastic
- Fits waist sizes: 26" to 36"

ACCESSORIES

VPC 8000

Shirt style clavicle and neck protection holds unit more securely in place for added protection and comfort. Mesh outer shirt construction to reduce heat build up, cut resistant BNQ certified design.

- . Available in sizes M, L
- . Black only

VPC 1000

The 1000 clavicle protector has high-density plastic and foam layered padding and an adjustable neck strap with durable soft textured sport mesh vented lining and nylon exterior.

· Available in assorted colors

VPC 1000i

· Junior size model

VPC 7000

The 7000 clavicle protector has a full ballistic nylon exterior, Velcro adjustable closure and soft internal padding with high density foams for shock dispersal.

- Available in Adult sizes: M, L
- BNQ certified
- · Available in Black, Navy, Red

VPC 7000 JR

- BNQ certified
- · Available in Black, Navy, Red
- Available in one size only

VTG 2200 PRO

The 2200 pro throat shield is designed with a wide profile chin with a flare at the lower edge that allows the unit to fit tight to the upper chest. The added width gives a wider area of coverage to the neck. Injection molded with a raised perimeter edge that provides added rigidity and stiffness for improved puck deflection. Molded in a tough Lexan polycarbonate material for shock resistance and maximum durability and visual clarity.

· Available in Clear, Smoke, Blue tint, and Red tint.

VTG 2000

The 2000 throat shield is designed with a curved and flared chin area that allows the unit to fit tighter to the upper chest for added protection and allows the unit to slide across the jersey without catching and limiting head motion. Molded in Lexan polycarbonate for maximum durability, shock resistance and clarity.

· Available in Clear, Smoke tint, Blue tint, Red tint

VTG 2000i - Intermediate/Junior - Clear only

ACCESSORIES

VKP 2200 KNEE/THIGH GUARD

The VKP 2200 Pro knee and thigh guard features a three piece design that allows for a close fit and superior flexibility. Molded high density polyethylene plastic and foam inserts overlap to eliminate gaps and are contoured to wrap around the thigh and knee for more complete coverage. Double shield protection is attached over the knee and lower thigh for maximum protection. Wide inner knee padding provides cushioning to reduce side knee impacts. The inner knee section is lined with synthetic leather for durability and to provide a non-slip surface. New adjustable garter belt supports the pads and keeps in precise alignment for improved performance.

- · Available in Black, Navy, Red
- · Grater belt is available separately

VKP 1100i - Intermediate with adjustable garder belt

VKP LT80 KNEE/THIGH GUARD

The new VKP LT80 knee and thigh guard is designed with a low profile knee area for a natural fit into the leg pads. Cushion padding on inner and outer areas of the knees. Large molded knee cap gives increased protection coverage. Molded thigh section extends to protect the inner thigh area. Dual elastic straps with grip strips secure the pad to the leg for optimal fit.

- Available in black only
- · Also available in a junior LT60 model.

VKP 1000 KNEE/THIGH GUARD

The VKP 1000 knee and thigh guard features a three section design for a close fit. Plastic reinforced thigh padding in two sections and a separate knee section with a low profile construction for a close fit. Three adjustable elastic straps with Velcro closure for full adjustment. Available in Black, Navy, Red.

VKP 7800

The VKP 7800 knee and thigh protector features a molded shape to allow the protector to fit under the goal pants.

Thigh guard features five-hole blocking design with ultra high density foam protection that also provides light weight. Adjustable strap with buckle, lace on attachment, fits any Vaughn adult size leg pad. Available in Black, Blue, Red, and White. Also available in a smaller

intermediate size VKP 7070

VJ 2000 JERSEY

The VJ 2000 goal jersey is extra large cut with a wide body and large diameter arms to properly fit over the arm and chest protector. Durable mesh construction provides ventilation all stripes are sewn in with double stitched seams.

- · Available in White/Black, White/Blue, White/Red
- · Available in adult sizes L, XL, XXL

VJ 2000i JERSEY

Intermediate/junior sized version of the adult model. Constructed with durable micro mesh fabric for ventilation. Wide cut to properly fit over the arm and chest protector.

- Available in White/Black, White/Blue, White/Red
- Available in intermediate/junior sizes L, XL

T-SHIRTS

- · T-shirts available in short sleeve and long sleeve
- · Color: Athletic Grey
